Pompeian Households An Analysis Of Material Culture Monumenta Archaeologica Vol :

The Archaeology of Peasantry in Roman Spain Jesús Bermejo Tirado, Ignasi Grau Mira, 2022-01-19 This volume aims to present an updated portrait of the Roman countryside in Roman Spain by the comparison of different theoretical orientations and methodological strategies including the discussion of textual and iconographic sources and the analysis of the faunal remains The archaeology of rural areas of the Roman world has traditionally been focused on the study of villae both as an architectural model of Roman otium and as the central core of an economic system based on the extensive agricultural exploitation of latifundia The assimilation of most rural settlements in provincial areas of the Roman Empire with the villa model implies the acceptance of specific ideas such as the generalization of the slave mode of production the rupture of the productive capacity of Late Iron Age communities or the reduction in importance of free peasant labor in the Roman economy of most rural areas However in recent decades as a consequence of the generalized extension of preventive or emergency archaeology and survey projects in most areas of the ancient territories of the Roman Empire this traditional conception of the Roman countryside articulated around monumental villae is undergoing a thorough revision New research projects are changing our current perception of the countryside of most parts of the Roman provincial world by assessing the importance of different types of rural settlements In the last years we have witnessed the publication of archaeological reports on the excavation of thousands of small rural sites farms farmsteads enclosures rural agglomerations of diverse nature etc One of the main consequences of all this research activity is a vigorous discussion of the paradigm of the slave mode of production as the basis of Roman rural economies in many provincial areas A similar change in the paradigm is taking place with some delay in the archaeology of Roman Spain After decades of preventive emergency interventions there is a considerable quantity of unpublished data on this kind of rural settlements However unlike the cases of Roman Britain or Gallia Comata no synthesis or national projects are undertaking the task of systematizing all these data With the intention of addressing this current situation the present volume discusses the results and methodological strategies of different projects studying peasant settlements in several regions of Roman Spain

Pompeian Households Penelope M. Allison, 2004-12-31 Studies of Pompeian material culture have traditionally

been dominated by art historical approaches but recently there has been a renewed and burgeoning interest in Pompeian houses for studies of Roman domestic behavior This book is concerned with contextualized Pompeian household artifacts and their role in deepening our understanding of household behavior at Pompeii It consists of a study of the contents of thirty so called atrium houses in Pompeii to investigate the spatial distribution of household activities both within each architectural room type and across the house It also uses this material to investigate the state of occupancy of these houses at the time of the eruption of Mt Vesuvius in AD 79 It thus examines artifact assemblages within their spatial and decorative contexts for a more material cultural approach to these remains and for the information which they provide on living conditions in Pompeii during the last decades In this it takes a critical perspective the textual nomenclature which is traditionally applied to Pompeian room types

A Public and Political Christ Bart B. Bruehler, 2011-08-05 Was Jesus a public figure A political figure Yes according to Luke s gospel Jesus was a Christ who was both public and political Recent developments in the theory and practice of the study of space have provided tools to classify ancient social spatial spheres with greater nuance and depth A broad survey of literary and archaeological resources in the ancient world as well as an in depth look at Plutarch s Political Precepts and Philostratus s Life of Apollonius reveals that the familiar dichotomy of public and private does not suffice to describe the Hellenistic Roman milieu that shaped the author and audience of the third gospel This study employs social spatial analysis to explore how Luke uses the power of place to portray Jesus frequently engaging the unofficial public sphere and local politics specifically in 18 35 19 43 the public healing of the blind beggar the unexpected impact of Zacchaeus s hospitality the political implications of the parable of the king and his subjects and the publicity and politics of Jesus entry into Jerusalem The result is an illuminating look at the overall spatial character of Luke s gospel the development of Christianity in the latter half of the first century and the role of place in contemporary Christianity

A Cultural History of Objects in Antiquity Robin Osborne, 2022-08-31 A Cultural History of Objects in Antiquity covers the period 500 BCE to 500 CE examining ancient objects from machines and buildings to furniture and fashion Many of our current attitudes to the world of things are shaped by ideas forged in classical antiquity We now understand that we do not merely do things to objects they do things to us Reinterpreting objects in Greece and Rome casts new light on our understanding of ourselves and turns the ancient world upside down The 6 volume set of the Cultural History of Objects examines how objects have been created used interpreted

and set loose in the world over the last 2500 years Over this time the West has developed particular attitudes to the material world at the centre of which is the idea of the object The themes covered in each volume are objecthood technology economic objects everyday objects art architecture bodily objects object worlds Robin Osborne is Professor of Ancient History at the University of Cambridge UK Volume 1 in the Cultural History of Objects set General Editors Dan Hicks and William Whyte

Archaeology and History in Roman, Medieval and Post-medieval Greece William Caraher, Linda Jones Hall, R. Scott Moore, 2008 Bringing together studies of archaeological method and analysis with detailed work of historical interpretation the papers here demonstrate how analysis informed by multiple disciplines sheds new light on such important topics as the end of Antiquity the so called Byzantine Dark Ages the contours of the emerging Byzantine civilization and the complex character of identity in post medieval Greece More broadly this volume shows how the study of the material culture of post classical Greece has made significant contributions to both the larger archaeological and historical discourse

Roman Artefacts and Society Ellen Swift, 2017-02-09 In this book Ellen Swift uses design theory previously neglected in Roman archaeology to investigate Roman artefacts in a new way making a significant contribution to both Roman social history and our understanding of the relationships that exist between artefacts and people Based on extensive data collection and the close study of artefacts from museum collections and archives the book examines the relationship between artefacts everyday behaviour and experience The concept of affordances features of an artefact that make possible and incline users towards particular uses for functional artefacts is an important one for the approach taken This concept is carefully evaluated by considering affordances in relation to other sources of evidence such as use wear archaeological context the end products resulting from artefact use and experimental reconstruction Artefact types explored in the case studies include locks and keys pens shears glass vessels dice boxes and finger rings using material mainly drawn from the north western Roman provinces with some material also from Roman Egypt The book then considers how we can use artefacts to understand particular aspects of Roman behaviour and experience including discrepant experiences according to factors such as age social position and left or right handedness which are fostered through artefact design The relationship between production and users of artefacts is also explored investigating what particular production methods make possible in terms of user experience and also examining production constraints that have unintended consequences for users The book examines topics such as the perceived agency of objects differences in social practice across the provinces cultural change and development in daily practice and the persistence of tradition and social convention It shows that design intentions everyday habits of use and the constraints of production processes each contribute to the reproduction and transformation of material culture
