Politics Of Property Rights:

The Politics of Property Rights Stephen H. Haber, 2004 **The Politics of Property Rights Institutions in Africa** Ato Kwamena Onoma, 2010 Why do some political leaders create and strengthen institutions such as title registries and land tribunals that secure property rights to land while others neglect these institutions or destroy those that already exist How do these institutions evolve once they have been established This book answers these questions through spatial and temporal comparison of national and subnational cases from Botswana Ghana and Kenya and to a lesser extent Zimbabwe Onoma argues that the level of property rights security that leaders prefer depends on how they use land However the extent to which leaders institutional preferences are translated into actual institutions depends on the level of leaders capacity Further once established these institutions through their very working can contribute to their own decline over time This book is unique in revealing the political and economic reasons why some leaders unlike others prefer an environment of insecure rights even as land prices increase Provided by publisher **Polarization, Politics, and Property Rights** Philip Keefer, 2016 One strand of research argues that polarized societies find it difficult to reach political consensus on appropriate responses to crises Another strand focuses on redistribution asking whether income inequality stifles growth by increasing political incentives to redistribute Which is right Most efforts to trace the effects of income inequality on growth have focused on redistribution However empirical investigation has not substantiated either the positive association of income inequality with redistribution or the negative association of redistribution with economic growth Keefer and Knack analyze the effects of inequality in the broader context of social polarization They argue that social polarization whether rooted in income inequality or in ethnic tension makes large changes in current policies including those guaranteeing the security of contract and property rights more likely under a wide range of institutional arrangements The resulting uncertainties in the policy and contractual environment hinder growth They find strong empirical support for both parts of this argument The policy implications of their argument are quite distinct from those of arguments that inequality reduces growth by increasing pressures for redistribution If redistributive policies per se were to blame for the low growth resulting from inequality governments that seek to mitigate income inequality must inevitably confront a tradeoff between equity and growth If on the other hand the insecurity of property rights slows growth in unequal or otherwise polarized societies governments that commit over the long run to particular redistributive policies incur less risk of slowing economic growth Fiscal redistribution that reduces inequality may actually increase growth by reducing the risks of political uncertainty This paper a product of Regulation and Competition Policy Development Research Group is part of a larger effort in the group to understand the interplay of institutions and economic development The authors may be contacted at pkeefe@worldbank.org or sknack@worldbank.org *Politics and Property Rights* Shawn Everett Kantor, 1998-04-25 After the American Civil War agricultural reformers in the South called for an end to unrestricted grazing of livestock on unfenced land They advocated the stock law

which required livestock owners to fence in their animals arguing that the existing system in which farmers built protective fences around crops was outdated and inhibited economic growth The reformers steadily won their battles and by the end of the century the range was on the way to being closed In this original study Kantor uses economic analysis to show that contrary to traditional historical interpretation this conflict was centered on anticipated benefits from fencing livestock rather than on class cultural or ideological differences Kantor proves that the stock law brought economic benefits at the same time he analyzes why the law s adoption was hindered in many areas where it would have increased wealth This argument illuminates the dynamics of real world institutional change where transactions are often costly and where some inefficient institutions persist while others give way to economic growth

The Guardian of Every Other Right:A

Constitutional History of Property Rights James W. Ely,1991-10-31 America s founders viewed property ownership as both a safeguard of political liberty and the basis for economic growth Mirroring this attitude courts and commentators through much of American history have interpreted the Constitution to protect property rights The Guardian of Every Other Right chronicles this close relationship between property rights and the Constitution examining the pivotal role of property ownership from the Colonial era to current controversies over land use controls The book devotes special attention to the interplay of law ideology politics and economic change in shaping constitutional thought examining such issues as the link between private property and political liberty and the extent to which the government may interfere with private contractual agreements regarding the use of property Treating the entire history of property rights with full coverage of new developments over the past two decades this book fills an important gap in the literature of constitutional history

