The Making of International Environmental Treaties Gerry Nagtzaam, 2009 Gerry Nagtzaam contends that in recent decades neoliberal institutionalist scholarship on global environmental regimes has burgeoned as has constructivist scholarship on the key role played by norms in international politics In this innovative volume the author sets these interest and norm based approaches against each other in order to test their ability to illustrate why and how different environmental norms take hold in some regimes and not others The book explores why some global environmental treaties seek to preserve and protect some parts of nature from human utilization some seek to conserve certain parts of nature for human development whilst others allow the reckless exploitation of nature without accounting for the consequences It tracks the fate of these three underlying environmental norms preservation conservation and exploitation using case studies on whaling mining in Antarctica and

tropical timber The book illustrates how international political battles to shape environmental regimes inevitably result in clashes between these competing environmental norms This unique study will prove a fascinating read for both academics and practitioners in the fields of international environmental politics and international environmental law [The Left Libertarianism of the Greens](#) Kire Sharlamanov,2023-08-03 This book offers a systematic and multifaceted analysis of the Greens on the levels of political philosophy political concepts social movement political parties and political ideology The originality of the book lies in the determination of the political philosophy of the Greens as left libertarianism Such a determination of the Greens can already be found in the writings of Herbert Kitschelt but while he only makes a cursory mention of it this book offers a detailed elaboration of the points of contact between left libertarianism and the Greens The book also attempts to explain the acceptance of left libertarianism by the Greens with social processes in Western Europe the emergence of a new middle class and post materialist values At the same time the book examines the relationship between the left libertarian political philosophy of the Greens and the organizational structure of the Green parties their relationship to the state and to democracy **Encyclopedia of Global Studies** Helmut K. Governance for Sustainable Development William M. Lafferty, 2006-01-01. This book is an original study of the challenge of implementing sustainable development in Western democracies. It highlights the obstacles which sustainable development presents for strategic governance and critically examines how these problems can best be overcome in a variety of different political contexts.

Environmental Networks and Social Movement Theory Clare Saunders, 2013-04-11. This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Clare Saunders' book is an important contribution to the literature on social movements and environmentalism. Using the concept of environmental networks, it explores the extent to which social movement theory helps us understand how a broad range of environmental organizations interact. It considers the practicalities of social movement theories and it goes on to relate them to the practices of environmental networks. Theoretically and empirically rich, the book draws on extensive survey material with 144 UK environmental organizations as diverse as not-in-my-backyard (NIMBY) groups, reformists, conservationists, and radicals. Interviews with more than 40 key campaigners and extensive participant observation, particularly in London, focussing particularly on the crucial question of networking dynamics, the book reveals that there are broad-ranging network links across the movements' spatial and ideological dimensions. Combined with inevitable ideological clashes and a degree of sectarian rivalry, these links help produce vibrant environmental networks that together work to protect and/or preserve the environment. This book is an invaluable resource for anyone concerned with environmental issues, politics, and movements.

The Routledge Handbook of Environment and Communication Anders Hansen, Robert Cox, 2015-03-05. This Handbook provides a comprehensive statement and reference point for theory, research, and practice with regard to environment and communication, and it does this from a perspective which is both international and multi-disciplinary in scope. Offering comprehensive critical reviews of the history and state of the art of research into the key dimensions of environmental communication, the chapters of this handbook together demonstrate the strengths of multi-disciplinary and cross-disciplinary approaches to understanding the centrality of communication to how the environment is constructed and indeed contested socially, politically, and culturally. Organised in five thematic sections, *The Routledge Handbook of Environment and Communication* includes contributions from internationally recognised leaders in the field. The first section looks at the history and development of the discipline from a range of theoretical perspectives. Section two considers the sources, communicators, and media professionals involved in producing environmental communication. Section

three examines research on news entertainment media and cultural representations of the environment The fourth section looks at the social and political implications of environmental communication with the final section discussing likely future trajectories for the field The first reference Handbook to offer a state of the art comprehensive overview of the emerging field of environmental communication research this authoritative text is a must for scholars of environmental communication across a range of disciplines including environmental studies media and communication studies cultural studies and related disciplines

Postpositivist International Relations Theory Amartya Mukhopadhyay, 2023-10-16 This book discusses postpositivist theories foregrounding postpositivism against the reigning realist and positivist pluralist orthodoxies The book explicates seven theories not as disparate endeavours but as developments linked by a common thread that seeks to enunciate globalist emancipatory goals for the theoretical field and the world that these theories seek to change It focuses on the following themes feminism environmentalism or green theory the English School critical theory constructivism postmodernism and postcolonialism Additionally a separate chapter on globalization shows that while mainstream neo realist international relations theories respond hostilely to globalization and liberal pluralist theories react benignly to it postpositivist theories positively welcome it The book offers a competent meta theoretical gridwork showing on which side of the opposing disciplinary positions in the fourth debate each of the seven theories are located It is a comprehensive guide to the postpositivist restructuring of the discipline of international relations This book will be of interest to researchers and students of political science international relations history humanities and literature
