The Politics of American Science. 1939 to the Present. Revised Edition. Edited by James L. Penick [and Others], Etc  
James Lal PENICK,1972      **Chemistry in America 1876-1976** A. Thackray,J.L. Sturchio,P.T. Carroll,R.F Bud,2012-12-06  
This study is an outgrowth of our interest in the history of modern chemistry The paucity of reliable quantitative knowledge about past science was brought home forcibly to us when we undertook a research seminar in the comparative history of modern chemistry in Britain Germany and the United States That seminar which took place at the University of Pennsylvania in the spring of 1975 was paralleled by one devoted to the work of the Annales School The two seminars together catalyzed the attempt to construct historical measures of change in aspects of one science or chemical indicators The present volume displays our results Perhaps our labors may be most usefully compared with the work of those students of medieval science who devote their best efforts to the establishment of texts Only when acceptable texts have been constructed from fragmentary and corrupt sources can scholars move on to the more satisfying business of making history So too in the modern period a necessary preliminary to the full history of any scientific profession is the establishing of reliable quantitative information in the form of statistical series This volume does not offer history Instead it provides certain element indicators that may be useful to individuals interested in the history of American chemistry and chemical industry and suggestive for policy      The State of Academic Science and Engineering National Science Foundation (U.S.). Division of Policy Research and Analysis,1990      **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965 70      *Grace Hopper* Kathleen Broome Williams,2013-01-15  
When Grace Hopper retired as a rear admiral from the U S Navy in 1986 she was the first woman restricted line officer to reach flag rank and at the age of seventy nine the oldest serving officer in the Navy A mathematician by training who became a computer scientist the eccentric and outspoken Hopper helped propel the Navy into the computer age She also was a superb publicist for the Navy appearing frequently on radio and television and quoted regularly in newspapers and magazines Yet in spite of all the attention she received until now Amazing Grace as she was called has never been the subject of a full biography Kathleen Broome Williams looks at Hopper s entire naval career from the time she joined the WAVES and was sent in 1943 to work on the Mark I computer at Harvard where she became one of the country s first computer programmers Thanks to this early Navy introduction to computing the author explains Hopper had a distinguished civilian career in commercial computing after the war gaining fame for her part in the creation of COBOL The admiral s Navy days were far from over however and Williams tells how Hopper already past retirement age was recalled to active duty at the Pentagon in 1967 to standardize computer programming languages for Navy computers Her temporary appointment lasted for nineteen years while she standardized COBOL for the entire department of defense Based on extensive interviews with colleagues and family and on archival material never before examined this biography not only illuminates Hopper s

pioneering accomplishments in a field that came to be dominated by men but provides a fascinating overview of computing from its beginnings in World War II to the late 1980s      *The Politics of Expertise* Stephen P. Turner, 2013-11-07 This book collects case studies and theoretical papers on expertise focusing on four major themes legitimization the aggregation of knowledge the distribution of knowledge and the distribution of power It focuses on the institutional means by which the distribution of knowledge and the distribution of power are connected and how the problems of aggregating knowledge and legitimating it are solved by these structures The radical novelty of this approach is that it places the traditional discussion of expertise in democracy into a much larger framework of knowledge and power relations and in addition begins to raise the questions of epistemology that a serious account of these problems requires      *A Companion to 20th-Century America* Stephen J. Whitfield, 2008-04-15 A Companion to 20th Century America is an authoritative survey of the most important topics and themes of twentieth century American history and historiography Contains 29 original essays by leading scholars each assessing the past and current state of American scholarship Includes thematic essays covering topics such as religion ethnicity conservatism foreign policy and the media as well as essays covering major time periods Identifies and discusses the most influential literature in the field and suggests new avenues of research as the century has drawn to a close      **The American West Transformed** Gerald D. Edwards, 1996 The Closed World offers a radically new alternative to the canonical histories of computers and cognitive science Arguing that we can make sense of computers

