Politics And The Economy In Jordan:

Politics and Economy in Jordan Rodney Wilson, 2005-12-05 Jordan occupies centre stage in both Middle Eastern and Arabic politics yet the kingdom itself is comparatively under researched This volume contains contributions from some of Jordan s most respected academics in the field of geography economics and political science A number of international specialists in Jordan have also made valuable contributions The work covers important aspects of the Jordanian economic and political scene which have not yet been written about in English Aspects of Jordan s consumer society are examined including the question of foreign aid support the role of the private sector and the demand for consumer durables The economic vulnerability which an open consumer society faces is illustrated in the chapter on the balance of payments and inflation Despite economic and political problems it is argued that Jordan has exhibited a certain economic resilience and that a national identity has been successfully fostered *The Political Economy of Market Reform in Jordan* Timothy J. Piro, 1998 This volume moves beyond traditional studies of Jordan s politics to explore the interplay between politics and economy Examining the phenomenon of market reform in the developing world Timothy J Piro assesses the state s contradictory impulses toward privatization and continued state intervention in the economy Drawing on a wealth of primary materials the author illuminates the kingdom s unique politics and argues that market reform is dependent on domestic rather than international political structures **The Economic Development of Jordan (RLE Economy of Middle East)** Bichara Khader, Adnan Badran, 2014-10-30 Jordan is one of the most important countries of the Fertile Crescent Although it is not richly endowed with material resources its political significance in the region gives it considerable authority This book focuses on the economic development of Jordan over the last decade It analyses the structural changes the economy has undergone and examines the experience of the key sectors It also looks at the contribution of foreign aid and emigrant workers remittances to the economy The book concludes that there is a significant potential for the Jordanian economy but the current political and economic problems facing it are daunting First published in 1987 *Business as Usual?* Katherine Blue Carroll, 2003-01-01 Since the Jordanian State s establishment in 1921 Jordan s economy has predominantly relied on the financial support of other countries Such external funding known as rent was especially abundant between 1973 and 1989 when Jordan enjoyed an influx of petrodollars from the Gulf states However during the mid 1980 s sharply falling oil prices coupled with a cut off of Jordan s credit in world markets created a budgetary crisis that severely threatened Jordan s distributive political economy In her perspicacious examination Katherine Blue Carroll explores the dynamic link between Jordan s business community and the state between 1983 and 2000 a period when declining rents and economic reform challenged the traditional rent based economy The Jordan case serves as a prime example of how state business relations can be restructured to accommodate the demands of a market economy By methodically examining the timing content and process of the change in state business relations in Jordan Carroll provides the scholarly community with a pertinent and

valuable resource **Doing Business in the Middle East** Pete W. Moore, 2004-10-14 Is business the solution to the problems of the Middle East Some economists and policymakers argue that unleashing the Arab private sector is the key to sustainable growth and more liberal politics Pete Moore's book is the first to examine relations between state authority and elite business representation in the region By analysing the Kuwait and Jordan cases he considers why organised business in Kuwait has been able to coordinate policy reform with state officials while their Jordanian counterparts have generally failed The author concludes that unleashing the private sector alone is insufficient to change current political and economic arrangements and that successful economic adjustment requires successful political adjustment **Jordan's Inter-Arab Relations** Laurie Brand, 1995-01-05 Lisa Anderson Columbia University Jordan's Inter-Arab Relations Laurie A. Brand, 1994 Exploring Jordan's relationships with surrounding countries this volume uses specific case studies to analyze the workings of inter Arab politics It describes how Jordan has had to negotiate its security issues carefully due to the unstable economic and political structures of its neighbours The Political and Economic Challenges of Energy in the Middle East and North Africa David Ramin Jalilvand, Kirsten Westphal, 2017-11-22 The Middle East and North Africa MENA are in disarray and shifts in the field of energy have the potential to drastically affect the course of political and economic developments in the region Declining oil prices skyrocketing domestic demand the rise of unconventional oil and natural gas production in North America as well as shifting patterns of global energy trade all put severe pressures on both producing and importing countries in the MENA region Policy makers are facing fundamental challenges in light of the duality of grand transformations in geo politics and energy Changes in the field of energy require substantial political and economic reforms affecting the very fabric of sociopolitical arrangements At the same time the MENA region's geopolitical volatility makes any such reforms extremely risky Including contributions by academics and analysts from both inside and outside the MENA region this volume explores the changes in global and regional energy the impact of changing international energy dynamics on politics and economies in the MENA region and the challenges that will result This is essential reading for researchers postgraduates and professionals in Middle Eastern and North African politics global energy governance and regionalism