Polarization, Politics, and Property Rights Philip Keefer,Stephen F. Knack,2000 One strand of research argues that polarized societies find it difficult to reach political consensus on appropriate responses to crises Another strand focuses on redistribution asking whether income inequality stifles growth by increasing political incentives to redistribute Which is right

The Politics of Private Property Simone Knewitz,2021-04-21 Located at the intersections of law and culture The Politics of Private Property provides a fresh perspective on the functions of private property within U S cultural discourse by establishing a long historical arch from the early nineteenth to the twenty first century The study challenges the assumption of an unquestioned cultural consensus in the United States on the subject of individual property rights instead mobilizing property as an analytical category to examine how social and political debates generate competing and contested claims to ownership The property narratives arising out of political conflicts the book suggests serve to naturalize the unequal social and economic structures and legitimize the hegemonic order which however remains to be shifting and subject to challenges Analyzing the property narratives at the heart of the U S American self conception The Politics of Private Property addresses the gap between the ideal of the U S as a universal middle class society characterized by a wide diffusion of property ownership and the actual social reality which is defined by unequal dissemination of wealth and race based structures of

exclusion *Politics, Property and Law in the Philippine Uplands* Melanie G. Wiber, 2006-01-01 The Ibaloi village of Kabayan Poblacion combines a subsistence agricultural economy with a market economy that has grown up as a result of subsequent waves of colonization The Spanish arrived in the sixteenth century following the trail of gold and slave bearing Chinese trade junks and were followed in 1898 by the Americans The Ibaloi who were gold miners and traders cattle barons and vegetable producers have since then come to be known as an Hispanicized uplands people acculturated to Western ways and struggling to come to grips with new economic realities This book examines the Ibaloi property system and demonstrates that the changes which have taken place since the Spanish arrival were complex and had numerous directions and relationships many of them steered by the nature of Ibaloi society itself others by the Spanish and still others by the resources of Benguet Province What began as a study of the Ibaloi property system rapidly became an exercise in understanding developments over time in social stratification ritual and law Wiber's research has led her to challenge the dependency theory of legal pluralism whereby peripheral zones are forced into economic dependency by having to exist within two legal structures their own and another imposed by a central power zone in favour of the social science view of legal pluralism Thus all heterogeneous societies experience legal pluralism but in different and individual ways as people have a tendency to manipulate the law to their own advantage She also takes issue with the narrowness of current anthropological terms relating to property systems and whether they are applicable to non Western societies and argues for a reorientation of anthropology to end the tendency to generate simplistic models of property kinship and law **Politics, Property and Production in the West African Sahel** Tor Arve Benjaminsen, Christian Lund, 2001 Through a number of case studies from the West African Sahel this book links and explores natural resources management from the perspectives of politics property and production *Land Use Controls and Property Rights* John P. Lewis, 2007-07 **The Politics of Regulation** Jacint Jordana, David Levi-Faur, 2004-01-01 These changes together with the general advance in the study of regulation undoubtedly demand a re evaluation of the theory of regulation its methodologies and scope of application This book is a perceptive investigation of recent evolutions in the manner and extent of governance through regulation Scholars and students of comparative politics public policy regulation theory institutional economics and political sociology will find it to be essential reading It will also prove a valuable source of reference for those working or dealing with regulatory authorities and for business managers in private industries and services operating under a regulatory framework **Land Politics** Lauren Honig, 2022-08-25 This book provides new insight into the high stakes struggle to control land in the Global South through the lens of land titling in Zambia and Senegal Based on extensive fieldwork it shows how chiefs and communities challenge the state in an era of increasing scarcity and booming global land markets **Political Culture in the Latin West, Byzantium and the Islamic World, c.700-c.1500** Catherine Holmes, Jonathan Shepard, Jo van Steenberg, Björn Weiler, 2021-08-26 This comparative study explores three key cultural and political spheres the Latin west Byzantium and the

