## Politics Of Breast Cancer:

*The Politics of Breast Cancer* Maureen Hogan Casamayou, 2001-03-26 Between 1990 and 1993 breast cancer activism became a significant political movement. The issue began to receive extensive media attention and federal funding for breast cancer research jumped dramatically. Describing the origins of this surge in interest, Maureen Hogan Casamayou attributes it to the emergence of politically potent activism among breast cancer survivors and their supporters. Exploring the creation and development of the National Breast Cancer Coalition (NBCC), she shows how many of its key leaders were mobilized by their own traumatic experiences with the disease and its treatments. Casamayou details the NBCC's meteoric rise and impressive lobbying efforts, explaining how, in contrast to grassroots movements founded by dedicated individuals, the coalition grew from the simultaneous efforts of a network of women who invested their time, energy, money, and professional skills in the fight for increased funding for breast cancer research. This multiple leadership or collective entrepreneurialism, says Casamayou, was crucial to the NBCC's success, framing the issue in the minds of the public and policymakers alike.

Patient No More Sharon Batt, 1996      Pink Ribbons, Inc Samantha King, 2006 The commercialization of the breast cancer movement is challenged in this analysis of how breast cancer has been transformed from a stigmatized disease and individual tragedy to a market-driven industry of survivorship. *The Biopolitics of Breast Cancer* Maren Klawiter, 2008 For nearly forty years, feminists and patient activists have argued that medicine is a deeply individualizing and depoliticizing institution. According to this view, medical practices are incidental to people's transformation from patients to patient activists. *The Biopolitics of Breast Cancer* turns this understanding upside down. Maren Klawiter analyzes the evolution of the breast cancer movement to show the broad social impact of how diseases come to be medically managed and publicly administered. Examining surgical procedures, adjuvant therapies, early detection campaigns, and the rise in discourses of risk, Klawiter demonstrates that these practices created a change in the social relations, if not the mortality rate, of breast cancer that initially inhibited but later enabled collective action. Her research focuses on the emergence and development of new forms of activism that range from grassroots patient empowerment to environmental activism and corporate-funded breast cancer awareness. *The Biopolitics of Breast Cancer* opens a window onto a larger set of changes currently transforming medically advanced societies and ultimately challenges our understanding of the origins, politics, and future of the breast cancer movement. Maren Klawiter holds a PhD in sociology from the University of California Berkeley. She is currently pursuing a law degree at Yale University. Hiding Politics in Plain Sight Patricia Strach, 2016-08-18 As late as the 1980s, breast cancer was a stigmatized disease so much so that local reporters avoided using the word "breast" in their stories, and early breast cancer organizations steered clear of it in their names. But activists with business backgrounds began to partner with corporations for sponsored runs and cause marketing products from which a portion of the proceeds would benefit breast cancer research. Branding breast cancer as pink, hopeful, positive, uncontroversial on the products Americans see every day.

these activists and corporations generated a pervasive understanding of breast cancer that is widely shared by the public and embraced by policymakers. Clearly they have been successful: today more Americans know that the pink ribbon is the symbol of breast cancer than know the name of the vice president. Hiding Politics in Plain Sight examines the costs of employing market mechanisms, especially cause marketing as a strategy for change. Patricia Strach suggests that market mechanisms do more than raise awareness of issues or money to support charities; they also affect politics. She shows that market mechanisms like corporate sponsored walks or cause marketing shift issue definition away from the contentious processes in the political sphere to the market where advertising campaigns portray complex issues along a single dimension with a simple solution: breast cancer research will find a cure and Americans can participate easily by purchasing specially marked products. This market competition privileges even more specialized actors with connections to business. As well, cooperative market activism fundamentally alters the public sphere by importing processes, values and biases of market based action into politics. Market activism does not just bring social concerns into market transactions; it also brings market biases into public policymaking which is inherently undemocratic. As a result, industry and key activists work cooperatively rather than contentiously and they define issues as consensual rather than controversial, essentially hiding politics in plain sight.

**Waking Up, Fighting Back** Roberta Altman, 1996. And she tells us about research on diet, exercise and other precautionary measures that might help prevent the disease. *The Politics of Breast Cancer Screening* Alison Hann, 1996. This book looks at the national breast cancer screening programme in the UK and examines the policy making process from the standpoint of political science. Medical Mavens Jennifer Reid Myhre, 2001. *Environmental Politics and Liberation in Contemporary Africa* M.A. Salih, 2013-03-14. Nowadays the environment looms large in the analysis of conflict in developing societies and the precise role it plays is the subject of an ongoing debate. The debate has moved on from the earlier but still popular notions of power struggles, class struggles and ethnic conflicts to a perception of conflict as the product of intense group competition for resources. Where the state controls the distribution of resources, itself inevitably becomes party to conflicts whose bone of contention is access to state power as the most efficient means of gaining access to resources. The resources in question are social, health, education, transportation, communication, recreation, etc. and material: land, water, housing, jobs, contracts, licenses, permits, etc. In parts of the world and especially in Africa, diminishing resources and authoritarian state rule exacerbate group competition, leading to political confrontation. This is the line I have followed in analysing conflict in the Horn of Africa. Markakis 1987, 1998. Mohamed Salih's first contribution in this volume is to move the debate a step beyond this line which can be criticized as unduly materialist. He does it by bringing culture into the realm of resources, not only as a resource in itself but also as the agency that assigns natural resources their value. Culture thus becomes a contextual element in conflict over resources whose value is culturally determined. *Civic Fitness* Samantha Jane King, 2000. **Common Enemies** Rachel Kahn Best, 2019. For over a hundred years millions of Americans have joined

together to fight a common enemy by campaigning against diseases In *Common Enemies* Rachel Kahn Best asks why disease campaigns have dominated a century of American philanthropy and health policy and how the fixation on diseases shapes efforts to improve lives Combining quantitative and qualitative analyses in an unprecedented history of disease politics Best shows that to achieve consensus disease campaigns tend to neglect stigmatized diseases and avoid controversial goals But despite their limitations disease campaigns do not crowd out efforts to solve other problems Instead they teach Americans to give and volunteer and build up public health infrastructure bringing us together to solve problems and improve our lives

*The Politics of Public Health in the United States* Kant Patel, Mark E Rushefsky, 2015-05-20 Our public health system is primarily concerned with the promotion of health and the prevention of disease But while everyone may agree with these goals in principle in practice public health is a highly contentious policy arena that is inevitably entangled with sensitive issues ranging from occupational safety and environmental hazards to health education immunization and treatment of addiction and sexually transmitted disease Today however concern for protecting the population against bio terrorism and new epidemics such as SARS is tipping the balance back toward increased support for public health This book focuses on the politics policies and methodologies of public health and the twenty first century challenges to the public health system of the United States It explores the system's relatively weak position in the American political culture medical establishment and legal system scientific and privacy issues in public health and the challenges posed by ecological risk and the looming threat of bio terrorist attack Each chapter includes study questions The volume also includes a chronology of major laws and events in public health policy along with an extensive bibliography

**Women Transforming Politics** Cathy Cohen, Kathleen B. Jones, Joan C. Tronto, 1997-07 Contains over thirty essays which explore the complex contexts of political engagement family and intimate relationships friendships neighborhood community work environment race religious and other cultural groupings that structure perceptions of women's opportunities for political participation
