The surrounding land is covered in dense green vegetation, including palm trees and other tropical plants. The sky is a pale blue, and the overall scene is bathed in soft, natural light.

Politics Of Agent Orange:

Agent Orange Edwin A. Martini, 2012 Taking on what one former U S ambassador called the last ghost of the Vietnam War this book examines the far reaching impact of Agent Orange the most infamous of the dioxin contaminated herbicides used by American forces in Southeast Asia Edwin A Martini s aim is not simply to reconstruct the history of the chemical war but to investigate the ongoing controversy over the short and long term effects of weaponized defoliants on the environment of Vietnam on the civilian population and on the troops who fought on both sides Beginning in the early 1960s when Agent Orange was first deployed in Vietnam Martini follows the story across geographical and disciplinary boundaries looking for answers to a host of still unresolved questions What did chemical manufacturers and American policymakers know about the effects of dioxin on human beings and when did they know it How much do scientists and doctors know even today Should the use of Agent Orange be considered a form of chemical warfare What can and should be done for U S veterans Vietnamese victims and others around the world who believe they have medical problems caused by Agent Orange Martini draws on military records government reports scientific research visits to contaminated sites and interviews to disentangle conflicting claims and evaluate often ambiguous evidence He shows that the impact of Agent Orange has been global in its reach affecting individuals and communities in New Zealand Australia Korea and Canada as well as Vietnam and the United States Yet for all the answers it provides this book also reveals how much uncertainty scientific medical legal and political continues to surround the legacy of Agent Orange Project Muse

Exposing Men : The Science and Politics of Male Reproduction Cynthia R. Daniels Associate Professor of Political Science Rutgers University, 2006-08-03 Exposing Men examines how ideals of masculinity have long skewed our societal and scientific understanding of one of the pillars of male identity reproductive health Only with the recent public

exposure of men's reproductive troubles has the health of the male body been thrown into question and along with it deeper masculine ideals. Whereas once men's sexual and reproductive abilities were the most taboo of topics today erectile dysfunction is a multi-billion dollar business and magazine articles trumpet male reproductive decline with headlines such as *You're Half the Man Your Father Was*. Cynthia R. Daniels casts a gimlet eye on our world of plummeting sperm counts, spiking reproductive cancers, sperm banks, and pharmacological cures for impotence in order to assess the true state of male health. What she finds is male reproductive systems damaged by toxins and war and proof piling up that men through sperm pass on harm to the children they father. Yet despite the evidence that men's health as much as women's significantly affects the vitality of their offspring, Daniels also sees a society holding on to outdated assumptions, one in which men ignore blatant health risks as they struggle to live up to antiquated ideas of manliness.

The Politics of Readjustment Wilbur Scott, 2017-09-04 Veterans of all wars face a demanding task in readjusting to civilian life. Vietnam veterans have borne an additional burden, having returned from a controversial war that ended in defeat for the United States and South Vietnam. To address this situation, leaders among the Vietnam veterans and their allies formed organizations of their own to articulate their problems and extract concessions from a reluctant Congress, Federal agencies, and courts. Scott, a former infantry platoon leader in Vietnam, describes the major social movements among his fellow veterans during the period of 196 to 1990 in a lively narrative combining personal interviews with documentary and press records. Included in the book are the sociological stories of protests against the war in Operations RAW and Dewey Canyon III, the successful effort to place post-traumatic stress disorder (PTSD) in the Diagnostic and Statistical Manual Third Edition (DSM III) of the American Psychiatric Association, the building of the National Vietnam Veterans Memorial in Washington, D.C. despite fierce opposition, and the long-running controversy over the herbicide Agent Orange. In the last chapter, the author details the sociological thinking that informs his stories and develops the implications for understanding social movements in general and veterans' issues in particular.

US Defense Politics Harvey M. Sapolsky, Eugene Gholz, Caitlin Talmadge, 2020-12-30 This book provides an accessible overview of US defense politics for upper-level students. This new edition has been updated and revised with new material on the Trump Administration and Space Force. Analyzing the ways in which the United States prepares for war, the authors demonstrate how political and organizational interests determine US defense policy and warn against over-emphasis on planning, centralization, and technocracy. Designed to help students understand the practical side of American national security policy, the book examines the following key themes: US grand strategy, the roles of the president and the Congress in controlling the military, organizational interests, and civil-military relations, who
