Politics Of Ethnic Conflict Regulation Case Studies Of Protracted Ethnic Conflicts:

The Politics of Ethnic Conflict Regulation John McGarry, Brendan O'Leary, 1993 The Politics of Ethnic Conflict Regulation John McGarry, Brendan O'Leary, 2013-06-17 This major and timely collection addresses one of the world's most visible and tragic problems ethnic conflict and its regulation It begins with a guide to the primary methods used to eliminate or manage ethnic conflict and is followed by a global sample of case studies written by leading authorities in their fields

Routledge Handbook of Ethnic Conflict Karl Cordell, Stefan Wolff, 2010-10-18 A definitive global survey of the interaction of race ethnicity nationalism and politics this handbook blends theoretically grounded rigorous analysis with empirical illustrations to provide a state of the art overview of the contemporary debates on one of the most pervasive international security challenges today The contributors to this volume offer a 360 degree perspective on ethnic conflict from the theoretical foundations of nationalism and ethnicity to the causes and consequences of ethnic conflict and to the various strategies adopted in response to it Without privileging any specific explanation of why ethnic conflict happens at a specific place and time or why attempts at preventing or settling it might fail or succeed the Routledge Handbook of Ethnic Conflict enables readers to gain better insights into such defining moments in post Cold War international history as the disintegrations of the Soviet Union and Yugoslavia and their respective consequences and the genocide in Rwanda as well as the relative success of conflict settlement efforts in Northern Ireland Macedonia and Aceh By contributing to understanding the varied and multiple causes of ethnic conflicts and to learning from the successes and failures of its prevention and settlement the Handbook makes a powerful case that ethnic conflicts are neither unavoidable nor unresolvable but rather that they require careful analysis and thoughtful and measured responses *Handbook of Global Political Policy* Stuart Nagel, 2022-04-19 The latest in the six volume set of global policy handbooks this reference utilizes a cross national cross policy approach to examine the public policy of six different regions around the world Combining actual and theoretical perspectives the book compares and presents nonideological resolutions to current political conditions worldwide With contributions from over 30 international policy experts and academicians and containing over 1200 literature references tables and drawings the book is an insightful resource for public administrators and public policy experts political scientists economists sociologists attorneys and students in these disciplines Kosovo Divided Marius-Ionut Calu, 2020-04-02 Given the recent revival of nationalism in many parts of the world in tandem with new conflicts and forms of interventionism this book uses the case of Kosovo to discuss some of key problems around contemporary practices of state building Based on exhaustive research and fieldwork Marius Calu investigates how the management of plurality is a fundamental element of contemporary state building seeking to build social cohesion while for the new born Kosovo it stands as vital symbol for its domestic sovereignty and legitimisation With the aim of understanding why and in what ways the management of diversity has become a central element of state building in post conflict Kosovo this study juxtaposes the de jure multi ethnic liberal

democratic form of governance with the de facto results and consequences of Kosovo's task to protect, accommodate and integrate its ethnic minorities Rethinking Ethnicity Eric P. Kaufmann, 2004 Globalization and migration are pressuring nations around the world to change their ethnic self-definition and to treasure diversity not homogeneity This book explores the growing gap between modern nations and their dominant ethnic groups *Federalism, Plurinationality and Democratic Constitutionalism* Ferran Requejo, Miquel Caminal Badia, 2012-02-20 This book provides a theoretical and comparative analysis of federalism and federations in plurinational democracies examining how states with distinct peoples and communities coexist or not Through a theoretical approach to democracy and federalism and interdisciplinary analysis of plurinationality in state organization including case studies of the UK Russia Canada Belgium India Spain Switzerland and Bolivia this text assesses the possibilities and limits of federalism as a way to recognize and accommodate multinationalism in plurinational democracies It evaluates a range of strategies used by states to support national ethnic linguistic or religious collectives in present day liberal democracies Leading scholars in the field evaluate the institutional and practical repercussions regarding the issue of recognition and accommodation of national minorities in a globalised world through different theoretical perspectives to build up a detailed picture of problems and solutions to multinationalism Looking both within and beyond the state this is an invaluable examination of dilemmas and institutional challenges faced by many modern democracies *Federalism Plurinationality and Democratic Constitutionalism* will be of interest to students researchers and scholars of democracy nationalism federalism and constitutionalism **Secessionism and Separatism in Europe and Asia** Jean-Pierre Cabestan, Aleksandar Pavković, 2013 The boundaries between secessionism and separatism are often blurred and in many cases study of secessionism encompasses that of separatism and vice versa Recognising this inherent relationship this book provides a comparative survey of recent attempts at secession and separatist movements from across Europe and Asia and assesses the responses of the respective host governments The essays address two main questions which arise from the relationship between state governments and secessionist movements first how secessionist or separatist movements gather support and mobilize their target populations and second how central political authorities respond to the challenges that secessionist or separatist movements pose to their capacity to control the country With political analysis of recent cases ranging from the Balkans the USSR the UK and the Basque Country to Sri Lanka Burma China Tibet and Taiwan the authors identify both similarities and differences in the processes and outcomes of secessionist and separatist movements across the two distinct regions This volume will be an invaluable resource for those who wish to understand the dynamics of secessionist movements and as such will appeal to students and scholars of Asian and European politics comparative politics international relations and conflict studies It will also be helpful to practitioners and policy makers who wish to understand and contribute to the resolution of such conflicts Transnational Legal Processes Michael Likosky, 2002-04 This work comprises 24 linked essays by leading transatlantic scholars in international law and the social sciences examining the

