Murphy, 2023-12-31 World history suffers from a paucity of clearly articulated convincing explanations While the rise of postmodernism and challenges to Eurocentrism did lead to some important correctives the pendulum has swung too far the other direction with a corresponding danger of throwing the baby out with the bathwater We need careful theoretically informed debates about ways of organizing world history What constitutes a good historical explanation What should guide

historians to choose relevant facts Which theoretical schools could be made useful and to what ends These questions are especially relevant to the main topic of this book the great divergence between the west and the rest of the world and how this historical rupture is to be explained The book provides extensive critical analyses of some of the key claims in world history analyzing their strengths as well as their major weaknesses too often rooted in insufficient familiarity of historians with theories they discard It also historicizes the field and the debates to partly account for what caused some theories to become more influential and others to fall into oblivion despite the fact that the more influential frameworks are seriously flawed and some of the more marginalized ideas are more coherent and plausible The book offers insights regarding the theoretical and political relevance of older debates about the transition to capitalism and historical materialism Three major schools of thought in world history are critically examined through an in depth theoretical and comparative analysis that has not been undertaken elsewhere the so called California School World Systems Analysis and Marxist theories of history capitalism and the transition from feudalism to capitalism Murphy argues that despite some of the more recent criticisms of older approaches to world history the older theories remain indispensable for the writing of world history and for coming to terms with issues of global poverty inequality and eco catastrophe

Meyer Schapiro's Critical Debates C. Oliver O'Donnell, 2019-10-14 Described in the New York Times as the greatest art historian America ever produced Meyer Schapiro was both a close friend to many of the famous artists of his generation and a scholar who engaged in public debate with some of the major intellectuals of his time This volume synthesizes his prolific career for the first time demonstrating how Schapiro worked from the nexus of artistic and intellectual practice to confront some of the twentieth century s most abiding questions Schapiro was renowned for pioneering interdisciplinary approaches to interpreting visual art His lengthy formal analyses in the 1920s Marxist interpretations in the 1930s psychoanalytic critiques in the 1950s and 1960s and semiotic explorations in the 1970s all helped open new avenues for inquiry Based on archival research C Oliver O'Donnell s study is structured chronologically around eight defining debates in which Schapiro participated including his dispute with Isaiah Berlin over the life and writing of Bernard Berenson Schapiro s critique of Martin Heidegger s ekphrastic commentary on Van Gogh and his confrontation with Claude L vi Strauss over the applicability of mathematics to the interpretation of visual art O'Donnell s

thoughtful analysis of these intellectual exchanges not only traces Schapiro's philosophical evolution but also relates them to the development of art history as a discipline to central tensions of artistic modernism and to modern intellectual history as a whole Comprehensive and thought provoking this study of Schapiro's career pieces together the separate strands of his work into one cohesive picture In doing so it reveals Schapiro's substantial impact on the field of art history and on twentieth century modernism *Handbook of Critical Environmental Politics* Pellizzoni, Luigi, Leonardi, Emanuele, Asara,

The Poverty of Critical Theory in International Relations Davide Schmid, 2023-01-31 This book addresses the crisis of critique of Frankfurt School Critical Theory in International Relations and puts forward a proposal for how it can be overcome It starts from the premise that the present conjuncture marked by capitalist crisis and a fracturing international

order urgently calls for critical perspectives capable of clarifying the state of global affairs and the emancipatory struggles within it. Critical Theory in International Relations should be well placed to provide answers to this demand yet it finds itself today in a state of decline. Its prevailing form that of a universalist cosmopolitan project reflects a narrow Eurocentric perspective and the concerns of a time now past while the Frankfurt School tradition as a whole struggles to develop new modes of analysis and new political imaginaries that are appropriate to the current historical situation. The book diagnoses this situation of intellectual and political crisis and seeks to trace a way out. It does so by providing a comprehensive account of the development of Critical Theory in International Relations and the ways in which it has applied Frankfurt School thought to the study of international politics. It then makes a provocative case as to the exhaustion of the cosmopolitan and Habermasian paradigm of critique that has guided Frankfurt School research on international politics for the past thirty years. Finally it puts forward a proposal for the revitalisation of Critical Theory in IR through a renewed emphasis on the critique of political economy and sketches a research agenda which can make the tradition relevant again to contemporary political questions.

Democratic Philosophy and the Politics of Knowledge Richard T. Peterson, 1996-04-15. Debates over postmodernism, analyses of knowledge and power and the recurring issue of Heidegger's Nazism have all deepened questions about the relation between philosophy and the social roles of intellectuals. Against such postmodernist rejections of philosophical theory as mounted by Rorty and Lyotard, Richard Peterson argues that precisely reflection on rationality in appropriate social terms is needed to confront urgent political issues about intellectuals. After presenting a conception of intellectual mediation set within the modern division of labor, he offers an account of postmodern politics within which postmodern arguments against critical reflection are themselves treated socially and politically. Engaging thinkers as diverse as Kant, Hegel, Marx, Habermas, Foucault and Bakhtin, Peterson argues that a democratic conception and practice of philosophy is inseparable from democracy generally. His arguments about modern philosophy are tied to claims about the relation between liberalism and epistemology and these in turn inform an account of impasses confronting contemporary politics. Historical arguments about the connections between postmodernist thought and practice are illustrated by discussions of the postmodernist dimensions of recent politics.