Oil and the political economy in the Middle East Martin Beck, Thomas Richter, 2021-08-17 The downhill slide in the global price of crude oil which started mid 2014 had major repercussions across the Middle East for net oil exporters as well as importers closely connected to the oil producing countries from the Gulf Following the Arab uprisings of 2010 and 2011 the oil price decline represented a second major shock for the region in the early twenty first century one that has continued to impose constraints but also provided opportunities Offering the first comprehensive analysis of the Middle Eastern political economy in response to the 2014 oil price decline this book connects oil market dynamics with an understanding of socio political changes Inspired by rentierism the contributors present original studies on Bahrain Egypt Jordan Kuwait Lebanon Oman Qatar Saudi Arabia and the United Arab Emirates The studies reveal a large diversity of country specific policy

adjustment strategies from the migrant workers in the Arab Gulf who lost out in the post 2014 period but were incapable of repelling burdensome adjustment policies to Egypt Jordan and Lebanon who have never been able to fulfil the expectation that they could benefit from the 2014 oil price decline With timely contributions on the COVID 19 induced oil price crash in 2020 this collection signifies that rentierism still prevails with regard to both empirical dynamics in the Middle East and academic discussions on its political economy

Jordan in Transition Curtis R. Ryan, 2002 Jordan has long been regarded as a pivotal country in the Middle East one whose policy choices carry strong implications for regional stability Jordan in Transition offers a cogent and compelling analysis of the country's domestic and international politics Ryan argues that there have been four dramatic transitions in Jordan's recent past ambitious economic restructuring efforts toward political liberalization realignments in foreign relations culminating in the 1994 peace agreement with Israel and the succession of King Abdullah II Exploring these transitions and how each in turn affects the others he provides a major contribution to our understanding of Jordan

Local Politics in Jordan and Morocco Janine A. Clark, 2018-04-03 In recent years authoritarian states in the Middle East and North Africa have faced increasing international pressure to decentralize political power Decentralization is presented as a panacea that will foster good governance and civil society helping citizens procure basic services and fight corruption Two of these states Jordan and Morocco are monarchies with elected parliaments and recent experiences of liberalization Morocco began devolving certain responsibilities to municipal councils decades ago while Jordan has consistently followed a path of greater centralization Their experiences test such assumptions about the benefits of localism Janine A Clark examines why Morocco decentralized while Jordan did not and evaluates the impact of their divergent paths ultimately explaining how authoritarian regimes can use decentralization reforms to consolidate power Local Politics in Jordan and Morocco argues that decentralization is a tactic authoritarian regimes employ based on their coalition strategies to expand their base of support and strengthen patron client ties Clark analyzes the opportunities that decentralization presents to local actors to pursue their interests and lays out how municipal level figures find ways to use reforms to their advantage In Morocco decentralization has resulted not in greater political inclusivity or improved services but rather in the entrenchment of pro regime elites in power The main Islamist political party has also taken advantage of these reforms In Jordan decentralization would undermine the networks that benefit elites and their supporters Based on extensive fieldwork Local Politics in Jordan and Morocco is an important

