Politics Of Nuclear Nonproliferation:

The Politics of Nuclear Proliferation George H. Quester, 1973 **Without the Bomb** Mitchell Reiss, 1988 Looks at the role of nuclear weapons among different countries and the relationship with the United Nations Explores both the political motivations of the countries and the technological capabilities *The Politics of Nuclear Non-Proliferation* Ursula Jasper, 2013-10-08 This book examines the puzzle of why some states acquire nuclear weapons whereas others refrain from trying to do so or even renounce them Based on the predominant theoretical thinking in International Relations it is often assumed that nuclear proliferation is inevitable given the anarchic nature of the international system Proliferation is thus often explained by vague references to states insecurity in an anarchic environment Yet elusive generalisations and grand abstract theories inhibit a more profound and detailed knowledge of the very political processes that lead towards nuclearisation or its reversal Drawing upon the philosophical and social theoretical insights of American pragmatism *The Politics of Nuclear Non Proliferation* provides a theoretically innovative and practically useful framework for the analysis of states nuclear proliferation policies Rather than recounting a parsimonious lean account of proliferation the framework allows for the incorporation of multiple paradigms in order to depict the complex political contestation underlying states proliferation decisions This pragmatist framework of analysis offers ways of overcoming long standing metatheoretical gridlocks in the IR discipline and encourages scholars to reorient their efforts towards imminent real world challenges This book will be of much interest to students of nuclear proliferation international security and IR theory **U.S. Nuclear Nonproliferation Policy** United States. Congress. Senate. Committee on Foreign Relations, 1983 *The Politics of Ballistic Missile Nonproliferation* W. Bowen, 2000-01-20 During the presidency of George Bush 1989-93 the proliferation of nuclear chemical and biological weapons and the ballistic missiles capable of delivering them rose greatly in significance as issues on the American security agenda In the missile field this became evident by the efforts of certain elements in the executive branch and several congressmen to improve domestic and international implementation of the Missile Technology Control Regime *The Politics of Ballistic Missile Nonproliferation* examines the political bureaucratic and systemic issues that interacted to determine the outcome of these efforts **Nuclear Politics and the Non-Aligned Movement** William Potter, 2017-10-03 The Non Aligned Movement NAM is the largest and most diverse political grouping of states engaged on issues related to nuclear nonproliferation and disarmament Drawing on the authors first hand experiences as members of NAM observer state delegations in NPT and IAEA negotiations as well as the findings of a larger CNS research project on NAM nuclear politics the book will provide important new insights about how a small subset of NAM states has tended to dominate NAM politics and have promoted policies that are often at odds with those advanced by Western states on issues such as nuclear terrorism IAEA safeguards nuclear export controls multinational fuel arrangements proliferation in the Middle East NPT and nuclear arms control and disarmament Based on an analysis of NAM perspectives politics and priorities

the book will provide practical recommendations for engaging NAM members in a more constructive fashion on issues related to nuclear nonproliferation disarmament peaceful use and counter nuclear terrorism Particular attention will be given to problems likely to be encountered when Iran assumes the chairmanship of NAM in 2012 and how these difficulties can best be mitigated in the lead up to the next NPT Review Conference Nuclear Non-proliferation Robert L.

Beckman,2019-03-08 This book examines the Nuclear Non Proliferation Act of 1978 and other stringent non proliferation laws that seek to tighten U S nuclear export criteria and strengthen the international non proliferation regime It juxtaposes efforts of nuclear managers with those of reformers who remain intent on strengthening safeguards to prevent horizontal proliferation Dr Beckman looks at the development of the Atoms for Peace program the mindset that grew up along with it and the shifts in congressional thought about the promise and problems of the peaceful nuclear fuel cycle **Defending**

Frenemies Jeffrey W. Taliaferro,2019 The United States maintains defense ties with as many as 60 countries which not only enables its armed forces to maintain command globally and to project its force widely but also enables its government to exert leverage over allies foreign policies and military strategies In *Defending Frenemies* Jeffrey W Taliaferro presents a historical and comparative analysis of how successive US presidential administrations have employed inducements and coercive diplomacy toward Israel Pakistan South Korea and Taiwan over nuclear proliferation Taliaferro shows that the ultimate goals in each administration from John F Kennedy to George H W Bush have been to contain the Soviet Union s influence in the Middle East and South Asia and to enlist China as an ally of convenience against the Soviets in East Asia Policymakers inclinations to pursue either accommodative strategies or coercive nonproliferation strategies toward allies have therefore been directly linked to these primary objectives *Defending Frenemies* is sharp examination of how regional power dynamics and US domestic politics have shaped the nonproliferation strategies the US has pursued toward vulnerable and often obstreperous allies **The Hegemon's Tool Kit** Rebecca Davis Gibbons,2022-07-15 At a moment when the

