## Politics And The People:

*Politics is for People* Shirley Williams, 1981 If we are to enhance the quality of life a bold new approach to politics is needed that takes into consideration the economic realities of the 1980s Shirley Williams a founder of the new British Social Democratic Party former Labourite and government minister outlines her blueprint for action in this forthright and intelligent book Traditional institutions in both capitalist and communist systems are cracking under the stresses of advanced industrialism Williams contends The sturdy structures once responsible for economic abundance emergent class interests and political responses are now in disrepair Even the impressive postwar economic and social achievements are jeopardized by scarce energy and the unmet educational needs of high technology Policymakers and citizens in the West can no longer assume that full employment or a wide range of social services or good industrial relations are achievable unless there is a quantum leap in our political thinking What Williams wants and is working toward is a government that is limited accountable and able to be superseded when it forfeits popular support The welfare state furthermore needs to be reformed to allow for more participation She calls for the devolution of power and decentralization in government big business and unions In three sweeping proposals she suggests a ten year plan to bring the welfare state into the future a Marshall Plan to assist the Third World and greater disarmament after a period of successful detente Williams words ring with harsh truths and tangible needs She challenges us with her own declaration of intent The old politics is dying The battle to decide what the new politics will be like is just beginning It is possible just possible that it will be a politics for people      **Politics for the People [also Entitled, the "Political Library for the People"]** POLITICS., 1877      Politics for People Forrest David Mathews, 1999 This volume points out that many Americans making no secret of their anger at being shut out of the political system are looking for ways to take that system back Because of their low opinion of politics as usual the author contends that some people are trying to create a politics relevant to their everyday lives He describes how people become politically engaged how they build civic communities and how they generate political energy or public will He argues that political discussion is the doorway into politics and he makes a case for infusing partisan debate with more public dialog He then explains what a democratic citizenry must do if representative government is to perform effectively and he shows how officials might work with and not just for the public The author integrates an examination of the dilemma of inaccessible politics with practical examples of ways in which ordinary citizens can manage influence and even capture the future of their own communities      We the People Benjamin Ginsberg, Theodore J.