contribution to Middle East studies and political science that challenges our understanding of authoritarian regimes survival strategies and resilience *Economic Development and Political Reform* Bradley Louis Glasser,2001-01-01 Providing new theoretical perspectives on Third World political and economic reform this innovative volume will be of particular interest to political economists international governmental and developmental organizations international financial institutions and non governmental organizations in this region BOOK JACKET **The Political Economy of the Middle East, 1973-78** United States. Congress. Joint Economic Committee,1980 *The Political Economy of Energy Subsidy Reform* Gabriela Inchauste,David G. Victor,2017-03-22 This book proposes a simple framework for understanding the political economy of subsidy reform and applies it to four in depth country studies covering more than 30 distinct episodes of reform Five key lessons emerge First energy subsidies often follow a life cycle beginning as a way to stabilize prices and reduce exposure to price volatility for low income consumers However as they grow in size and political power they become entrenched Second subsidy reform strategies vary because the underlying political economy problems vary When benefits are concentrated satisfying or isolating interest groups with alternative policies is an important condition for effective reform When benefits are diffuse it can be much harder to identify and manage the political coalition needed for reform Third governments vary in their administrative and political capacities to implement difficult energy subsidy reforms Fourth improvements in social protection systems are often critical to the success of reforms because they make it possible to target assistance to those most in need Finally the most interesting cases involve governments that take a strategic approach to the challenges of political economy In these settings fixing energy subsidies is central to the governments missions of retaining political power and reorganizing how the government delivers benefits to the population These cases are examples of reform engineering where governments actively seek to create the capacity to implement alternative policies depoliticize tariffs and build credibility around alternative policies The most successful reforms involve active efforts by policy leaders to identify the political forces supporting energy subsidies and redirect or inoculate them **Political Economy of Power Sharing in Developing Countries** Aki Kuroki,2025-08-07 Political Economy of Power Sharing in Developing Countries is an in depth examination of factors that trigger the clamor for power sharing zoning and rotation in mostly developing countries These provocations include geographical ethnic and religious identity factors that can influence the political process in varying degrees from country to country The impact goes a long way in determining the stability and instability of the political process in various countries The reasons for these differences and the impacts are a combination of the endogenous variables in the first instance which are the primary prompters Other elements which are the exogenous factors are secondary prompters When these converge they produce a peculiar impact in a given society based on the characteristic variables and the resulting outcome The new paradigm shifts in the agitation in developing countries is demonstrated by an elitist instrument of marginalization and self aggrandizement The masses are hoodwinked sensitized and manipulated

through primal sentiment to support the elites in acquiring political power which in turn enables the acquisition of economic power

The Political Economy of Transitions to Peace Galia Press-Barnathan, 2009-07-05 Much attention has focused on the ongoing role of economics in the prevention of armed conflict and the deterioration of relations In *The Political Economy of Transitions to Peace* Galia Press Barnathan focuses on the importance of economics in initiating and sustaining peaceful relations after conflict Press Barnathan provides in depth case studies of several key relationships in the post World War II era Israel and Egypt Israel and Jordan Japan the Philippines and Indonesia Japan and South Korea Germany and France and Germany and Poland She creates an analytical framework through which to view each of these cases based on three factors the domestic balance between winners and losers from transition to peace the economic disparity between former enemies and the impact of third parties on stimulating new cooperative economic initiatives Her approach provides both a regional and cross regional comparative analysis of the degree of success in maintaining and advancing peace of the challenges faced by many nations in negotiating peace after conflict and of the unique role of economic factors in this highly political process Press Barnathan employs both liberal and realist theory to examine the motivations of these states and the societies they represent She also weighs their power relations to see how these factor into economic interdependence and the peace process She reveals the predominant role of the state and big business in the initial transition phase cold peace but also identifies an equally vital need for a subsequent broader societal coalition in the second normalizing phase warm peace Both levels of engagement Press Barnathan argues are essential to a durable peace Finally she points to the complex role that third parties can play in these transitions and the limited long term impact of direct economic side payments to the parties