sociolegal aspects of multi jurisdictional legal techniques and trans jurisdictional social phenomena The contributors bring a range of disciplinary expertises including anthropology economics law and sociology to bear on key questions raised by transnational legal processes The pieces explore legal developments in multiple territories including Africa Asia Latin America and the United States The volume is designed as a general reader for courses on law and globalisation and related studies The collection is made up of four parts each addressing a central theme in transnational law and legal action law making and compliance human rights commerce and governance The essays discuss such diverse problems as the role of foreign actors in the ethnic conflicts of Kosovo and Rwanda the power the United States and the UK wield over international capital markets and the adaptability of existing public international law to deal with the challenges wrought by globalisation

Lebanon after the Syrian Withdrawal Ohannes Geukjian, 2016-11-10 Lebanon experienced serious instability and ethno national conflict following the Syrian withdrawal in 2005 compounded by the Arab Spring which led to regional instability and civil war in Iraq and Syria Why did consociational democracy fail Was failure inevitable What impact could external powers play in creating an environment where consociationalism might be successfully implemented This book addresses these key questions and provides a comprehensive analysis of how internal and external elite relations influence the chances of a successful regulation of ethno national conflict through power sharing Exploring the roles played by Syria Qatar Iran Saudi Arabia the United States and France it argues that external actors in the Lebanese conflict largely determined whether power sharing was successfully established and shows that the consociational democratic model cannot provide long term conflict regulation in their absence The author argues that relationships between internal and external actors determine the prospects for successful conflict regulation and pinpoints the crucial role of the external forces in the creation of power sharing agreements in Lebanon concluding that future success is dependent on the maintenance of positive exogenous pressures This book will be of key interest to students and scholars studying politics international relations and Middle East studies

The Referendum and Other Essays on Constitutional Politics Matt Qvortrup, 2019-05-02 Until recently referendums were little used After the Scottish independence and Brexit referendums they have come to the fore as a mechanism with the potential to disrupt the status quo and radically change political direction This book looks at the historical development of the referendum its use in different jurisdictions and the types of constitutional questions it seeks to address Written in an engaging style the book offers a clear objective overview of this important political and constitutional tool

State Fragility, Business, and Economic Performance Belay Seyoum, 2024-01-02 The growing number of states with weak capacity to carry out basic governance functions is leading to unacceptable levels of human suffering Using Ethiopia as a case study this book acknowledges the multidimensional nature of state fragility and highlights the non political factors that drive it The first part uses institutional theory to explore how weak institutions become a source of state fragility by undermining social cohesion and the broader economic progress of countries Part two examines the role of

entrepreneurship and industrial policy as a means of creating and sustaining economic and political stability trade policy as a means of increasing incomes and easing tensions and technology policy as a means of engaging people in entrepreneurship and innovation The final chapter provides lessons that fragile nations can learn from successful developing countries in Southeast Asia and Latin America This book will appeal to researchers interested in international business economic and business policy international trade and emerging markets who seek to understand how fragile states can promote sustainable peace and development

