Politics And Property Rights The Closing Of The Open Range In The Postbellum South:

Politics and Property Rights Shawn Everett Kantor, 1998-04-25 After the American Civil War agricultural reformers in the South called for an end to unrestricted grazing of livestock on unfenced land They advocated the stock law which required livestock owners to fence in their animals arguing that the existing system in which farmers built protective fences around crops was outdated and inhibited economic growth The reformers steadily won their battles and by the end of the century the range was on the way to being closed In this original study Kantor uses economic analysis to show that contrary to traditional historical interpretation this conflict was centered on anticipated benefits from fencing livestock rather than on class cultural or ideological differences Kantor proves that the stock law brought economic benefits at the same time he analyzes why the law's adoption was hindered in many areas where it would have increased wealth This argument illuminates the dynamics of real world institutional change where transactions are often costly and where some inefficient institutions persist while others give way to economic growth

The Politics of Public Space Setha Low, Neil Smith, 2013-01-11 Why is public space disappearing Why is this disappearance important to democratic politics and how has it become an international phenomenon Public spaces are no longer democratic spaces but instead centres of private commerce and consumption and even surveillance and police control The Politics of Public Space extends the focus of current work on public space to include a consideration of the transnational in the sense of moving people and transformations in the nation or state to expand our definition of the public and public space Ultimately public spaces are one of the last democratic forums for public dissent in a civil society Without these significant central public spaces individuals cannot directly participate in conflict resolution The Politics of Public Space assembles a superb list of contributors to explore the important political dimensions of public space as a place where conflicts over cultural and political objectives become concrete

A History of Environmental Politics Since 1945 Samuel P. Hays, 2000-10-15 Long before public life in America was enlivened with such dramatic sound bites as acid rain global warming rain forests and the ozone layer Samuel P Hays was well

launched on his career of tracking this new phenomenon of environmental affairs His first foray a book on the early twentieth century conservation movement published in 1958 helped to launch environmental history as a field and his continued writings after coming to the University of Pittsburgh in 1960 helped to bring the field to full flower Now he has produced another volley which promises to continue to energize this growing and dynamic field of study A History of Environmental Politics since 1945 Hays provides an overview of environmental politics during the last half century both its formative and its maturing years that will be useful to those who are actively engaged in environmental affairs and those who wish to watch and assess it from the sidelines His themes are both simple and diverse His overall focus is on the emergence of an environmental culture which has engaged millions of Americans in varied ways of thought and action on the one hand and the intense opposition to that drive on the other Hays explores a wide range of issues such as the role of nature in an urban society pollution and its causes and effects the impact of an ever increasing population and its voracious appetite to consume At the same time he follows these threads through science technology economics management the structure of politics and the results of policy A History of Environmental Politics since 1945 provides an introduction to the subject for both the specialist and the lay audience the general public and the student It provides a high level of insight that will inform both those who are environmental experts and those who wish to take a first step at grasping the meaning of environmental affairs It constitutes a formative guide for a subject that promises to engage the nation ever more fully in the years to come

Reconstructions Thomas J. Brown, 2008-09-23 The pivotal era of Reconstruction has inspired an outstanding historical literature In the half century after W E B DuBois published Black Reconstruction in America 1935 a host of thoughtful and energetic authors helped to dismantle racist stereotypes about the aftermath of emancipation and Union victory in the Civil War The resolution of long running interpretive debates shifted the issues at stake in Reconstruction scholarship but the topic has remained a vital venue for original exploration of the American past In Reconstructions New Perspectives on the Postbellum United States eight rising historians survey the latest generation of work and point to promising directions for future research They show that the field is opening out to address a wider range of adjustments to the experiences and effects of Civil War Increased interest in cultural history now enriches understandings traditionally centered on social and political history Attention to gender has joined a focus on labor as a powerful strategy for analyzing negotiations over private and public authority The contributors suggest that Reconstruction historiography might further thrive by strengthening connections to such subjects as western history legal history and diplomatic history and by redefining the chronological boundaries of the postwar period The essays provide more than a variety of attractive vantage points for fresh examination of a major phase of American history By identifying the most exciting recent approaches to a theme previously studied so ably the collection illuminates the creative process in scholarly historical literature

Standing Their Ground Adrienne Monteith Petty, 2017 The transformation of agriculture was one of the most far reaching developments of the modern era In

analyzing how and why this change took place in the United States scholars have most often focused on Midwestern family farmers who experienced the change during the first half of the twentieth century and southern sharecroppers swept off the land by forces beyond their control Departing from the conventional story this book focuses on small farm owners in North Carolina from the post Civil War era to the post Civil Rights era It reveals that the transformation was more protracted and more contested than historians have understood it to be Even though the number of farm owners gradually declined over the course of the century the desire to farm endured among landless farmers who became landowners during key moments of opportunity Moreover this book departs from other studies by considering all farm owners as a single class rejecting the widespread approach of segregating black farm owners The violent and restrictive political culture of Jim Crow regime far from only affecting black farmers limited the ability of all farmers to resist changes in agriculture By the 1970s the vast reduction in the number of small farm owners had simultaneously destroyed a Southern yeomanry that had been the symbol of American democracy since the time of Thomas Jefferson rolled back gains in landownership that families achieved during the first half century after the Civil War and remade the rural South from an agrarian society to a site of global agribusiness

Remaking Wormsloe Plantation Drew A. Swanson, 2012-04-01 Why do we preserve certain landscapes while developing others without restraint Drew A Swanson s in depth look at Wormsloe plantation located on the salt marshes outside of Savannah Georgia explores that question while revealing the broad historical forces that have shaped the lowcountry South Wormsloe is one of the most historic and ecologically significant stretches of the Georgia coast It has remained in the hands of one family from 1736 when Georgia s Trustees granted it to Noble Jones through the 1970s when much of Wormsloe was ceded to Georgia for the creation of a state historic site It has served as a guard post against aggression from Spanish Florida a node in an emerging cotton economy connected to far flung places like Lancashire and India a retreat for pleasure and leisure and a carefully maintained historic site and green space Like many lowcountry places Wormsloe is inextricably tied to regional national and global environments and is the product of transatlantic exchanges Swanson argues that while visitors to Wormsloe value what they perceive to be an authentic undisturbed place this landscape is actually the product of aggressive management over generations He also finds that Wormsloe is an ideal place to get at hidden stories such as African American environmental and agricultural knowledge conceptions of health and disease the relationship between manual labor and views of nature and the ties between historic preservation and natural resource conservation *Remaking Wormsloe Plantation* connects this distinct Georgia place to the broader world adding depth and nuance to the understanding of our own conceptions of nature and history

Closed Seasons Julia Brock, 2025-05-27 In a unique and personal exploration of the game and fish laws in Alabama Georgia and Mississippi from the Progressive Era to the 1930s Julia Brock offers an innovative history of hunting in the New South The implementation of conservation laws made significant strides in protecting endangered wildlife species but it also disrupted traditional hunting practices and livelihoods particularly among African Americans and poor whites Closed Seasons highlights how hunting and fishing regulations were relatively rare in the nineteenth century but the emerging conservation movement and the rise of a regional sportsman identity at the turn of the twentieth century eventually led to the adoption of state level laws Once passed however these laws were plagued by obstacles including insufficient funding and enforcement Brock traces the dizzying array of factors propaganda racial tensions organizational activism and federal involvement that led to effective game and fish laws in the South
