Politics and Society in Western Europe Jan-Erik Lane, Svante O. Ersson, 1999-02-23 Politics and Society in Western Europe is a comprehensive introduction for students of West European politics and of comparative politics This new edition has been extensively revised and updated to meet with the new needs of undergraduate students as they come to terms with a changing social and political landscape in Europe This textbook provides a full analysis of the political systems of 18 Western European countries their political parties elections and party systems as well as the structures of government at local regional national and European Union levels Throughout the book key theoretical ideas are accessibly introduced and examined against the very latest empirical data on civil society and the state

**Privatisation in the European Union** Judith Clifton, Francisco Comín, Daniel Díaz Fuentes, 2013-03-09 Judith Clifton Francisco Comín and Daniel Díaz Fuentes in Privatisation in the European Union reject the two dominant explanations provided in literature which include a simple Americanisation of policy and a varied privatisation experience without a common driving force Using a systematic comparative analysis of privatisation experiences in each country from the 1980s to the beginning of the twenty first century the authors show how the process of European integration and the need for internationally competitive industries have constituted key driving forces in the quest for privatisation across the EU As privatisation slows down at the turn of the millennium what future can citizens expect for public enterprises Privatisation in the European Union is essential reading for researchers students and policy makers interested in privatisation EU policy and the history of public enterprises

*Politics in Western Europe Today* Derek W. Urwin, William E. Paterson, 2014-09-25 Examining such issues as the welfare state the politics of unemployment and government industry relations this work looks at the developments in western European politics up to and during the 1980s

**Privatisation Performance in Major European Countries Since 1980** M. Tatahi, 2006-04-26 Major theoretical approaches stress the superiority of privately owned over state owned companies without addressing how corporate performance should best be measured This book investigates performance of both private and state owned applying factor analysis to compare the two states

*Politics and Policy in Greece* Kevin Featherstone, 2013-10-31 This rare focus on the politics of contemporary Greece explores in particular the country's processes of public policy making It is more than thirty years since the restoration of democracy in Greece and in this period the country has undergone a number of major changes Domestic political tensions have arisen from the pressures of Europeanization as a consequence of Greece's membership in the European Union EU membership has helped define a modernization project latterly associated with Premier Costas Simitis which clashes with traditional practices and paradigms

In addition other challenges have arisen of a multi ethnic society of the loss of faith in old ideologies and of the passage of old divisions Greece now faces pressure to adapt to the external environment as well as to the constraints of the will and capability of the domestic system Politics and Policy in Greece addresses core issues such as How far has the politics of modernization penetrated Greek society How far have reforms to state economy relations welfare systems and constitutional rights reflected a liberal agenda and how far have they reflected traditional concerns How has modernization affected Greece's relations with the European Union Containing expert overviews and detailed case studies of the dynamics of domestic politics this accessible and informative volume is essential reading for both Greeks and non Greeks alike *The politics of privatisation in Western Europe* John Vickers,1988 *The Political Economy of Privatization* Thomas Clarke,Christos Pitelis,2005-08-17 This book considers the many facets of the privatization process in advanced industrialised countries along with the marketization of Eastern Europe and the pressures on developing countries to adopt privatization as the route to growth **The Privatisation of European Telecommunications** Johan From,Kjell A. Eliassen,2017-11-28 This international volume presents a comprehensive comparative study of the transformation of the European telecommunications industry from 1990 to the present The book focuses on the old incumbent operators and their dramatic change from state agencies to listed companies It analyzes the liberalization process as well as the corporatization and privatization of these companies The contributors assess the conditions for the transformations taking place the driving forces for change the effects to management the efforts of the EU during these processes and ultimately the role of the private owner Political science publications have all but excluded analysis of the newly privatized companies their contribution to the liberalization process both before and after privatization and the interplay between the national political and company levels The book redresses this shortcoming and also features a double empirical focus in that the main national incumbents in Europe are analyzed and compared to Telenor the Norwegian former incumbent *Legal Aspects of Privatisation* Bulent Seven,2002 The main aims of this thesis are as follows a To present a comprehensive analysis of the concept of privatisation its origins and limits b To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective c To define and analyse particularly legal issues which arise during the privatisation transactions e g labour law competition law etc d To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises This work found out that there is no simple internationally applicable recipe for privatisation various legal methods and techniques can be used to privatise state owned enterprises Because each country has different circumstances it is impossible to provide a unique model for privatisation each country needs to design its own model according to its circumstances Privatisation is an essential but insufficient element for structural economic reform in the economy and society Privatisation is not a panacea it is not the solution to every economic and administrative problem selling

an enterprise to the private sector does not mean an end to all problems Also privatisation is not an overnight process or a magic touch it will be a lengthy process Furthermore a decision that something can be privatised does not mean that it should be privatised In that context privatisation is not good or bad it is an economic and social instrument If it is well designed it may bring substantial benefits to the economy and society In many countries many state owned enterprises particularly the ones which are financially weak have still not been privatised This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades Privatisation and Development Claude V. Chang,2017-11-28 The book interrogates privatisation in terms of its effectiveness vis vis its stated goals and more fundamentally in terms of its success in delivering economic development It investigates why privatisation was successful in the UK and other OECD countries and why it has not met with equal success in developing countries In this regard it further examines the policy prescriptions of the IMF and World Bank in relation to the conceptualised benefits and theoretical assumptions underlying these supposed benefits The author assesses the extent to which culture and customs indeed the mode of production stand in determinate relationship to the goals techniques and outcome of the process Furthermore Chang examines the degree to which socioeconomic and moral consequences of privatisation have been ignored in pursuit of the ideological imperative implicit in the Washington Consensus Hence the book contributes to the reflective thought that must necessarily be part of theory validation and provides the basis for a balanced and empirically valid theory of privatisation

**Privatizing Eastern Europe** J.M. Van Brabant,2012-12-06 This volume is meant to be a modest contribution to the ongoing debate about the transitions away from the administrative planning environment typical of the former communist regimes The central subject matter is a fairly special one namely the privatization of these economies together with the restoration and effective monitoring of property rights These are paramount tasks of the ongoing transformations once progress toward political democracy is secured Though I would not allot divestment of existing state owned assets the kind of pivotal importance that some observers reserve for it changing rules on the utilization of these assets is evidently at the core of what the transition toward market based economic systems should be all about Rather than examining the entire range of issues that surround the controversy on privatization this volume is primarily concerned with the economics of taking the state out of the decision making about existing assets Among the several aspects of this discussion three stand out One is the establishment of clear property rights This is fundamental to minimize transaction costs in an environment where decisions will increasingly be taken by independent economic agents acting on their own account Second I look only incidentally at the various angles of creating capital markets particularly for existing assets in these economies