Independence Movements and Their Aftermath Jon B. Alterman, Will Todman, 2018-11-23

This volume explores the varied outcomes that self determination movements around the world have achieved and in particular seeks to understand what factors promote better outcomes and what factors promote worse ones Rather than focusing on the metric of achieving independence the project evaluates the quality of societies after independence including such elements as economic strength and political resilience and it analyzes what factors contribute to different outcomes The study finds that the single most determinative factor in the success of any independence movement is frequently beyond the control of such a movement often relating to the global and historical contexts in which the movement finds itself However a whole host of factors are within the control of such a movement but movements do not always seek to act on many of them Activists become so convinced in the justness of the independence cause that they do not focus on actions that would contribute to greater success after independence

Power-Sharing and Consociational Theory Brigid Brooks

Kelly, 2019-03-25 Fifty years ago academics and policymakers throughout the world agreed that it was impossible for certain sets of historically antagonistic groups to coexist peacefully on a long term basis This book examines the system of consociation which was identified by Arend Lijphart and ended that pessimistic consensus Lijphart s specific observations concerning the impact of consociation are assessed quantitatively and qualitatively facilitated through careful operationalization of his descriptions of consociation s four components grand coalition minority veto proportionality and segmental autonomy Insights derived from a dataset representing the experiences of eighty eight countries are examined further through case study analysis of the seven societies most often discussed in relation to consociation Austria Belgium Canada the Netherlands Northern Ireland South Africa and Switzerland The components of consociation are found to promote lasting peace in divided societies most successfully when combined with additional incentives for the encouragement of cross cutting cleavages and shared loyalties

Iraqi Kurdistan in Middle Eastern Politics Alex

Danilovich, 2016-11-18 The changes brought by the Arab Spring and ensuing developments in the Middle East have made the Kurds an important force in the region Tel Aviv and Washington place high hopes on Erbil to facilitate their dealings with Baghdad Damascus Teheran and Ankara Kurds living in Turkey Syria and Iran have been inspired by the successes of their brethren in Iraq who managed to gain significant independence and make remarkable achievements in state building The idea of a greater Kurdistan is in the air This book focuses on how the Kurds have become a new and significant force in

Middle Eastern politics International expert contributors conceptualize current developments putting them into theoretical perspective helping us to better understand the potential role the Kurds could play in the Middle East **National Cultural Autonomy and Its Contemporary Critics** Ephraim Nimni,2005 This is a discussion and assessment of Karl Renner s theory of national cultural autonomy It includes the first English translation of Renner s State and Nation article and a commentary of his position by leading political theorists Nationalism John Hutchinson,Anthony D. Smith,2000 A comprehensive collection of articles on the subject of nationalism It covers concepts and definitions forms of nationalism worldwide and nationalism and culture and feminism and politics **Decentring the Indian Nation** Andrew Wyatt,John Zavos,2023-03-31 First published in 2003 Decentring the Indian Nation examines the various centrifugal forces apparent in recent Indian politics After achieving independence in 1947 India s elite opted to build a modern nation state This idea was carefully nurtured during the fight for freedom from British rule by the dominant Congress movement In recent years the idea of a centralised state has been challenged from a number of directions Strong regional political movements have questioned the assumption that India s federal system requires a dominant centre The related trend of identity based mobilisation has challenged settled notions of Indian national identity The authors discuss the idea that as a nation India is becoming decentred and consider the implications of this idea for the development of the Indian polity This book will be of interest to students of politics geography and development **The Social Philosophy of Ernest Gellner** ,2023-12-28

Possibility of Politics in India Akshat Jain,2025-09-01 This book is an attempt to find new ways of inter disciplinary theorisation about this moment when both the unitary idea of the Indian nation and the bureaucratic dream of a centralised Indian state are falling apart At this juncture the Indian state has two choices Either it can recognise the political nature of the struggles confronting it and radically re imagine itself or it can wage a losing war against the democratic aspirations of people It is essential that political movements in the subcontinent let go of their differences and organise together to agitate for modernisation By bringing these disparate struggles together this book explores the possibility of an alliance between them such that they are able to inform each other against a colonial state Taken together this book is thus an experiment in politics rather than being about specific events The chapters in this book were originally published in various Taylor Francis journals
