Politics Of Insecurity:

The Politics of Insecurity Jef Huysmans, 2006-09-27 The act of violence of 9 11 changed the global security agenda catapulting terrorism to the top of the agenda Weapons of mass destruction grabbed public interest and controlling the free movement of people became a national security priority In this volume Jef Huysmans critically engages with theoretical developments in international relations and security studies to develop a conceptual framework for studying security He argues that security policies and responses do not appear out of the blue but are part of a continuous and gradual process pre structured by previous developments He examines this process of securitization and explores how an issue on the basis of the distribution and administration of fear becomes a security policy Huysmans then applies this theory to provide a detailed analysis of migration asylum and refuge in the European Union This theoretically sophisticated yet accessible volume makes an important contribution to the study of security migration and European politics

America and the Politics of Insecurity Andrew Rojecki, 2016-06-15 An innovative analysis of polarized politics post 9 11 In *America and the Politics of Insecurity* Andrew Rojecki assesses the response of citizens and politicians to a series of crises that confronted the United States during the first decade of the twenty first century This period brought Americans face to face with extraordinarily difficult problems that were compounded by their origin in seemingly uncontrollable global forces Rojecki establishes a theoretical framework for understanding how these new uncertainties contribute to increasingly polarized political discourse Analyzing three domains of American insecurity economic environmental and existential Rojecki examines responses to the Great Recession by groups like the Tea Party and Occupy Wall Street considers why the growing demand for fossil fuels makes people disregard global warming and explores the desire for security measures that restrict personal freedom in the age of terrorism Ultimately he explains why the right has thus far held an edge over the left in the politics of insecurity Rojecki concludes that in order to address these broad scale political problems we must reframe domestic issues as reactions to undiagnosed global conditions Bringing the psychology of uncertainty together with contemporary case studies this book is a sweeping diagnostic for and antidote to ineffective political discourse in a globalized world that imports bads as well as goods

Who Gets What? Frances McCall Rosenbluth, Margaret Weir, 2021-07-29 The authors of this timely book *Who Gets What* harness the expertise from across the social sciences to show how skyrocketing inequality and social dislocation are fracturing the stable political identities and alliances of the postwar era across advanced democracies Drawing on extensive evidence from the United States and Europe with a focus especially on the United States the authors examine how economics and politics are closely entwined Chapters demonstrate how the new divisions that separate people and places and fragment political parties hinder a fairer distribution of resources and opportunities They show how employment education sex and gender and race and ethnicity affect the way people experience and interpret inequality and economic anxieties Populist politics have addressed these emerging insecurities by deepening social and political divisions rather than promoting broad

and inclusive policies **Critical Security and Chinese Politics** Juha A. Vuori, 2014-10-24 This book examines how critical approaches to security developed in Europe can be used to investigate a Chinese security issue the case of the Falungong. The past few decades have produced a rich field of theoretical approaches to security in Europe. In this book the security specific notions of securitization, the politics of insecurity and emancipation are used as analytical approaches to investigate the anti Falungong campaign in the People's Republic of China. This campaign launched in 1999 was the largest security related propaganda campaign since 1989 and was directed against a group of qigong practitioners who were presented as a grave threat to society. The campaign had major impacts as new security legislation was established and human rights organizations reported severe mistreatment of practitioners. This book approaches one empirical case with three approaches in order to transcend the tendency to pit one approach against another. It shows how they highlight different aspects in investigation and how they can be combined to gain more comprehensive insights and thereby invigorate renewed debate in the field. Furthermore, this is used as a vehicle to discuss more general philosophical issues of theory development and theory development and will assist students to comprehend the effects research framework selection has on a piece of research. Such discussions are necessary in order to apply the frameworks in investigations that go beyond the socio-political context they were originally developed in. This book will be of interest to students of critical security studies, Chinese politics, research methods and IR in general.

Security, Emancipation and the Politics of Health Joao Nunes, 2013-10-01 This book develops a new theoretical framework for the study of security issues and applies this to the case of health. Building on the work of the Welsh School of Security Studies and drawing on contributions from the wider critical security literature, the book provides an emancipatory perspective on the health security nexus, one which simultaneously teases out its underlying political assumptions, assesses its political effects and identifies potential for transformation. *Security, Emancipation and the Politics of Health* challenges conventional wisdom in the field of health and international politics by conceiving of health as a fundamentally political issue and not merely as a medical problem demanding technical solutions and arrangements. The book shows how political processes of representation underpin notions of health and disease through an examination of three key areas: the linkages between immigration and the fear of disease, colonial medicine and the health as a bridge for peace literature. In order to successfully carry out this political investigation of health, the book develops an innovative theoretical framework inspired by the idea of security as emancipation, which goes beyond the existing emancipatory literature in security studies. This book will be of much interest to students of critical security studies, health politics, sociology and IR in general.

