Politics Of Industrial Restructuring Canadian Textiles:

The Politics of Industrial Restructuring Rianne Mahon, 1984 **Social Consequences of Economic Restructuring in the Textile Industry** Cynthia D. Anderson, 2014-02-04 This book analyzes the dramatic social impacts of global economic restructuring in the US textile industry and the consequences for Southern textile mill communities With the expansion of markets in the global economy government policies such as NAFTA and GATT are greatly affecting the domestic production of textiles Increased global competitiveness has led to technological modernization plant shutdowns and downward pressure on wages Many family owned companies are merging into conglomerates some of which are international Concurrently the structure of power and domination in Southern textile communities is changing Paternalistic control typically portrayed as a form of traditional authority and benevolent protection of workers is no longer dominant With the decreased need for skilled labor textile company owners are not obligated to provide mill villages with housing electricity and water Formerly protected communities are now players on an international scale with workers competing for jobs on a global level New forms of class exploitation racism and sexism provide a contested terrain for mill employees As the industry restructures workers and their households are faced with new challenges To understand these social impacts I examine globalization restructuring and spatialization as processes embedded in multiple layers of reality The multi level analysis focuses on the Southern textile industry a leading firm its surrounding labor market area and members of the community Historical statistical and qualitative interviewing methods yield data that demonstrate redefined labor markets reconstituted race relations and household adaptations Changes in firm and industry impact shop floor labor processes including increased production pace new management strategies and technological adjustments As embedded layers of social relations the multi level outcomes are both negative and positive creating new winners and losers in Southern communities *The State, Business, and Industrial Change in Canada* Michael M. Atkinson, William D. Coleman, 1989-12-15 The late twentieth century has seen profound changes in the character of the international economic order According to the authors of this study Canada has failed to come to terms with those changes Our industrial policy is diffuse ad hoc and sectoral Michael Atkinson and William Coleman argue that in order to analyse Canada's industrial policy effectively particular attention must be given to industry organization state structures and systems of interest intermediation at the sectoral level To make such an analysis they introduce the concept of policy network and apply it to three types of industrial sectors the research intensive sectors of telecommunications manufacturing and pharmaceuticals the rapidly changing sectors of petrochemicals and meat processing and the contracting and troubled sectors of textiles clothing and dairy processing Through the lens of these sectors Coleman and Atkinson shed considerable light on the intersection of political considerations and policy development and offer a new base on which to move forward in planning for economic growth Group Politics and Social Movements in Canada Miriam Smith, 2014-01-01 Group Politics and Social Movements in Canada Second Edition updates and expands its exploration of a

wide range of organized group and social movement activity in Canadian politics. Particularly distinctive is the inclusion of Quebec nationalism and Aboriginal politics. Many other areas of collective activity are also included: the Occupy movement and anti-poverty organizing, ethnocultural political mobilization, disability, lesbian and gay politics, feminism, farmers and organized interests in agriculture, Christian evangelical groups, environment and health movements. Contributors to the collection employ a number of theoretical perspectives from political science and sociology to describe the evolution of organized groups and movements and to evaluate successes in exercising influence on Canadian politics. Each chapter provides an overview of the group or movement along with an account of its main networks and organizations, strategies, goals, successes and failures.

