epiloque Strategic Studies and World Order Bradley S. Klein, 1994-05-05 In this 1994 book Bradley Klein draws upon debates in international relations theory to raise important questions about the nature of strategic studies He argues that post modern critiques of realism and neorealism open up opportunities for new ways of thinking about nuclear deterrence In clear and uncluttered language he explores the links between modernity state building and strategic violence and argues that American foreign policy and NATO undertook a set of dynamic political practices intended to make and remake world order in the image of Western identity Klein warns against too facile a celebration of the end of the Cold War concluding that it is even more imperative today to appreciate the scope and power of the Western strategic project The book will be of interest to students of international relations theory strategic studies peace studies and US foreign policy **Black French Women** and the Struggle for Equality, 1848-2016 Félix Germain, Silvane Larcher, 2018-10-01 Black French Women and the Struggle for Equality 1848 2016 explores how black women in France itself the French Caribbean Gor e Dakar Rufisque and Saint Louis experienced and reacted to French colonialism and how gendered readings of colonization decolonization and social movements cast new light on the history of French colonization and of black France In addition to delineating the powerful contributions of black French women in the struggle for equality contributors also look at the experiences of African American women in Paris and in so doing integrate into colonial and postcolonial conversations the strategies black women have engaged in negotiating gender and race relations la fran aise Drawing on research by scholars from different disciplinary backgrounds and countries this collection offers a fresh multidimensional perspective on race class and gender relations in France and its former colonies exploring how black women have negotiated the boundaries of patriarchy and racism from their emancipation from slavery to the second decade of the twenty first century **Germany and European Order** Adrian Hyde-Price, 2000 Established in the belief that imperialism as a cultural phenomenon had as significant an effect on the dominant as it did on the subordinate societies the Studies in Imperialism series seeks to develop the new socio cultural approach which has emerged through cross disciplinary work on popular culture media studies art history the study of education and religion sports history and children's literature. The cultural emphasis embraces studies of migration and race while the older political and constitutional economic and military concerns are never far away It incorporates comparative work on European and American empire building with the chronological focus primarily though not exclusively on the 19th and 20th centuries when these cultural exchanges were most powerfully at work This work explores the sexual attitudes and activities of those who ran the British Empire The study explains the pervasive importance of sexuality in the Victorian Empire both for individuals and as a general dynamic in the working of the system Among the topics included in the book are prostitution the manners and mores of missionaries and aspects of race in sexual behaviour Labour and **Political Transformation in Russia and Ukraine** Rick Simon, 2019-05-24 This title was first published in 2000 The years 1975 to 2000 are characterized by fundamental changes in the global political landscape Perhaps the biggest change was the

collapse of certain communist regimes This text analyzes what that meant for the USSR and Europe It looks at the cause of change the social forces behind them and future prospects The Last Decade of the Cold War Olav Njølstad, 2004 The last decade of the Cold War witnessed the transformation of world politics with the collapse of one party Communist rule in Eastern Europe and the Soviet Union This book explains how it happened and why After the Cold War Arthur I. Cyr,2000-08 The end of the Cold War provides challenges and opportunities for American foreign policy leadership that arguably have been equalled in modern times only by the period in which the Cold War began NATO at 40 years: a critical assessment. .1989 The French Defence Debate R. Utley, 2000-08-22 The French Defence Debate examines assertions of consensus and continuity in and surrounding France's defence since 1958 with primary reference to the political career of Fran ois Mitterrand Mitterrand s influence over defence and security before and after his election to the presidency is often underestimated Nonetheless his impact was substantial if ultimately for his lack of concern to preserve consensus and his reluctance to instigate necessary changes in France's defence despite the end of the Cold War and the military deficiencies and limitations of national independence it exposed Why Movements Matter Steve Breyman, 2001-07-12 Details the West German peace movement s impact on German U S and NATO politics and security Military Objectives in Soviet Foreign Policy Michael MccGwire, 2010-12-01 This study dynamics in the 1980s concentrates on the military roots of Soviet policy It concentrates on how planning for the contingency of a world war shapes and distorts Soviet policy while producing a military posture and structure of forces that appear to the West as being far in excess of any legitimate defense needs The focus is on the military technical aspects of doctrine which is the responsibility of the military to implement The study does not dwell on the decisions that the Soviet political leaders would face in the course of a war except to note how the hierarchy of objectives would influence those decisions One Hundred Years of Socialism Donald Sassoon, 2010-07-30 On 14 July 1889 the centenary of the French Revolution socialist parties from all corners of Europe met in Paris On the same day in the same city the Exposition Universelle was launched to mark the achievements of capitalist production The two events symbolized the beginning of the epic struggle between socialism and capitalism in Europe In this comprehensive study of a century of socialism the author traces the fortunes of the political parties of the Left in Western Europe From the rise of the Bolsheviks to the fall of the Berlin wall from the Second International through two world wars to the Cold War and the birth of the welfare state from the working class militancy and student uprisings of the 1960s through the revival of feminism and the arrival of green politics to the reluctant embrace of market economics en route to the millennium Donald Sassoon charts the course of socialism across 14 countries He shows that throughout their history the fortunes of socialism and capitalism have been inextricably linked. They have grown up side by side each one challenging and seeking to destroy yet nourishing and shaping the other NATO at 40 Years, 1989 The National Interest in Question Christopher Hill, 2013-08-22 For three decades multiculturalism has been the focus of fierce debates