Ontological Insecurities and the Politics of Contemporary Populism Brent J. Steele, Alexandra Homolar, 2023-05-31 This book explores contemporary populist politics through the lens of

ontological security theory It shows that the divisionary politics of populism is fostered by narratives of crisis and insecurity surrounding the imagined Self that gives shape to the people that populism claims to represent The loss of faith in mainstream political parties and moderate electoral candidates seems characteristic of the Zeitgeist in much of the Western world and beyond Politicians and agendas propped up by a discourse that antagonizes established political elites on behalf of a reified and homogenized people has become a trend in the politics of several countries This book has brought together a team of worldwide renowned specialists on ontological security to grapple with the contemporary populist challenge through the conceptual lens of ontological security theory From crises of democracy in the West to backlashes against democratization in the Global South this collection not only unveils fundamental structures underpinning these significant and current phenomena It also provides us with the analytical tools to understand other occurrences of populist politics that are gaining traction across the globe This book will be of great interest to upper level students researchers and academics in Politics International Relations and Security The chapters in this book were originally published as a special issue of Cambridge Review of International Affairs The Politics of Protection Jef Huysmans, Andrew Dobson, Raia Prokhovnik, 2006-05-17 This new book shows how from the end of the Cold War the security agenda has been transformed and redefined academically and politically It focuses on the theme of protection It moves away from the dominant question of whom or what is threatening to the crucial questions of who is to be protected and in the case of conflicting claims who has the capacity to define whose needs prevail It also poses the question of political agency in relation to some of the most significant questions raised in relation to the governance of insecurity and protection in the contemporary world The authors identify and explore issues that challenge or raise a number of questions about the traditional notion that states are to protect their citizens through retaining a monopoly over the legitimate use of violence *Healing Politics* Abdul El-Sayed, 2020-03-31 A memoir about restoring the health of our people and our democracy from a physician and one of the brightest young stars of the progressive movement Sen Bernie Sanders A child of immigrants Abdul El Sayed grew up feeling a responsibility to help others He threw himself into the study of medicine and excelled winning a Rhodes Scholarship earning two advanced degrees and landing a tenure track position at Columbia University At thirty he became the youngest city health official in America tasked with rebuilding Detroit's health department after years of austerity policies But El Sayed found himself disillusioned He could heal the sick even build healthier safer communities but that wouldn't address the social and economic conditions causing illness in the first place So he left health for politics running for Governor of Michigan and earning the support of progressive champions like Congresswoman Alexandria Ocasio Cortez and Senator Bernie Sanders This memoir traces the life of a young idealist weaving together powerful personal stories and fascinating forays into history and science Marrying his unique perspective with the science of epidemiology El Sayed diagnoses an underlying epidemic afflicting our country an epidemic of insecurity And to heal the rifts this epidemic has created he lays

out a new direction for the progressive movement This is a bold personal and compellingly original book from a prominent young leader In *Healing Politics* Abdul El Sayed doesn't just diagnose the causes of our broken politics he gives us a prescription and treatment plan Representative Pramila Jayapal

Unequal Security Peter Starke,Laust Lund Elbek,Georg Wenzelburger,2024-09-30 We live in an age of insecurity The Global Financial Crisis the Covid 19 pandemic the wars in Ukraine and Gaza and the climate crisis are just the most evident examples of shocks that have increased the level of insecurity among elites and citizens in recent years And yet there is ample evidence that insecurity is not equally distributed across populations Bringing together disciplines such as political science criminology sociology and anthropology and combining quantitative and qualitative studies from a wide range of rich and middle income countries this collection presents a new framework for exploring the two key social challenges of our times insecurity and inequality together The volume analyses the nature causes and distribution of subjective insecurities and how various actors use or respond to unequal security The essays cover a host of themes including the unequal spatial distribution of in security unequal access to security provision in relation to crime and welfare the impact of insecurity on political attitudes as well as policy responses and the political exploitation of insecurity An important contribution to debates across several social scientific disciplines as well as current public debate on insecurity and politics the volume will be of great interest to scholars and researchers of criminology social policy peace and conflict studies politics and international relations sociology development studies and economics It will also be of interest to policymakers and government think tanks

Politics of Anxiety Emmy Eklundh,Andreja Zevnik,Emmanuel-Pierre Guittet,2017-04-26 From the threats posed by austerity and the fears around global migration to the unsettled notion of resistance our political world is permeated with anxieties But what does this mean for our everyday lived political experience Do governments provoke or encourage a sense of anxiety as a form of control and power How do citizens react to comply with or resist this sense of anxiety This book interrogates the different faces of anxiety and provides a systematic engagement with its different manifestations It uses different disciplinary approaches and methodologies to study political and social phenomena in order to paint a picture of the impact of anxiety and how it governs and mobilises individuals The key strength of these contributions comes from their theoretically informed analysis of empirical problems Moving beyond the concept of the risk society and the recurrence of cyclical capitalist crises this book challenges the notion of the status quo to consider urges and desires for political change By highlighting that anxiety is different from fear the book examines new implications for the study of political events

