Elena Block, 2015-08-11. The long-lasting hegemonic rule of President Hugo Chávez not only involved significant rearrangements in the control of political power in Venezuela but also shifts in the way its citizens constructed, connected, and interacted with politics. In this book, Elena Block explores the political communication style developed by Chávez to transmit his ideologies and engage with his publics. A style that unfolded incrementally between 1998, the year of his first presidential campaign, and March 13th, 2013, when his death was announced after a long struggle with cancer. What sort of political communication did Hugo Chávez develop to establish hegemony in Venezuela? What made him so popular? Block argues that Chávez's political communication style can be better understood through the concept of mimetisation: a systematic sequence of communicational events and practices whereby the Venezuelan President managed to build a bond with his constituents. Applying a mixed qualitative method of collection and analysis of relevant data, this phenomenon is examined via the President's emotional use of common cultural symbols, dramatized and informalised language, savvy use of communication and media, and boost of inclusive, compensatory, and participatory practices in which his constituents not only felt mimetically mirrored but also endowed with an identity. Shedding new light on contemporary theories of populism from the perspective of political communication and identity construction, the notion of mimetisation can be adjusted and applied to study the links of populist phenomena, the mediatization of politics, and government cultural appeal and identity politics in other cultures and situations in contemporary times. *Unconscionable Crimes* Paul C. Morrow, 2020-09-22. The first general theory of the influence of norms—moral, legal, and social—on genocide and mass atrocity. How can we explain and prevent such large-scale atrocities as the Holocaust? In *Unconscionable Crimes*, Paul Morrow presents the first general theory of the influence of norms on genocide and mass atrocity. After offering a clear overview of norms and norm transformation rooted in recent work in moral and political philosophy, Morrow examines numerous twentieth-century cases of mass atrocity, drawing on documentary and testimonial sources to illustrate the influence of norms before, during, and after such crimes. Morrow considers such key explanatory pathways as the erosion of moral norms through brutalization and demoralization, the exploitation of legal norms to legitimize persecution and deny violence, and the enduring influence of gender-based social norms on targets and perpetrators of atrocities. Key constraints on atrocities would include the revision of moral norms that have traditionally guided the conduct of soldiers and humanitarian aid workers, the strengthening of legal prohibitions on large-scale crimes through statutory and institutional reform, and the elimination of social norms prescribing silence about personal experience of atrocities. Throughout, Morrow emphasizes the differences among moral, legal, and social norms, which

stand in different relations to real or perceived social practices and exhibit different patterns of creation modification and elimination Ultimately he argues norms of each kind are integral to the explanation and the prevention of mass atrocities

**The Battle of Britain on the Big Screen** Dilip Sarkar, 2023-03-23 During the Second World War the British movie industry produced a number of films concerning the war all of which were by necessity heavily myth laden and propagandised. Foremost among these productions was *The First of the Few* which was the biggest grossing film of 1942. In the immediate post war period to start with there were no British aviation war films. The first to be released was *Angels One Five* in 1952. It was well received confirming that the Battle of Britain was a commercial commodity. Over the next few years many famous war heroes published their memoirs or had books written about them including the legless Group Captain Douglas Bader whose story *Reach for the Sky* told by Paul Brickhill became a best seller in 1956. It was followed a year later by the film of the same name which starring Kenneth More dominated that year's box office. The early Battle of Britain films had tended to focus upon the story of individuals not the bigger picture. That changed with the release of the star studded epic *Battle of Britain* in 1969. Using real aircraft the film produced in color and on a far larger scale than had been seen on film before was notable for its spectacular flying sequences. Between the release of *Reach for the Sky* and *Battle of Britain* however much had changed for modern Britain. For a variety of reasons many felt that the story of the nation's pivotal moment in the Second World War was something best buried and forgotten. Indeed the overall box office reaction to *Battle of Britain* reinforced this view all of which might explain why it was the last big screen treatment of this topic for many years. It was during the Battle of Britain's seventieth anniversary year that the subject returned to the nation's screens when Matthew Wightman's docudrama *First Light* was first broadcast. Essentially a serialisation of Spitfire pilot Geoffrey Wellum's best selling memoir of the same title Wightman cleverly combined clips of Wellum as an old man talking about the past with his new drama footage. The series is in the opinion of the author the best portrayal of an individual's Battle of Britain experience to have been made. In this fascinating exploration of the Battle of Britain on the big screen renowned historian and author Dilip Sarkar examines the popular memory and myths of each of these productions and delves into the arguments between historians and the filmmakers. Just how true to the events of the summer of 1940 are they and how much have they added to the historical record of *The Finest Hour*.

**Discourses of War and Peace** Adam Hodges, 2013-06-18 Given the prevalence of war around the world it is vital to understand the way discourse contributes to the promotion and positioning of war as a natural or inevitable response to international problems. Sirhan, 2021-08-28 This book examines the portrayal of the Palestinian Israeli conflict by looking at the language used in its reporting and how this can in turn influence public opinion The book explores how language use helps frame an event to elicit a particular interpretation from the reader and how this can be manipulated to introduce bias Sirhan begins the book by examining the history of the conflict and the many persistent myths that surround it She analyses how five events in the conflict two in which the Palestinians are victims two in which the Israelis are victims and Operation Cast Lead are reported in five British newspapers The Daily Mail The Guardian The Independent The Daily Telegraph and The Times By looking at these events across a range of newspapers the book investigates differences in the way that the media report each side before exploring what factors motivate these differences including issues of bias censorship lobbying and propaganda **Torture, Intelligence and Sousveillance in the War on Terror** Vian Bakir, 2016-02-24 Torture Intelligence and Sousveillance in the War on Terror examines the communication battles of the Bush and Blair political administrations and those of their successors in America and Britain over their use of torture first hand or second hand to gain intelligence for the War on Terror Exploring key agenda building drivers that exposed the torture intelligence nexus and presenting detailed case studies of key media events from the UK and USA this insightful