as tools only when we simultaneously grasp their roles as metaphors and political icons Paul Edwards shows how Cold War social and cultural contexts shaped emerging computer technology and were transformed in turn by information machines The Closed World explores three apparently disparate histories the history of American global power the history of computing machines and the history of subjectivity in science and culture through the lens of the American political imagination In the process it reveals intimate links between the military projects of the Cold War the evolution of digital computers and the origins of cybernetics cognitive psychology and artificial intelligence Edwards begins by describing the emergence of a closed world discourse of global surveillance and control through high technology military power The Cold War political goal of containment led to the SAGE continental air defense system Rand Corporation studies of nuclear strategy and the advanced technologies of the Vietnam War These and other centralized computerized military command and control projects for containing world scale conflicts helped closed world discourse dominate Cold War political decisions Their apotheosis was the Reagan era plan for a Star Wars space based ballistic missile defense Edwards then shows how these military projects helped computers become axial metaphors in psychological theory Analyzing the Macy Conferences on cybernetics the Harvard Psycho Acoustic Laboratory and the early history of artificial intelligence he describes the formation of a cyborg discourse By constructing both human minds and artificial intelligences as information machines cyborg discourse assisted in integrating people into the hyper complex technological systems of the closed world Finally Edwards explores the cyborg as political identity in science fiction from the disembodied panoptic AI of 2001 A Space Odyssey to the mechanical robots of Star Wars and the engineered biological androids of Blade Runner where Information Age culture and subjectivity were both reflected and constructed Inside Technology series *The Publishers' Trade List Annual*, 1992

distinctive attributes of American higher education decentralized administration pluralistic and research minded faculties and intense competition for government funding have become world standard Whether measured by Nobel and other prizes international applications for student admissions and faculty appointments or the results of academic surveys America's top research universities are the best in the world The Rise of American Research Universities provides a fresh historical interpretation of their ascendancy and a fresh comprehensive estimate of their scholarly achievement Hugh Davis Graham and Nancy Diamond question traditional methods of rating the reputation and performance of universities they offer instead an empirical analysis of faculty productivity based on research grants received published research and peer approval of that work Comparing the research achievements of faculty at more than 200 institutions they differ with most studies of higher education in measuring performance in every academic field from medicine to humanities and in analyzing data on research activity in terms of institutional size In this important and timely work Graham and Diamond reassess the success of American universities as research institutions and the role of public funding in their development from the expansionist golden years of the 1950s and 60s through the austerity measures of the 1970s and the entrepreneurial ethos of the 1980s to the budget crises universities face in the 1990s *Isis Cumulative Bibliography 1966-1975* History of Science Society, 1980

**New Eye for the Navy** David Kite Allison, 1981 This study narrates the origin of radar at the Naval Research Laboratory Radar should be seen as the product not simply of one man or even a group of men but rather as the result of individuals working within the structure of a mission oriented research and development facility To comprehend how radar was developed when it was developed and why one must follow not just the evolution of technical progress but also the administrative and political decisions that shaped it One must understand how the talents and motivations of the people who created this new device were related to the particular institutional situation and historical context in which they labored The account is the story of a modern research and development laboratory in action It discusses one major accomplishment of one institution But it is also written to contribute to a broader understanding of the history of research and development laboratories in general and of the influence they have had on the course of modern American history The work of the Naval Research Laboratory on radar is a significant episode in that story Landmark Legislation 1774-2022 Stephen W. Stathis, 2024-03-15 This comprehensive up to date guide covers important laws and treaties enacted by the U S Congress This edition expands coverage to include the last five Congresses 2013-2022 which have seen landmark legislation across a broad spectrum of issues including infrastructure child welfare policy climate change conservation and public lands the COVID pandemic criminal justice cybersecurity semiconductors disaster assistance gun safety veterans health care and more

**The Impact of Policy Analysis** James M. Rogers, 2010-11-23 Government agencies spend billions of dollars each year for policy analysis with the expectation that improved policy will follow Although civil servants conduct some analysis themselves more frequently they contract with research organizations to assess the probable consequences of new social

policies and to answer other policy questions Jams M Rogers develops a theory that explains and predicts the impact of policy analysis He illustrates his theory through welfare reform where policy analysis is caught in political warfare and has little chance to improve actual policy During the 1960s and 1970s over 108 million was spent on four unprecedented social scientific experiments to test the effectiveness of a major proposal to reform the welfare system Now out of favor the negative income tax was thn considered to be an appealing alternative to welfare Starting in New Jersey and Pennsylvania during the Johnson administration the experimental research continued through Carter s term and helped to keep reform proposal and research organizations alive This book examines the results of these experiments and their effect on Carter s reform attempt the Program for Better Jobs and Income One of the author s main conclusions concerns the role of value conflict If there is strong disagreement within society over the goals of policy analysis will seldom change the minds of decision makers or influence policy Policy analysis is more likely to influence thinking and policy if the issue involves low conflict

**Landmark Legislation** Stephen W. Stathis, 2003-04-01 Documents Congress s most momentous accomplishments in determining the national policies to be carried out by the executive branch in approving appropriations to support those policies and in fulfilling its responsibility to ensure that such actions are being implemented as intended

**Schooled to Order** David Nasaw, 1981 Argues that as public schools became integral to the maintenance of American lifestyles they increasingly reflected the primary tensions between democratic rhetoric and the reality of a class divided system
