**Public Policymaking in Hong Kong** Eliza W. Y. Lee, 2013 Why and how has civic engagement emerged in the policy process of Hong Kong as an Asian semi democratic state This book attempts to answer this question through examining six cases that straddle diverse policy domains It identifies three explanatory factors namely the profile of a policy domain the structure of societal interest and the strength of the civil society sector as important in shaping the state s strategy in managing society hence its propensity to engage These factors affect the outcome through dynamic interaction between the state and societal actors The findings outlined in the book show that the development of civic engagement in Hong Kong consists of both society led and state led cases Society led development brought about a high degree of openness and inclusiveness whereas state led civic engagement practices tended to be tactics utilized by the state for appeasing or depoliticizing civil society Compared with other Asian regimes the use of transgressive contention as a way to compel the state to engage society is a feature that stands out in the liberal autocratic regime in Hong Kong

**Civil Society, Conflict Resolution, and Democracy in Nigeria** Darren Kew, 2016-05-31 African nations have watched the recent civic dramas of the Arab Spring and Occupy Wall Street asking if they too will see similar civil society actions in their own countries Nigeria Africa s most populous nation has long enjoyed one of the continent s most vibrant civil society spheres which has been instrumental in political change Initially viewed as contributing to democracy s development however civil society groups have come under increased scrutiny by scholars and policymakers Do some civil society groups promote democracy more effectively than others And if so which ones and why By examining the structure organizational cultures and methods of more than one hundred Nigerian civil society groups Kew finds that the groups that best promote democratic development externally are themselves internally democratic Specifically the internally democratic civil society groups build more sustainable coalitions to resist authoritarian rule support and influence political parties more effectively articulate and promote public interests in a more negotiable fashion and most importantly inculcate democratic norms in their members which in turn has important democratizing impacts on national political cultures and institutions Further internally democratic groups are better able to resolve ethnic differences and ethnic based tensions than their undemocratically structured peers This book is a deeply comprehensive account of Nigerian civil society groups in the late twentieth and early twenty first centuries Kew blends democratic theory with conflict resolution methodologies to argue that the manner in which groups and states manage internal conflicts provides an important gauge as to how democratic their political cultures are The conclusions will allow donors and policymakers to make strategic decisions in their efforts to build a democratic society in Nigeria and other regions

Korea's Quest for Economic Democratization Youngmi Kim, 2017-09-06

This book studies the sources of inequality in contemporary South Korea and the social and political contention this engenders. Korean society is becoming more polarized. Demands for economic democratization and a fairer redistribution of wealth occupy centre stage of political campaigns, debates and discourse. The contributions offer perspectives on this wide ranging socio political change by examining the transformation of organized labour, civil society, the emergence of new cleavages in society and the growing ethnic diversity of Korea's population. Bringing together a team of scholars on Korea's transition and democratization, the story the book tells is one of a society acutely divided by the neo liberal policies that accompanied and followed the Asian financial crisis. Taken together, the contributions argue that tackling inequalities are challenges that Korean policy makers can no longer postpone. The solution, however, cannot be imposed once again from the top down but needs to arise from a broader conversation including all segments of Korean society. The book is intended for a readership interested in South Korean politics specifically and global experiences in transition more generally.

**Transforming Korean Politics** Young Whan Kihl, 2015-03-26 Over the past fifteen years South Korea has transformed itself from an authoritarian government into a new democracy with a vibrant capitalist economy. Modernization, democratization and globalization have played important roles in this transformation and have greatly influenced the programs and policies of Korea's Sixth Republic. Covering developments through the 2003 elections, this book shows how the South Korean government and society have been shaped not only by the dynamics of these forces but also by their interaction with the cultural norms of a post Confucian society. The author provides a conceptual framework and baseline for examining political developments in Korea and offers an analysis of the factors that are transforming Korean institutions, society and politics. He discusses the forces shaping Korea's political economy and the performance of successive ROK governments and also highlights the challenges faced by the newly elected administration of Roh Moo Huan, the North Korean issue and more.

**Civil Society and Democracy in Iran** Ramin Jahanbegloo, 2011-12-30 In this timely informative edited volume, major Iranian scholars and civic actors address some of the most pressing questions about Iranian civil society and the process of democratization in Iran. They describe the role of Iranian civil society in the process of transition to democracy in Iran and offer insight about the enduring legacy of previous social and political movements starting with the Constitutional Revolution of 1906 in the struggle for democracy in Iran. Each contributor looks at different aspects of Iranian civil society to address the complex nature of the political order in Iran and the possibilities for secularization and democratization of the Iranian government. Various contributors analyze the impact of religion on prevailing democratic thought, discussing reformist religious movements and thinkers and the demands of religious minorities. Others provide insight into the democratic implications of recent Iranian women's rights movements, call for secularism within government and the pressure placed on the existing theocracy by the working class. The contributors address these and related issues in all their richness and complexity and offer a set of discussions that is both accessible and illuminating for the reader. **The**

**Middle Class, Civil Society and Democracy in Asia** Hsin-Huang Michael Hsiao, 2018-07-18 This book offers a timely analysis of the tripartite links between the middle class, civil society and democratic experiences in Northeast and Southeast Asia. It aims to go beyond the two popular theoretical propositions in current democratic theory which emphasise the bilateral connections between the middle class and democracy on one hand and civil society and democracy on the other. Instead, using national case studies, this volume attempts to provide a new comparative typological interpretation of the triple relationship in Taiwan, South Korea, the Philippines, Indonesia and Thailand. Presenting a careful analysis and delineation of historical democratic transformation over the past thirty years, three discernible typologies emerge. Namely, there are positive links in Taiwan and South Korea, dubious links in the Philippines and Indonesia, and negative links in Thailand. **Middle Class Civil Society and Democracy in Asia** will be of interest to students and scholars of Asian politics and democracy.

**The Weakness of Civil Society in Post-Communist Europe** Marc Morjé Howard, 2003-03-27 Over a decade has passed since the collapse of communism, yet post-communist citizens are still far less likely to join voluntary organizations than people from other countries. Why do post-communist citizens mistrust public organizations? What explains this pattern of weak civil society? And what does this mean for democracy in the region? This engaging study addresses these questions with a provocative argument about the enduring impact of the communist experience on its countries and citizens. Howard argues that the experience of mandatory participation in state-controlled organizations and vibrant private networks during the communist period, combined with the disappointment with post-communist developments, have left most citizens with a lasting aversion to public activities. Howard analyzes the findings from over 30 democratic countries on the World Values Survey and also presents extensive and original evidence from his own research focused on Eastern Germany and Russia.