Politics and Ideology in Canada Michael Ornstein, Michael Stevenson, 2003-02-18. Winner of the Harold Adams Innis Prize. *Politics and Ideology in Canada* examines a period of crucial historical change in Canada beginning in the mid 1970s when the crisis of the Keynesian welfare state precipitated a transition to a new political order based on the progressive downsizing of state involvement in the economy and society. Using class and ideology as key concepts, Michael Ornstein and Michael Stevenson examine this transition in terms of the nature of hegemony and hegemonic crisis and the conditions of political order and instability. These concepts guide the interpretation of three large surveys of representative samples of the Canadian public and two unique elite surveys conducted between 1975 and 1981. The surveys cover an exceptionally broad spectrum of political issues including social programs, civil and economic rights, economic policy, foreign ownership, labour relations and language issues and sovereignty. A wide-ranging analysis of public and elite attitudes reveals a hegemonic order through the early 1980s built around public support for the institutions of the Canadian welfare state. But there was also widespread public alienation from politics. Public opinion was quite strongly linked to class but not to party politics. Regional variation in political ideology on a broad range of issues was less pronounced than differences between Quebec and English Canada. Much deeper ideological divisions separated the elites with a dramatic polarization between corporate and labour respondents. State elites fell between these two though generally more favourable to capital. The responses of the business elites reveal the ideological roots of the Mulroney years in support for cuts in social programs, free trade, privatization and deregulation.

New Canadian Political Economy Wallace Clement, Glen Williams, 1989. Studies in political economy are now at a crossroads. The revival of political economy as an important area of research in Canada began in the early 1970s with the publication of Kari Levitt's *Silent Surrender*. In 1976 it was launched in earnest by the first session on Canadian political economy at the meetings of the Canadian Learned Societies in Quebec City. While many academics now classify themselves as political economists, not until *The New Canadian Political Economy* has there been any attempt to systematically survey, review and assess the scores of books and articles which can now be considered as belonging in this field.

Canadian Foreign Policy and International Economic Regimes A. Claire Cutler, 2011-11-01 As the world economy is becoming increasingly global in nature the future of Canada's welfare will directly depend on the country's response and reaction to a wide range of economic regimes which govern the international economy This volume is an important and timely analysis of past and current Canadian policies toward both the formal and less formal arrangements which regulate such areas as international trade and financial transactions international service industries fisheries resources and the environment Often influenced by domestic political concerns and its relations with the United States Canada has as the authors point out exhibited a high degree of variation in its responses to these regimes Canadian Foreign Policy and International Economic Regimes addresses a broad range of foreign economic policies not generally considered in the foreign policy literature Interdisciplinary in its approach it will be of interest to those in political science and public policy economics and law as well as to those involved in international business

The Paradox of Continental Production Barbara Jenkins, 2018-09-05 Should national governments regulate foreign investment The question is hotly contested in today's international trade debates Barbara Jenkins here addresses this complex issue in a timely account of market relationships among North American nations Jenkins provides up to date detailed analyses of foreign investment regulations and policies in Canada Mexico and the United States She identifies inherent contradictions in the general tactic that all three countries have pursued simply relying on the pressures of the market rather than planning active strategy and she assesses the likely effects on foreign investment of the recently concluded Canada U S Free Trade Agreement and the potential North American free trade agreement Free trade and the absence of adjustment policy she argues expose key political actors such as business and labor too broadly to market forces The result is a projectionist reaction on the part of these domestic actors which ultimately defeats efforts to liberalize trade and investment relations In current approaches to foreign investment regulation Jenkins detects divergent trends among the three countries while Ottawa and Mexico City continue to liberalize their investment strategies Washington is growing more interventionist She shows however that the interventionism of the United States reflects a nationalistic trend rather than a commitment to a coherent strategy Cautioning that the conclusion of a North American free trade agreement will only exacerbate the inadequacies of current policies Jenkins concludes by offering recommendations for future action The Paradox of Continental Production will be stimulating reading for policymakers political economists and other observers of Canadian Mexican and U S politics

Women's Organizing and Public Policy in Canada and Sweden Linda Briskin, Mona Eliasson, 1999-10-25 Women's Organizing and Public Policy in Canada and Sweden highlights the impact of women's organizing on the framing and implementing of public policy the

reconstituting of discourse and the practices of unions political parties and the state It examines the strategies women have used to organize themselves as a vocal and politicized constituency In so doing it stretches definitions of organizing and of political practice politicizes the social and the private and expands conceptions of agency Comparing Sweden and Canada allows the mechanisms at work in each society to emerge more clearly challenging what is often taken for granted
