Politics and Society in Western Europe Jan-Erik Lane, Svante O. Ersson, 1999-02-23 Politics and Society in Western Europe is a comprehensive introduction for students of West European politics and of comparative politics This new edition has been extensively revised and updated to meet with the new needs of undergraduate students as they come to terms with a changing social and political landscape in Europe This textbook provides a full analysis of the political systems of 18 Western European countries their political parties elections and party systems as well as the structures of government at local regional national and European Union levels Throughout the book key theoretical ideas are accessibly introduced and examined against the very latest empirical data on civil society and the state

State and Society in Western Europe P. A. Allum, 1995 This is a major new textbook in European politics Comparative and up to date it examines the problems of West European democracies in the era of the Single European Act and the Treaty of Maastricht Allum discusses the politics of the four major Western European countries Britain France Germany and Italy He examines key institutions and developments in the light of contemporary social and political science paradigms combining theory with empirical material At the same time he situates national politics within the broader context of European integration Comparative in intent the book is organized around themes not countries economy civil society and the state It includes chapters on the economy social structure political cleavages and communication parties and groups as well as governmental institutions executive administration subnational government and coercive apparatus Each chapter is illustrated with a wealth of concrete examples The conclusion is simply stated votes count but resources decide The book is intended for students of European and comparative politics and for those concerned with the political aspects of European studies

Radical Left Voters in Western Europe Raul Gomez, Luis Ramiro, 2022-10-07 Radical Left Voters in Western Europe explores who votes for Radical Left Parties in contemporary Western Europe and why Once considered a relic of the past which was doomed to disappear in affluent societies Radical Left Parties were able to survive unprecedented electoral crises in the 1980s and 1990s to become a stable and significant feature of contemporary West European politics Despite this our knowledge of the electorate of contemporary Radical Left parties is extremely limited To fill this gap this book analyzes the radical left electorate in 17 West European countries Belgium Cyprus Denmark Finland

France Greece Germany Iceland Ireland Italy Luxembourg the Netherlands Norway Portugal Spain Sweden and Switzerland for a period of 18 years 2000 18 The research combines data from multiple sources surveys country level data and party level data to show how amidst social and political change Radical Left Parties have been able to maintain a relatively sizeable and clearly identifiable electorate with fairly similar socio demographic and attitudinal features Moreover the book argues that in order to explain electoral support for Radical Left Parties it is important to consider not only voter characteristics but also the characteristics of the parties themselves and of the political and economic context in which they compete for votes This book will be of interest to scholars of comparative politics political sociology electoral behaviour and political parties

Politics in Western Europe Today D. W. Urwin, W. E. Paterson, 2014-09-25 Examining such issues as the welfare state the politics of unemployment and government industry relations this work looks at the developments in western European politics up to and during the 1980s

Rethinking Social Democracy in Western Europe Richard Gillespie, William E. Paterson, 2013-07-23 First published in 1993 This title is the product of a conference designed to throw light on some central questions about the phase of programmatic renewal from the 1950s to the then present day The evidence presented in this volume pursues to demonstrate the existence of a European wave of social democratic programmatic renewal effort during the 1980s the sweep of which the author argues being broader than the previous renewal wave in the 1950s

State Territoriality and European Integration Michael Burgess, Hans Vollaard, 2006-09-27 The European nation state is now placed between the interconnected processes of globalization and European integration This new book examines these evolving relationships showing how the conventional territorial basis of the state is being reappraised Bringing together leading thinkers on the nation state this volume tackles key questions about how we should conceptualize and discuss the political significance of territory in today's world For example does the era of Europeanization and globalization herald the end of citizens traditional attachment to their national territories Do our conceptions of the state no longer correspond to contemporary political realities These questions are approached from a range of positions that illuminate the debates now taking place across the world This book delivers a clear set of key concepts indicators and theoretical notions to carry out a historically and empirically grounded examination Drawing upon case studies from across Europe the lessons and conclusions detailed have a fascinating international scope and can be applied to our understanding of globalization which is intimately connected with European integration This is an invaluable book for all students of European integration political science and international relations

