

# Introduction to comparative politics, ch 7. Politics in Britain

- the government of UK was created in 1801 by merging England, Scotland, Wales and Ireland under a Parliament at Westminster in London
- Britain became democracy by evolution rather than revolution
- Britain has had two women prime ministers, Conservatives M. Thatcher and Theresa May, before America could elect a single women president
- Influence of British system of parliamentary democracy can be found in India, Australia, Canada, U.S.

## CURRENT POLICY CHALLENGES

- In 2015, the Conservative Party led by PM David Cameron won an absolute majority of seats; Liberal Democrats collapsed and the official opposition party, Labour, suffered worst setback in more than three decades
- Cameron resigned as a prime minister 13 months later after failing to produce a majority vote in favor of the UK rejoining in the European Union
- Britain joined the EU in 1973, what was then a European Common Market
- PARLIAMENT IS SOVEREIGN: as long as the government of the day has the backing of a majority of members of parliament in the House of Commons, it can pass whatever laws it wants 1
- Westminster = where MPs, the prime minister and her Cabinet meet and work
- ups and downs of the British pound: significance of interdependence → the pound is managed by the official Bank of England, but because it is an international currency, statements by the PM do not determine its international value
- after the British vote to leave the EU, its value fell by more than 10 percent
- Gordon Brown; Labour party → became prime minister, but brought Labour to a big defeat in the 2010 general election
- George Osborne; the Conservative chancellor who succeeded Brown, gave priority to cutting the government's deficit in the expectation that this would promote growth in the private sector of the economy

## Where does the Britain belong?

- Traditionally, answer is that Britain is a major world power having close ties with Commonwealth countries, the United States, and Europe
- COMMONWEALTH: after WWII, the British Empire was transformed in this free association of fifty-three sovereign states spanning five continents → the Commonwealth does not have the word British prefixed to its name; member states from Zambia to Jamaica, Australia and Bangladesh differ from each other in wealth, culture, and commitment to democracy; Commonwealth has no military or economic power, and its diplomatic influence is slight
- Zimbabwe left the Commonwealth (dictator Robert Mugabe)
- every British PM claims a special relationship with the U.S., House of Commons however recommended that the idea of a special relationship should be abandoned → Britain should be more willing to say no to the U.S. on those issues where two countries' interests and values diverge
- European countries are now Britain's major trading partner
- in the 80s, Margaret Thatcher successfully promoted the adoption of a single European market for trade in goods and services, but governments never showed a truly dedication
- Britain has kept the pond and rejected passport-free travel common in most continental European