Islamic world from Central Asia to the Atlantic roughly from the emergence of Islam to the fall of Constantinople These spheres drew on a shared pool of late antique Mediterranean culture philosophy and science and they had monotheism and historical antecedents in common Yet where exactly political and spiritual power lay and how it was exercised differed This book focuses on power dynamics and resource allocation among ruling elites the legitimisation of power and property with the aid of religion and on rulers interactions with local elites and societies Offering the reader route maps towards navigating each sphere and grasping the fundamentals of its political culture this set of parallel studies offers a timely and much needed framework for comparing the societies surrounding the medieval Mediterranean

Embedded Politics Gerald Andrew McDermott, 2010-11-22 Embedded Politics offers a unique framework for analyzing the impact of past industrial networks on the way postcommunist societies build new institutions to govern the restructuring of their economies Drawing on a detailed analysis of communist Czechoslovakia and contemporary Czech industries and banks Gerald A McDermott argues that restructuring is best advanced through the creation of deliberative or participatory forms of governance that encourages public and private actors to share information and take risks Further he contends that institutional and organizational changes are intertwined and that experimental processes are shaped by how governments delegate power to local public and private actors and monitor them Using comparative case analysis of several manufacturing sectors Embedded Politics accounts for change and continuity in the formation of new economic governance institutions in the Czech Republic It analytically links the macropolitics of state policy with the micropolitics of industrial restructuring Thus the book advances an alternative approach for the comparative study of institutional change and industrial adjustment As a historical and contemporary analysis of Czech firms and public institutions this book will command the attention of students of postcommunist reforms privatization and political economic transitions in general But also given its interdisciplinary approach and detailed empirical analysis of policy making and firm behavior Embedded Politics is a must read for scholars of politics economics sociology political economy business organization and public policy Gerald A McDermott is Assistant Professor of Management in The Wharton School of Management at The University of Pennsylvania His research applies recent advances in comparative political economy and industrial organization including theories of social networks historical institutionalism and incomplete markets to analyze issues of economic governance firm creation and industrial restructuring in advanced and newly industrialized countries As evidenced by Embedded Politics his current focus is on problems of institutional and organizational learning in the formation of meso level governance institutions in emerging market and postsocialist economies McDermott also works as Senior Research Fellow at the IAE Escuela de Direccion y Negocios at Universidad Austral in Buenos Aires and he has served as Project Coordinator at the Inter American Development Bank He has consulted for the Finance Private Sector and Infrastructure Division at the World Bank and advised the Deputy Foreign Minister of the Czech Republic In addition he has published many papers and book chapters on entrepreneurship

privatization institutions and networks in Central Europe and Latin America Emergence, Entanglement, and Political Economy David J. Hebert, Diana W. Thomas, 2020-12-04 This volume is intended to serve as a review of the next generation of political economy scholars in what can be called the Wagnerian tradition which traces its roots to Buchanan and De Viti De Marco in the 1930s who argued that any decision that results from a political entity must be the product of individual decision makers operating within some framework of formal and informal rules To treat these decisions as if they were the product of one single mind or even simply the additive result of several decisions is to fundamentally misunderstand and mischaracterize the dynamics of collective action Today Richard Wagner is among the most prominent theorists in analyzing the institutional foundations of the economy and the organization of political decision making In this collection of original essays former students schooled in this tradition offer emerging insights on public choice theory public finance and political economy across a range of topics from voting behavior to entrepreneurship **The Nature of Politics** Annette A. LaRocco, 2024-04-16 This case study of Botswana focuses on the state building qualities of biodiversity conservation in southern Africa Drawing on extensive fieldwork Annette A LaRocco argues that discourses and practices related to biodiversity conservation are essential to state building in the postcolonial era These discourses and practices invoke the ways the state exerts authority over people places and resources enacts and remakes territorial control crafts notions of ideal citizenship and identity and structures economic relationships at the local national and global levels The book's key innovation is its conceptualization of the conservation estate a term most often used as an apolitical descriptor denoting land set aside for the purpose of conservation LaRocco argues that this description is inadequate and proposes a novel and much needed alternative definition that is tied to its political elements The components of conservation control over land policing of human behavior and structuring of the authority that allows or disallows certain subjectivities render conservation a political phenomenon that can be analyzed separately from considerations of nature or wildlife In doing so it addresses a gap in the scholarship of rural African politics which focuses overwhelmingly on productive agrarian dynamics and often fails to recognize that land nonuse can be as politically significant and wide reaching as land use Botswana is an ideal empirical case study upon which to base these theoretical claims With 39 percent of its land set aside for conservation Botswana is home to large populations of wildlife particularly charismatic megafauna such as the largest herd of elephants on the continent Utilizing more than two hundred interviews participant observation and document analysis this book examines a series of conservation policies and their reception by people living on the conservation estate These phenomena include securitized antipoaching enforcement a national hunting ban 2014 19 restrictions on using wildlife products forced evictions from conservation areas limitations on mobility and freedom of movement the political economy of Botswana's wildlife tourism industry and the conservation of globally important charismatic megafauna species **Politics as a Peculiar Business** Richard E. Wagner, 2016-02-26 Economists typically treat government as something outside the business realm a sort of Lord