The Impact of European Integration on West European Politics Luca Carrieri, 2020-10-27 This book analyses emerging trends in the politicisation of EU conflicts in Western Europe between 2006 and 2019 evaluating the transformative effects arising from multiple crises the Euro crisis the migration crisis and the Brexit Referendum It describes how EU issues have been increasingly emphasised and polarised by various political parties both the mainstream pro EU and anti EU protest parties and have been transformed into more meaningful determinants of voting

The respective chapters investigate the fluctuations in EU issue entrepreneurship and EU issue voting identifying which party types have been more likely to benefit from their EU issue proximity to voters and assessing the growing politicisation of the EU conflict in both South European and North Western countries This book will be of particular interest to students and scholars of political parties European politics Euroscepticism and voting behaviour **Green Politics in Japan** Lam Peng-Er, 2005-06-22 An important comparative study of Japanese politics that reveals that green issues have yet to displace the traditional urban politics of post industrial Japan This is unlike the rise of green parties and politics in Europe Unlike Europe it seems that political values in Japan are still informed by the conservative values of hierarchy and deference The Retreat of Social Democracy John T. Callaghan, 2000 An examination of policy and programme in the key social democratic parties of Britain France Germany and Sweden since the 1970s It situates change in the context of capitalist restructuring and shows how the radical Left initially responded to the unfolding crisis of the post war order **Politics of International Human Rights Law Promotion in Western Europe** Koldo Casla, 2019-06-19 This book offers a critical reinterpretation of Western European States programmatic support for International Human Rights Law IHRL since the 1970s It examines the systemic or structural constraints inherent to the international legal system and argues that order trumps justice in Western Europe s promotion of international human rights norms The book shows that IHRL evolved as a result of a tension between two forces A European understanding of international society based on order the centrality of the State and a minimalist conception of human rights and a civil society and UN promoted mostly Western particularly European but broader conception of human rights based on justice As such human rights norms emerge and develop when some states idea of order meets with advocates idea of justice We are living a historical juncture of shifting tectonic plates with rising nationalism in the Global North ever growing power in the Global South and a declining presence of Europe in global affairs The conditions under which IHRL emerged have fundamentally changed and unpacking the factors beneath the international recognition of human rights has never been more pressing This book will be of key interest to scholars students and practitioners in human rights law public international law international relations critical legal theory and in European politics Developments in West German Politics Gordon Smith, William E. Paterson, Peter H. Merki, 2016-01-12 This book gives up to date assessments of key trends and issues in the Federal Republic with sufficient background analysis to make the treatment of the various topics accessible to those without detailed prior knowledge of German politics *The Lost Decade? The 1950s in European History, Politics, Society and Culture* Heiko Feldner, Claire Gorrara, Kevin Passmore, 2010-10-12 This volume of essays explores the social political and cultural legacies of a decade which has until relatively recently received scant scholarly attention Sandwiched uncomfortably between the traumatic events of the Second World War and the dramatic changes of the 1960s the 1950s appeared as seemingly transitional years while they were in fact an astonishingly fecund period of reassessment and experimentation when traditional models were re evaluated and new models were road

