The Concept of Race in International Criminal Law Carola Lingaas,2019-09-19 Members of racial groups are protected under international law against genocide persecution and apartheid But what is race and why was this contentious term not discussed when drafting the Statute of the International Criminal Court Although the law uses this term is it legitimate to talk about race today let alone convict anyone for committing a crime against a racial group This book is the first comprehensive study of the concept of race in international criminal law It explores the theoretical underpinnings for the crimes of genocide apartheid and persecution and analyses all the relevant legal instruments case law and scholarship It exposes how the international criminal tribunals have largely circumvented the topic of race and how incoherent jurisprudence has resulted in inconsistent protection The book provides important new interpretations of a problematic concept by subjecting it to a multifaceted and interdisciplinary analysis The study argues that race in international criminal law should be constructed according to the perpetrator s perception of the victims ostensible racial otherness The perpetrator s imagination as manifested through his behaviour defines the victims racial group membership It will be of interest to students and practitioners of international criminal law as well as those studying genocide apartheid and race in domestic and international law *Government Instituted Slavery Using Franchises, Form #05.030* Sovereignty Education and Defense Ministry (SEDM),2020-02-06 Documents the primary mechanism abused by the government to destroy the constitutional rights and sovereignty of the people

First in Time Kurtis R. Kallenbach,2024-03-11 There is a legal maxim *fictio credit veritati* that means fictions yields to truth First in Time includes the transcription of conversation between two longtime pacifists which clearly evidences a Living Truth beyond the presumption of any fictitious record or narrative created specifically to gain access to One s genuine nature via trespass as well as a highly deductive and learned exposition by the Author as to the lawful scope of such enlightened testimony It is a must read for anyone with eyes to see the absurdity and confusion of a world completely devoid of Truth

Because of Our Unbelief Paul E Orman,2024-08-22 Because of Our Unbelief encompasses the social issues of our day and examines them from both a secular and a Biblical point of view The issues that divide us as a nation The issues that clearly show a battle for Good and Evil that which is Right and that which is Wrong It shows how Holy Scripture may influence our thinking and help shape the important decisions we make in life It

outlines how we have abandoned our belief in God the Creator and how that has led us down a path of destruction Both the Christian and non Christian worldviews are examined and the affects they have on one another is examined And it intends to show that our poor decisions are made due to our unbelief in God For Christians our compromise of His moral truth and for non Christians the suppression of God s Law written on our hearts and minds And that if we were to correct that unbelief not only would we free God to heal our land but that we could see a great revival sweep across the globe resulting in hundreds of thousands of souls being added to the Kingdom of God A third Great Awakening where God makes one last plea with humanity before the return of our Lord and Savior Jesus Christ

Legal treatment standards for international investments. Heuristic aspects Cristina-Elena Popa Tache, 2021-06-18 Discussing the standards of legal treatment for international investment means subjecting the law branch in its entirety to research Representing the most comprehensive part of particular importance for international investment law treatment standards continue to generate a series of differentiations whose understanding and approach often require the analysis of the starting points that led to the emergence by division of this branch of law International investment treatment standards represent or should represent the direct effect of the principles of international investment law thus being their expression with a pronounced logical affinity between them Specifically they are not confused with the principles but they are the practical reflection at the level of rights and obligations applicable to the performers in this field in the highlight of the theoretical practical aspect having a customary origin as well as the principles underlying their development Following this logic and analyzing the situation of the latest investment treaties it turns out that there is an insufficiency in the preponderance of treatment standards compared to the principles much more numerous and constantly expanding of this field of law The specificity of this branch of law consists in the emphasis on its fundamental concepts essentializing what determines the whole being considered as a science of essentialization and ultimately the role of any method of scientific research is to analyze discover and highlight what this branch of law represents as a whole what determines it the connections of this ensemble with other sciences the composition and structuring of the system and the substantiation of the connections between its components The standards of legal treatment of international investments settled with the

individualization of international investment law Their appearance took place gradually depending on the path marked by the stages of emergence and evolution of the legal regime of foreign investment from the legal phenomenon to the branch of law from trade in general to foreign investment in particular In all of this legal scientific research plays a key role because any codification activity must be scientifically substantiated Any codification policy must ensure a balance between the diachrony and the synchrony of international investment law between the dynamics and the statics of this law A complete analysis of the treatment standards of international investments can be performed only by a close correlation because the singular existence of a standard specific to this field is excluded from the start The importance of establishing and existence of eloquent and integrated treatment standards is a condition for survival under international economic crises The main feature of this monograph is to present the subject in a way that is as easy to understand as possible to study and apply such rules being a very useful and valuable material for students masters doctoral students theoreticians and practitioners

Foreign Investor Misconduct in International Investment Law Anna Kozyakova, 2020-11-12 This book examines the issue of foreign investor misconduct in modern international investment law focusing on the approach that international investment law as it currently operates has developed towards foreign investor misconduct The term misconduct is not a legal notion but is used to describe a certain phenomenon namely a group class of actions This term is convenient since it makes it possible to introduce and describe the phenomenon as such without a division into concrete types of conduct like abuse of process violation of national law corruption investment contrary to international norms and standards etc The term misconduct is intended to embrace various kinds of conduct on the part of foreign investors that the system of international investment law does not accept such as that which it regards as illegal against public policy or otherwise inappropriate and triggers legal consequences Rarely however does international investment law clearly articulate what it considers unacceptable investor conduct and certainly not in any systematic fashion As such this book addresses the following questions What types of investors conduct are legally unacceptable What mechanisms are available to deal with unacceptable investors conduct and what are the legal consequences

The Pragmatic Turn in Law Janet Giltrow, Dieter Stein, 2017-06-12 In legal interpretation where does meaning come from Law is made from language yet law unlike other language related disciplines has not so far experienced its pragmatic turn towards inference and the construction of meaning This book investigates to what extent a pragmatically based view of linguistic and legal interpretation can lead to new theoretical views for law and in addition to practical consequences in legal decision making With its traditional emphasis on the letter of the law and the immutable stability of a text as legal foundation law has been slow to take the pragmatic perspective namely the language user's experience and activity in making meaning More accustomed to literal than to pragmatic notions of meaning that is in the text rather than constructed by speakers and hearers the disciplines of law may be culturally resistant to the pragmatic turn By bringing together the different but complementary perspectives of pragmatists and lawyers this book addresses the issue of to what extent legal meaning can be productively analysed as deriving from resources beyond the text beyond the letter of the law This collection revisits the feasibility of the notion of literal meaning for legal interpretation and at the same time the feasibility of pragmatic meaning for law Can explications of pragmatic meaning support court actions in the same way concepts of literal meaning have traditionally supported statutory interpretations and court judgements What are the consequences of a user based view of language for the law in both its practices of interpretation and its definition of itself as a field Readers will find in this collection means of approaching such questions and promising routes for inquiry into the genre and field specific characteristics of inference in law In many respects the problem of literal vs pragmatic meaning confined to the text vs reaching beyond it will appear to parallel the dichotomy in law between textualism and intentionalism There are indeed illuminating connections between the pair of linguistic terms and the more publicly controversial legal ones But the parallel is not exact and the linguistic dichotomy is in any case anterior to the legal one Even as linguistic pragmatic investigation may serve legal domains the legal questions themselves point back to central conditions of all linguistic meaning