nuclear nonproliferation regime is under duress Rebecca Davis Gibbons provides a trenchant analysis of the international system that has for more than fifty years controlled the spread of these catastrophic weapons *The Hegemon's Tool Kit* details how that regime works and how disastrously it might falter In the early nuclear age experts anticipated that all technologically capable states would build these powerful devices That did not happen Widespread development of nuclear arms did not occur in large part because a global nuclear nonproliferation regime was created By the late 1960s the United States and the Soviet Union had drafted the Treaty on the Non Proliferation of Nuclear Weapons NPT and across decades the regime has expanded with more agreements and more nations participating As a result in 2022 only nine states possess nuclear weapons Why do most states in the international system adhere to the nuclear nonproliferation regime The answer lies Gibbons asserts in decades of painstaking efforts undertaken by the US government As the most powerful state during the nuclear age the United States had many tools with which to persuade other states to join or otherwise support

nonproliferation agreements The waning of US global influence Gibbons shows in *The Hegemon's Tool Kit* is a key threat to the nonproliferation regime So too is the deepening global divide over progress on nuclear disarmament To date the Chinese government is not taking significant steps to support the nuclear nonproliferation regime and as a result the regime may face a harmful leadership gap *Small States and Security Regimes* John Masker,1995-04-05 From the John Holmes Library collection

Managing Non-proliferation Regimes in the 1990s Peter van Ham,1993 From the Middle East to the Far East proliferation issues are of increasing concern as suspicions grow that more states are working covertly to acquire weapons of mass destruction and their delivery systems This book focuses on operation and management of the series of control regimes covering nuclear chemical and biological weapons and ballistic missiles that have been put in place to restrict such proliferation This study analyzes how these regimes work today and how they relate to the Coordinating Committee on Multilateral Controls originally established to restrict the flow of defence related technology to the Soviet Union and its allies It then explores how these regimes could be strengthened and better coordinated

International Nuclear Nonproliferation System John Simpson,Anthony G. McGrew,1984-06-18 *Nuclear Nonproliferation Policy* United States. Congress. Senate. Committee on Governmental Affairs. Subcommittee on Energy, Nuclear Proliferation, and Government Processes,1982

The Global Politics of Science and Technology - Vol. 2 Maximilian Mayer,Mariana Carpes,Ruth Knoblich,2014-08-20 An increasing number of scholars have begun to see science and technology as relevant issues in International Relations IR acknowledging the impact of material elements technical instruments and scientific practices on international security statehood and global governance This two volume collection brings the debate about science and technology to the center of International Relations It shows how integrating science and technology translates into novel analytical frameworks conceptual approaches and empirical puzzles and thereby offers a state of the art review of various methodological and theoretical ways in which sciences and technologies matter for the study of international affairs and

Internationalism Yoichi Funabashi,G. John Ikenberry,2020-02-04 A 2020 CHOICE Outstanding Academic Title Japan s challenges and opportunities in a new era of uncertainty Henry Kissinger wrote a few years ago that Japan has been for seven decades an important anchor of Asian stability and global peace and prosperity However Japan has only played this anchoring role within an American led liberal international order built from the ashes of World War II Now that order itself is under siege not just from illiberal forces such as China and Russia but from its very core the United States under Donald Trump The already evident damage to that order and even its possible collapse pose particular challenges for Japan as explored in this book Noted experts survey the difficult position that Japan finds itself in both abroad and at home The weakening of the rules based order threatens the very basis of Japan s trade based prosperity with the unreliability of U S protection leaving Japan vulnerable to an economic and technological superpower in China and at heightened risk from a nuclear North Korea Japan s response to such challenges are complicated by controversies over constitutional revision and the dark aspects of its history that remain a source of tension with its neighbors The absence of virulent strains of populism have helped to provide Japan with a stable platform from which to pursue its international agenda Yet with a rapidly aging population widening intergenerational inequality and high levels of public debt the sources of Japan s stability its welfare state and immigration policies are becoming increasingly difficult to sustain Each of the book s chapters is written by a specialist in the field and the book benefits from interviews with more than 40 Japanese policymakers and experts as well as a public opinion survey The book outlines today s challenges to the liberal international order proposes a role for Japan to uphold reform and shape the order and examines Japan s assets as well as constraints as it seeks to play the role of a proactive stabilizer in the Asia Pacific *Nuclear Politics: The nuclear nonproliferation regime* Maria Rost Rublee,Ramesh Chandra Thakur,2014 *Overcoming Impediments to U.S.-Russian Cooperation on Nuclear Nonproliferation* National Research Council,Policy and Global Affairs,Development, Security, and Cooperation,Russian Academy of Sciences Committee on U.S.-Russian Cooperation on Nuclear Nonproliferation,U.S. National Academies Committee on U.S.-Russian Cooperation on Nuclear Nonproliferation,2004-05-05 The U S National Academies and the Russian Academy of Sciences convened a joint workshop to identify methods of overcoming impediments to cooperation between the United States and Russia on nonproliferation The workshop emphasized approaches and techniques that have already been shown to work in U S Russian programs and that might be applied in other areas The workshop was intended to facilitate frank discussion between

individuals in the United States and Russia who have some responsibility for cooperative nonproliferation programs in the hope of identifying both the impediments to cooperation and potential methods of addressing them This report summarizes the discussions at the workshop