tested to be either developed or rejected An important intervention in the dynamic scholarly re examination of the 1950s this volume analyzes these years in relation to three broadly defined areas historiography politics and society and culture What emerges from all three parts of the volume is a vision of the 1950s as a decade which was to have a profound impact on post war European identities in two key respects as a time of accelerated European intellectual exchange and as a time of fertile receptivity to the new variously formulated and contested across and within national borders Written by experts in the field the contributions to this volume represent some of the most exciting work on the 1950s currently being undertaken in Europe and the US They combine high intellectual standards with accessibility and will appeal to academics students and the general reader alike *European Politics Today* Geoffrey K. Roberts, Patricia Hogwood, 1997 In this new textbook Geoffrey Roberts and Patricia Hogwood provide an up to date introduction to the political system and processes of Western Europe They show that political decisions are not made in a vacuum but in the context of specific historical developments geographical constraints and social demands *Bibliographie Mensuelle* United Nations Library (Geneva, Switzerland), 1989 The Reshaping of West European Party Politics Christoffer Green-Pedersen, 2019-07-31 Long gone are the times when class based political parties with extensive membership dominated politics Instead party politics has become issue based Surprisingly few studies have focused on how the issue content of West European party politics has developed over the past decades Empirically Reshaping of West European Party Politics studies party politics in Belgium Denmark France Germany the Netherlands Sweden and the UK from 1980 and onwards This book highlights the more complex party system agenda with the decline but not disappearance of macroeconomic issues as well as the rise in new politics issues together with education and health care Moreover various new politics issues such as immigration the environment and European integration have seen very different trajectories To explain the development of the individual issues this volume develops a new theoretical model labelled the issue incentive model of party system attention The aim of the model is to explain how much attention issues get throughout the party system which is labelled the party system agenda To explain the development of the party system agenda one needs to focus on the incentives that individual policy issues offer to large mainstream parties i e the typical Social Democratic Christian Democratic or Conservative Liberal parties that have dominated West European governments for decades The core idea of the model is that the incentives that individual policy issues offer to these vote and office seeking parties depend on three factors namely issue characteristics issue ownership and coalition considerations The issue incentive model builds on and develops a top down perspective on which the issue content of party politics is determined by the strategic considerations of political parties and their competition with each other Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more

Tillman, 2021-07-22 Authoritarianism and the Evolution of West European Electoral Politics provides a novel explanation of rising Euroscepticism and right wing populism in Western Europe The changing political and cultural environment of recent decades is generating an ongoing realignment of voters structured by authoritarianism which is a psychological disposition towards the maintenance of social cohesion and order at the expense of individual autonomy and diversity High authoritarians find the values and demographic changes of the past several decades a threat to social cohesion which has created an opportunity for PRR parties to gain their support by campaigning against these perceived threats to national community posed by immigration values change and European integration The result is a worldview evolution in which party conflict is shaped by the rival preferences of high and low authoritarians Drawing on national and cross national survey data as well as an original survey experiment this book demonstrates how the relationship between authoritarianism and 1 attitudes towards the EU and 2 voting behaviour has evolved since the 1990s In doing so this book advances these literatures by providing an explanation for why certain voters are shifting towards PRR parties as electoral politics realigns [The politics today companion to West European Politics](#) Geoffrey Roberts, Patricia Hogwood, 2018-07-30 This electronic version has been made available under a Creative Commons BY NC ND open access license There is an urgent need for a book of this nature which provides students with all the essential information required and a full definition of terms A perfect companion to European politics today written by the same authors this book presents past events prominent personalities important dates organisations and electoral information in an accessible easy to read format The book is split into five sections for ease of use a dictionary of significant political events a chronology of major events in Europe since 1945 a biographical dictionary a dictionary of political organisations and electoral data In addition to being a comprehensive reference tool this book is intended to provide a sound historical background to the development of Western European politics **Politics of Religion in Western Europe** François Foret, Xavier Itçaina, 2013-06-17 Religion is becoming increasingly important to the study of political science and to re examine key concepts such as democracy securitization foreign policy analysis and international relations The secularization of Europe is often understood according to the concept of multiple modernities the idea that there may be several roads to modernity which do not all mean the eradication of religion This framework provides support for the view that different traditions societies and groups can come to terms with the components of modernity capitalism democracy human rights science and reason while keeping in touch with their religious background faith and practice Contributors examine the interaction between EU integration processes and Western European countries such as Belgium France Luxembourg Austria Scandinavia Italy and the UK and shine fresh
