Politics Of Improving Urban Air Quality:

The Politics of Improving Urban Air Quality Wyn Grant, Anthony Perl, Peter Knoepfel, 1999 Improving urban air quality has become a policy priority for the European Union national governments and city authorities as more evidence comes to light of the harmful health effects of road traffic pollution This book clearly illustrates how to work towards effective policies for improved urban air quality The authors argue that designing and implementing successful policies is not just a matter of deciding on the most appropriate technological solutions A process of institution building has to take place which works towards consensus among a variety of potentially divergent interests from the police and highway authorities to business interests and citizens Making use of policy network theory this volume presents studies of attempts to build such coalitions and the factors that have often frustrated them in countries such as Canada France Italy and Switzerland This book provides a major contribution to the theoretical and empirical understanding of the policies needed to combat road traffic pollution The Politics of Improving Urban Air Quality will prove invaluable to scholars of environmental studies and public policy

Environmental Policy Analyses Peter Knoepfel, 2007-10-05 Having had the opportunity of receiving considerable public money mainly from the Swiss National Science Foundation for numerous environmental policy studies in Switzerland and abroad during the last 25 years I have decided to put the results published mainly in German and French but also in English in many scientific journals monographs and book sections in a single book on behalf of my students younger scholars interested in policy analysis dating from the period of the first environmental policies and my friends teaching this subject in Switzerland and abroad The criteria used to select the fifteen contributions were their impact on the scientific debate at the time of their publication their validity for present conceptualizations of policy analysis in the field of the environment and their contribution to the development of policy analysis as a whole Moreover the selected contributions mainly focus on empirical applications in the field of environmental policies or the interface between environmental and non environmental policies Some have led to concrete policy recommendations of which most have been partly implemented since at least within my own country This research also sometimes addressed regional political administrative arrangements leading to administrative reforms and new strategic directions of implementing agencies

Urban Air Quality Management Masami Kojima, Magda Lovei, 2001-01-01 This book details the context within which policy decisions and objectives for the property tax system are made in the transitional economies of Central and Eastern Europe It shows how these policy decisions evolve as a part of the transitional reforms still in process This book offers the chance to review the experiences of transitional countries in initiating and implementing fiscal instruments during a decade of enormous transformations The research for the case studies included in this book was sponsored by the Lincoln Institute of Land Policy
