A Practice of Ethics for Global Politics Jack L. Amoureux, 2015-10-05 What kind of ethics in world politics is possible if there is no foundation for moral knowledge or global reality is at least complex and contingent Furthermore how can an ethics grapple with difference a persistent and confounding feature for global politics This book responds to the call for a bold and creative approach to ethics that avoids assuming or aspiring to universality and instead prioritizes difference complexity and uncertainty by turning to reflexivity not as method or methodology but as a practice of ethics for politics This practice ethical reflexivity offers individuals organizations and communities tools to recognize interrogate and potentially change the stories they tell about politics about constraints notions of responsibility and visions of desirability The benefits and limits of ethical reflexivity are investigated by the author who engages writing on critique rhetoric affect and relationality and carefully considers dominant and alternative framings of difficult issues in International Relations IR the 1994 genocide in Rwanda and the US policies of enhanced interrogation and drone strikes This path breaking study provokes new possibilities for agency and action and contributes to a growing literature in IR on reflexivity by uniquely elaborating its promise as an ethics for politics and by drawing on thinkers less utilized in discussions of reflexivity such as Hannah Arendt Michel Foucault and Aristotle This book will appeal to scholars and upper level graduates in several sub fields of IR including international global ethics IR theory global governance international organizations non governmental organizations foreign policy analysis and US foreign policy

Transforming World Politics Anna M. Agathangelou, L.H.M. Ling, 2009-06-02 This book provides a critical understanding of contemporary world politics by arguing that the neoliberal approach to international relations seduces many of us into investing our lives in projects of power and alienation These projects offer few options for emancipation consequently many feel they have little choice but to retaliate against violence with more violence The authors of this pioneering work articulate worldism as an alternative approach to world politics It intertwines non Western and Western

traditions by drawing on Marxist postcolonial feminist and critical security approaches with Greek and Chinese theories of politics broadly defined. The authors contend that contemporary world politics cannot be understood outside the legacies of these multiple worlds including axes of power configured by gender, race, class and nationality which are themselves linked to earlier histories of colonizations and their contemporary formations. With fiction and poetry as exploratory methods, the authors build on their multiple worlds approach to consider different sites of world politics, arguing that a truly emancipatory understanding of world politics requires more than just a shift in ways of thinking; above all, it requires a shift in ways of being. *Transforming World Politics* will be of vital interest to students and scholars of International Relations, Political Science, Postcolonial Studies, Social Theory, Women's Studies, Asian Studies, European Union and Mediterranean Studies, and Security Studies.

The Success of Small States in International Relations Godfrey Baldacchino, 2023-06-09. *The Success of Small States in International Relations* highlights the normality and power of small states in international relations. This book overturns the stereotype that small states, however defined, are weak and are or ought to be consigned to the margins of international relations. It argues that small states are not punching above their weight or even anomalies, since it is large states which are the anomaly in the global system. The text unpacks the nature and character of small state success while also looking critically at thirteen episodes in modern history where small states singly or collectively emerged victorious in confrontations with larger states. The case studies, globally sourced, are bookended by conceptual and analytic reviews of what these events mean for diplomacy, international relations, and small states more generally. This book will appeal to scholars and students of comparative political science and international relations, particularly from small states as well as policy makers and senior small state government officers.

This exciting new handbook provides a global overview of the process of democratization, offering chapter by chapter discussion at both the country and regional levels and examining the interaction between the domestic and external factors that affect the progression of countries from authoritarian to democratic rule. Bringing together 29 key experts in the field, the work is designed to contrast the processes and outcomes of democratic reform in a wide range of different societies, evaluating the influence of factors such as religion, economic development, and financial resources. It is structured thematically into four broad sections. Section I provides a regional tour d'horizon of the current state of democratisation and democracy in eight regions around the world. Section II examines key structures, processes, and outcomes of democratisation and democracy. Section III focuses on the relationship between democratisation and international relations through examination of a range of issues and actors, including the third and fourth waves of democracy, political conditionality, the United Nations, the European Union, the African Union, and the Organisation of African States. Section IV examines the interaction between democratisation and development, with a focus on poverty and inequality, security, human rights, gender, war, and conflict resolution.
