Comparing Political Regimes Alan Siaroff, 2022-12-31

Comparing Political Regimes provides a current and comprehensive empirical assessment of the world's 195 sovereign states. Alan Siaroff analyses and classifies countries in terms of economic development, political evolution, and state strength, ultimately outlining and contrasting the aspects of four regime types: liberal democracies, electoral democracies, semi-open autocracies, and closed autocracies. The fourth edition explains institutional differences within democracies and autocracies respectively, including how regimes evolve in key countries and how this change is incremental. An invaluable reference for students to refer to, this book provides a thorough foundational introduction to the comparative politics of countries and contains several unique figures and tables on the world's sovereign states. This new edition modifies the conceptual focus regarding some features of democracy and democratic party systems, expands on variations in autocracies, and adds a new chapter on the historical evolution of democracy, including key thresholds of representative democracy and levels of participation and competition at various historical junctures for all countries.

political science is for everybody Amy L. Atchison, 2021-02-01

political science is for everybody is the first intersectionality mainstreamed textbook written for introductory political science courses. While political science and politics are for everybody, political institutions are neither neutral nor unbiased. When we write political science textbooks that obscure the differences in how groups experience and interact with political institutions, we do students a disservice. This book exposes students to these differences while also bringing marginalized voices to the fore, allowing more students to see their lived experiences reflected in the pages of their textbook. Bringing together a diverse group of contributors, *political science is for everybody* teaches all the basics of political science while showing that representation matters both in politics and in the classroom.