At the same time Europeans have worried at the national level and at that of the European Union about how to relate to a world in which their influence has been steadily reducing But the two discussions on society and on foreign policy have rarely intersected The events of 11 September 2001 did shock the citizens of Western countries into an awareness that international politics could literally explode onto their home streets and generated fear and suspicion about and among minority groups But the excessive focus on terrorism and on Islam which followed hardly did justice to the deeper processes of transnationally induced change which were at work This book attempts to go beyond the emotive political debate to show how foreign policy and domestic society have been becoming more entangled with each other for some time It focuses on the more established Member States of the European Union and the varying paths which they have taken in coping with the new domestic environment fostered by increased migration ethnocultural diversity and transnational relations It investigates the contrasting approaches taken by the European states to what is loosely called multiculturalism and analyses their impact on the interplay between foreign policy and domestic society something which is now a structural feature of political life It concludes with the argument that since domestic society is now taking on some of the diversity associated with international relations governments can no longer assume a national consensus in their relations with the outside world let alone the steady homogenisation of world society Toward Nuclear Abolition Lawrence S. Wittner, 1993 The final volume in the trilogy The Struggle Against the Bomb this book presents the inspiring and dramatic story of how citizen activists helped curb the arms race and prevent nuclear war North Atlantic Treaty Organization Phil Williams, 2024-11-01 This volume consists of major books written in the English language on NATO as well as an extensive listing of journal articles that deal with various aspects of the Alliance All the major debates that have taken place over the last forty years are discussed

Reagan and the World David E. Kyvig,1990-05-18 Essays by seven historians John Lewis Gaddis argues that Reagan s record of dealing with the Soviets is equal or superior to that of Nixon and Kissinger Akira Iriye praises the administration for improving relations with Japan but the essays on Western Europe the Middle East Africa and Central America range from tempered to slashing criticism A consensus on the foreign policy of the Reagan years will be a long time in coming Foreign Affairs The final curtain having fallen on the administration of the first actor president historians are now faced with the formidable task of assessing the foreign relations of the Reagan presidency and placing them into a larger historical context The task of appraising Ronald Reagan as foreign policymaker is difficult because it involves making sense of his apparent inconsistencies This collection of essays represents the attempts at such an assessment by six distinguished historians of international stature The contributors address U S relations with the Soviet Union East Asia Latin America the Middle East Western Europe and Africa They differ markedly in their appraisals John Lewis Gaddis asserts that Reagan s Soviet policy was not only successful but was rationally determined and pursued from the outset of his administration Akira Iriye finds much to admire in the Reagan administration s relations with East Asia particularly with respect to economic diplomacy In

contrast Geir Lundestad is far less complimentary about Reagan's relations with Western Europe and the three scholars who deal with the less developed areas of the globe offer generally negative appraisals of Reagan's record Philip S Khoury argues that the administration further inflamed the volatile Middle East Susanne Jonas finds Reagan's Central America policy ultimately destructive of U S interests in the region and Robert Rotberg concludes that Reagan's administrators allowed Africa's fundamental racial conflicts and economic difficulties to fester Together these six scholars draw an overall picture of the U S government more consistent in its regional preoccupations than in its ideology Many aspects of Reagan's foreign relations will require further investigation before they are clear For the moment however this volume offers a sound first historical evaluation of the Reagan administration's foreign relations. It will appeal to historians political scientists specialists in international relations and general readers interested in the United States and the world in the 1980s