of the Manor Richard Wagner argues that this is the wrong approach and can ultimately be destructive to capitalism and to society Modern governments are a peculiar form of business enterprise They face the same problems as regular businesses such as ascertaining demand and organizing production and act within the system in a way that can lead to a parasitical relationship with the market Largely rooted in political economy this book develops new theoretical ideas and formulations to explain why democracy is a difficult form of government to maintain The author explores how and why limited governments can morph into a system of destructive politics and looks at ways to escape this process This dynamic book will be useful for public choice scholars economists political scientists and lawyers who are interested in political economy in its various guises

Property Rights & Political Development in Ethiopia & Eritrea, 1941-74 Sandra Fullerton Joireman, 2000 Development economists and policy makers often work on the assumption that property rights evolve from collective to more specified systems The author has set out to test this theory by using the evidence available in the special case of Ethiopia and Eritrea Ethiopia was never colonised while Eritrea was under Italian colonial rule

Political Economy of Institutions, Democracy and Voting Norman Schofield, Gonzalo Caballero, 2011-06-11 This book presents the latest research in the field of Political Economy dealing with the integration of economics and politics and the way institutions affect social decisions The authors are eminent scholars from the U S Canada Britain Spain Italy Mexico and the Philippines Many of them have been influenced by Nobel laureate Douglass North who pioneered the new institutional social sciences or by William H Riker who contributed to the field of positive political theory The book focuses on topics such as case studies in institutional analysis research on war and the formation of states the analysis of corruption new techniques for analyzing elections involving game theory and empirical methods comparing elections under plurality and proportional rule and in developed and new democracies

Property Rights in Outer Space Matthew Johnson, 2024-05-28 This book explores the role of private mining rights in the utopian imaginary of space colonisation It presents a transdisciplinary account of the new and evolving legislative frameworks that have been established in anticipation of commercial exploitation of the mineral resources of the off world frontier Written in an engaging style the book investigates a novel case study in the history of capitalism and the commons the emergence of a nascent space mining industry undergirded by a contentious legislative framework In 2015 the US passed laws that would recognise the claims of US corporations to own and sell space resources This unilateral act of pre-emptive law making would appear to contravene the terms of the UN Outer Space Treaty 1967 which declared that the exploration and use of outer space should be for the benefit of all mankind and not subject to national appropriation Using this central dynamic between privately held mining rights and outer space as a global commons Matthew Johnson constructs an historical sociology of space mining from the deep historical roots of common and private property to the contemporary networks of neoliberalism that have engaged with the commercialisation of space activity The anticipatory expansion of private property claims beyond the Earth both resonates with and problematises the terrain of

political history such as the tensions between states and markets public law and private power the commons and exclusive property The emerging cosmopolitics of off world private property mirrors and is often explicitly embedded within neoliberal geopolitics prompting urgent questions about how we can reaffirm principles of democracy and common heritage in the international laws of Earth and space This book is compelling reading for anyone interested in the social study of space law economics technology politics and property rights