Introduction to Politics Robert Garner,Peter Ferdinand,Stephanie Lawson,2023 The only introductory textbook to bring together theory comparative politics and international relations to provide the most comprehensive and global introduction to politics available

Politics of Security Michael Dillon,2002-01-31 In this critique of security studies with insights into the thinking of Heidegger Foucault Derrida Levinas and Arendt Michael Dillon contributes to the rethinking of some of the fundamentals of international politics

developing what might be called a political philosophy of continental thought Drawing on the work of Martin Heidegger Politics of Security establishes the relationship between Heidegger's radical hermeneutical phenomenology and politics and the fundamental link between politics the tragic and the ethical It breaks new ground by providing an etymology of security tracing the word back to the Greek *asphaleia* not to trip up or fall down and a unique political reading of Oedipus Rex Michael Dillon traces the roots of desire for security to the metaphysical desire for certitude and points out that our way of seeking that security is embedded in 20th century technology thus resulting in a global crisis Politics of Security will be invaluable to both political theorists and philosophers and to anyone concerned with international relations continental philosophy or the work of Martin Heidegger

Environment, Politics and Society Ram Alagan, Seela

Aladuwa, 2018-05-18 Human activities and decision making have enormous impacts on the environment This volume engages in critical conversations on these issues and how their interconnectedness and outcomes shape the natural environment and human activity

Narrative and the Politics of Identity Phillip L. Hammack, 2011 Since the late nineteenth century Jews and Arabs have been locked in an intractable battle for national recognition in a land of tremendous historical and geopolitical significance While historians and political scientists have long analyzed the dynamics of this bitter conflict rarely has an archeology of the mind of those who reside within the matrix of conflict been attempted This book not only offers a psychological analysis of the consequences of conflict for the psyche it develops an innovative compelling and cross disciplinary argument about the mutual constitution of culture and mind through the process of life story construction But the book pushes boundaries further through an analysis of two peace education programs designed to fundamentally alter the nature of young Israeli and Palestinian life stories Hammack argues that these popular interventions rooted in the idea of prejudice reduction through contact and the cultivation of cosmopolitan identities are fundamentally flawed due to their refusal to deal with the actual political reality of young Israeli and Palestinian lives and their attempt to construct an alternative narrative of great hope but little resonance for Israelis and Palestinians Grounded in over a century of literature that spans the social sciences Hammack's analysis of young Israeli and Palestinian lives captures the complex dynamic relationship among politics history and identity and offers a provocative and audacious proposal for psychology and peace education

Gender Politics and Security Discourse Laura McLeod, 2015-07-16 This book investigates competing modes of thought about gender security and aims to understand the policy implications of personal political imaginations The work draws upon extensive research conducted by the author in Serbia to develop a comprehensive picture of how feminist and women s organising relates to the broader national and international contexts surrounding gender security Through an innovative analytical framework of personal political imaginations the book explores the role that memories perceptions and hopes about conflict and post conflict have upon the logics of gender security It investigates how contrasting and competing modes of thought about gender security are made paying attention to how the dynamics of gender politics in Serbia shape the security discourse and narratives of activists The volume explores in detail how feminist and women s organisations have responded to UNSCR 1325 by analysing two policy debates and campaigns that seek to achieve its goals and gender security in Serbia 1 feminist antimilitarism and 2 connecting domestic violence to the abuse of small arms and light weapons Ultimately the book argues that the configuration of gender security discourse is intimately linked to personal political imaginations of conflict and post conflict This book will be of much interest to students of gender politics conflict studies critical security studies European politics and IR in general

The Politics of Food Provisioning in Colombia Felipe Roa-Clavijo, 2021-10-27 This book explores food provisioning in Colombia by examining the role and impact of the agrarian negotiations which took place in the aftermath of the 2013 2014 national strikes Most of the research in the field of agrarian studies in Colombia has focused on inequalities in land distribution the impacts of violent conflict and most recently the first phase of the peace agreement implementation This book links and complements these literatures by critically engaging with an original framework that uncovers the conflicts and politics of food provisioning who produces what and where and with what socio economic effects This analytical lens is used to explain the re emergence of national agrarian movements their contestation of the dominant development narratives and their engagement in discussions about food sovereignty with the state The analysis incorporates a wide range of voices from high level government representatives and leaders from national

agrarian movements Their narratives of food provisioning and the broader role of the food industry are reviewed and the key findings show an underlying conflict within food provisioning based on the struggle of marginalised smallholders to develop alternative agri food systems that can be included in the local and domestic food markets in the context of a state dominated by an export and import approach Overall the book argues that the battle ground of agrarian conflicts has moved to the field of food provisioning and using this approach has the potential to reframe the debate about the future of food and agriculture in Colombia and beyond This book will be of great interest to students and scholars of food and agriculture rural development peasant studies and Latin American Studies
