*Politics in Three Worlds* Paul Joseph Best, Kul B. Rai, David F. Walsh, 1986      **Feudal America** Vladimir Shlapentokh, Joshua Woods, 2011-01-17 Do Americans live in a liberal capitalist society where evenhanded competition rules the day or a society in which big money private security and personal relations determine key social outcomes Vladimir Shlapentokh and Joshua Woods argue that the answer to these questions cannot be found among the conventional models used to describe the nation Offering a new analytical tool the authors present a provocative explanation of the nature of contemporary society by comparing its essential characteristics to those of medieval European societies Their feudal model emphasizes five elements the weakness of the state and its inability to protect its territory guarantee the security of its citizens and enforce laws conflicts and collusions between and within organizations that involve corruption and other forms of illegal or semilegal actions the dominance of personal relations in political and economic life the prevalence of an elitist ideology and the use of private agents and organizations for the provision of safety and security Feudal America urges readers to suspend their forward thinking and futurist orientations question linear notions of social and historical progression and look for explanations of contemporary social problems in medieval European history      **The Oxford Handbook of Philosophy of Political Science** Harold Kincaid, Jeroen Van Bouwel, 2023 The Oxford Handbook of Philosophy of Political Science brings together philosophers of science and political scientists to discuss philosophical issues in political science The book offers twenty seven essays on how to do research in political science the purposes and use of political science in society as well as how to evaluate claims made by political scientists      [The Oxford Handbook of Classics in Public Policy and Administration](#) Steven J. Morgan, Herbert Obinger, Christopher Pierson, 2021 This second edition is an extensive revision of the first re written to reflect the change over the past ten years A comprehensive comparative introduction to everything that is

important in the contemporary developed welfare state focusing on Western welfare states Book jacket **Social Cohesion and Immigration in Europe and North America** Ruud Koopmans, Bram Lancee, Merlin Schaeffer, 2014-11-20 Concerns about immigration and the rising visibility of minorities have triggered a lively scholarly debate on the consequences of ethnic diversity for trust cooperation and other aspects of social cohesion In this accessibly written volume leading scholars explore where when and why ethnic diversity affects social cohesion by way of analyses covering the major European immigration countries as well as the United States and Canada They explore the merits of competing theoretical accounts and give rare insights into the underlying mechanisms through which diversity affects social cohesion The volume offers a nuanced picture of the topic by explicitly exploring the conditions under which ethnic diversity affects the glue that holds societies together With its interdisciplinary perspective and contributions by sociologists political scientists social psychologists as well as economists the book offers the most comprehensive analysis of the link between ethnic diversity and social cohesion that is currently available Do Elections (Still) Matter? Emiliano Grossman, Isabelle Guinaudeau, 2021-12-01 Are election campaigns relevant to policymaking as they should in a democracy This book sheds new light on this central democratic concern based on an ambitious study of democratic mandates through the lens of agenda setting in five West European countries since the 1980s The authors develop and test a new model bridging studies of party competition pledge fulfillment and policymaking The core argument is that electoral priorities are a major factor shaping policy agendas but mandates should not be mistaken as partisan Parties are like snakes in tunnels they have distinctive priorities but they need to respond to emerging problems and their competitors priorities resulting in considerable cross partisan overlap The tunnel of attention remains constraining in the policymaking arena especially when opposition parties have resources to press governing parties to act on the campaign priorities This key aspect of mandate responsiveness has been neglected so far because in traditional models of mandate representation party platforms are conceived as a set of distinctive priorities whose agenda setting impact ultimately depends on the institutional capacity of the parties in office Rather differently this book suggests that counter majoritarian institutions and windows for opposition parties generate key incentives to stick to the mandate It shows that these findings hold across five very different democracies Denmark France Germany Italy and the UK The results contribute to a renewal of mandate theories of representation and lead to question the idea underlying much of the comparative politics literature that majoritarian systems are more responsive than consensual ones **The Wiley Handbook of Vocational Education and Training** David Guile, Lorna Unwin, 2019-01-18 A collection of the theories practices and policies of vocational education and training written by international experts The Wiley Handbook of Vocational Education and Training offers an in depth guide to the theories practices and policies of vocational education and training VET With contributions from a panel of leading international scholars the Handbook contains 27 authoritative essays from a wide range of disciplines The contributors present an integrated analysis of the complex and

Ansell, 2010-03-22 From the Ballot to the Blackboard provides the first comprehensive account of the political economy of education spending across the developed and developing world The book demonstrates how political forces like democracy and political partisanship and economic factors like globalization deeply impact the choices made by voters parties and leaders in financing education The argument is developed through three stories that track the historical development of education first its original expansion from the elite to the masses second the partisan politics of education in industrialized states and third the politics of higher education The book uses a variety of complementary methods to demonstrate the importance of redistributive political motivations in explaining education policy including formal modeling statistical analysis of survey data and both sub national and cross national data and historical case analyses of countries including the Philippines India Malaysia England Sweden and Germany **The Oxford Handbook of Transformations of the State** Stephan Leibfried, Evelyne Huber, Matthew Lange, Jonah D. **Welfare, Ethnicity and Altruism** Frank Salter, 2013-03-07 Welfare Ethnicity and Altruism applies the controversial theory of Ethnic Nepotism first formulated by Iren us Eibl Eibesfeldt and Pierre van den Berghe to the modern welfare state both are authors in this volume This theory states that ethnic groups resemble large families whose members are prone to cooperate due to kin altruism Recent empirical findings in economics and political science offer confirmatory evidence The book presents two separate studies that compare welfare expenditures around the world both indicating that the more ethnically mixed a population becomes the greater is its resistance to redistributive policies These results point to profound inconsistencies within ideologies of both left and right regarding ethnicity
