Politics And Processes Of Scholarship:

The Politics and Processes of Scholarship Joseph Michael Moxley, Lagretta Tallent Lenker, Donald J. Boudreaux, Christopher J. Coyne, Brian Kogelmann, 2024-12-15 Political Process New Perspectives on the Virginia and Bloomington Schools explores political process as emphasized by the Virginia and Bloomington schools of political economy. Though the Virginia school of public choice and Bloomington school of institutional analysis have risen to prominence through the works of James Buchanan, Gordon Tullock, and Elinor Ostrom, their joint emphasis on political process has been neglected. The chapters in this volume explore the idea of political process through a multi-disciplinary perspective and to better situate both schools in this discussion. Approximately half the chapters make theoretical contributions proposing new frameworks for understanding how people come together to make collective decisions. The other half examine applied case studies through a process-oriented framework.

Theory and Methods in Political Science Vivien Lowndes, David Marsh, Gerry Stoker, 2017-09-28 A broad-ranging and pluralistic textbook which highlights the rich variety of approaches to studying politics. Written by an international team of experts, this fully revised fourth edition offers cutting-edge coverage from fundamental to contemporary issues. Integrating guides to further reading and clear examples of how research methods can be applied, it enables readers to feel confident about taking their study of politics forward. An ideal foundation for study and research in political science, this textbook will be essential to students at any stage of their degree. It serves as core reading on undergraduate and postgraduate political analysis theory and methods courses. In demonstrating how independent research is undertaken in political science, the book allows students and early career researchers to begin thinking about formulating their own research agendas. This new edition leads the way with fresh new ideas and perspectives with the help of new co-editor Vivien Lowndes. Includes new chapters on post-structuralism as a theoretical approach and on big data as a methodological resource. Offers an international perspective on political science with discussion of global as well as domestic politics and a range of international cases and examples.

Understanding Political Public Relations Techniques Albina Gayoso, 2023-01-01 This book focuses on Political Public Relations (PPR) Techniques of both Russian and US Leaderships. It does so by analysing leadership presidential or otherwise inaugural addresses from the two countries between 1980 to 2018 using triangulation analysis of verbal, non-verbal language and emotions of speakers. Given that the Russian perception of Political Public Relations, known as Political Technologies (PT) in Russia, is unique and often misunderstood or misinterpreted in Western scholarship, the book acts as a bridge between these two fields of studies. With that in mind, the study of Political Technologies is explained and applied in a wider sense than is offered by other disciplines, specifically in more meaningful ways than suggested in communications discipline in the West. In doing so, the book not only offers a deep dive into theory but also provides a unique methodology aiming at extracting and analysing PPR or PT techniques. This triangulation method allows us to investigate a combined effect of audio-visual and verbal effects on

the general public and offers a way of interpreting such effects Readers would understand more about the research dynamic in PPR discipline apply the triangulation methodology to expand this research and more generally find out more about the evidence based list of PPR techniques and their applications and interpretations *Race, Reform, and Regulation of the Electoral Process* Guy-Uriel E. Charles, Heather K. Gerken, Michael S. Kang, 2011-01-17 This book offers a critical re evaluation of three fundamental and interlocking themes in American democracy the relationship between race and politics the performance and reform of election systems and the role of courts in regulating the political process This edited volume features contributions from some of the leading voices in election law and social science The authors address the recurring questions for American democracy and identify new challenges for the twenty first century They not only consider where current policy and scholarship are headed but also suggest where they ought to go over the next two decades The book thus provides intellectual guideposts for future scholarship and policy making in American democracy *The Politics of School Choice* Hubert Morken, Jo Renee Formicola, 1999 The Politics of School Choice is the first comprehensive examination of diverse efforts to promote tax credits public vouchers private scholarships and charter schools Morken and Formicola provide the most current national report on the burgeoning American school choice movement They analyze the strategies and tactics being used by a wide variety of individuals and organizations to leverage change pass laws win court cases and mobilize community support to build successful winning school choice coalitions Based largely on extensive interviews documentary research and surveys this book covers the spectrum of school choice options and shows how they are being promoted in the United States today It explains who the players are what types of programs they endorse and the various rationales behind them The authors report the views of the entrepreneurs religious leaders heads of think tanks and foundations public litigators scholars activists minority leaders and politicians who are in the forefront of providing parents with resources for educational alternatives Finally Morken and Formicola cover the strengths and weaknesses of the school choice issue concluding that the movement has a wide ranging membership that is uneven in its implementation and that it is taking different forms in various regions of the country As the pace of change accelerates and new school choice programs proliferate this study is a critical resource for all those concerned about the present and future status of American education

women are often more likely than men to face practical barriers to entering politics including a paucity of financial resources lower levels of education less access to information greater family responsibilities and deprivation of rights that has left them with fewer opportunities to acquire political experience This book gives a critical account of women s participation in politics and the politicization of women s issues Women s Liberation Movement has concentrated on women s oppression which includes the sexual division of labore control of sexuality and the relation of reproduction access to education jobs and power over our lives

Women and Political Representation in Canada Manon Tremblay,Caroline Andrew,1998-02-13 This collection of essays explores the often antagonistic relationship between women and political life in Canada While women make up little over half of the total population in Canada they are in many ways conspicuous by their absence from the Canadian political scene
