The Syntax of Hungarian Noun Phrases Tibor Laczkó, 1995 The book offers a syntactic analysis of Hungarian noun phrases containing various types of argument taking predicates within the theoretical framework of Lexical Functional Grammar It investigates the nature of the possessor grammatical function and proposes that it should be treated as semantically unrestricted The book also explores the rules which determine the possible ways of realizing oblique arguments and adjuncts of derived nominals In addition it formulates a new account of the basic organizing principle of the use of certain participles in Hungarian noun phrases **Themes in Greek Linguistics II** Brian D. Joseph, Geoffrey C.

Horrocks, Irene Philippaki-Warbuton, 1998-01-01 This volume brings together 11 original papers on a variety of themes in Greek linguistics covering phonology morphology syntax and semantics both synchronically and diachronically Collectively these papers report on recent advances in the study of Greek grammar within the framework of generative grammar and provide insights into such diverse topics as the analysis of consonant clusters the representation of stress the status of inflectional features the relationship between compounds and projection derived nominals the occurrence of weak clitic pronouns in questions small clauses focus constructions word order the placement of clitics in Cappadocian dialects and Medieval Greek relativisation strategies Together they show that Greek is a vital contributor to issues of current controversy in grammatical theory *Themes in Greek Linguistics* Brian D. Argument Structure in Hungarian István Kenesei, 2001 *Proceedings of the ... West Coast Conference on Formal Linguistics*, 1999 **Argument Selection** Gábor Alberti, 1997 A new thematic theory is demonstrated in this book Thematic theories and their antecedents Gruber 1965 Fillmore 1968 are to account for morphosyntactic phenomena concerning argument structures whose determining factors are likely to be of a semantic nature origin But what is the relevant semantic information And how is it to be captured and formalized As is shown by the wide variety of competing current thematic theories there is no consensus upon these crucial questions The novel starting point proposed in this book is the creation of a semantic basis where traditional roles Agent Patient Instrument etc are dispensed with Instead a special comparative analysis of morphologically related argument structure versions will provide the relevant semantic information which makes it possible to associate argument frames with rich internal structures via exact formal calculations Abstract positions in these internal structures are substituted for thematic roles in harmony with the spirit of Saussure's structuralism

Nominalisierungen und Argumentvererbung im Deutschen und Ungarischen Imre Szigeti, 2013-02-07 In dieser Arbeit wird die Frage aufgeworfen wie weit das syntaktische Verhalten der abgeleiteten Wörter durch die thematische Struktur der ihnen zu Grunde liegenden Basen beeinflusst wird Um eine Antwort auf diese Frage zu finden werden deutsche und vergleichbare Derivate des Ungarischen untersucht Für die Untersuchung werden eine semantisch fundierte Verbklassifikation sowie eine konzeptuelle Hypothese vorausgesetzt Nach dieser besteht die Funktion der Suffixe oder Affixe

darin da sie die konzeptuelle Struktur der Basis modifizieren wobei der thematischen Struktur des Ausgangselementes eine zentrale Rolle zukommt. Es wird detailliert zu zeigen versucht, da man die Derivationseinschränkungen der genannten Wortbildungsmuster und die Vererbung der den Basen zu Grunde liegenden Argumente auf die angesprochene Modifizierung durch die Suffixe zurückschließen kann. Das spricht dafür, da das syntaktische Verhalten der abgeleiteten Wörter letztlich nicht in der Syntax seinen Grund hat. Diese Folgerung lässt weitere Schlüsse auf den Status der Morphologie zu.

Mood Choice in Complement Clauses Toth, 2008. The volume investigates various approaches to mood distribution and mood variation in lexically selected complement clauses with special reference to Hungarian data. Its primary aim is to show that semantic factors play a crucial role in mood choice. The analysis focuses on the indicative/non-indicative opposition; the latter category includes the subjunctive, the imperative and the conditional. Critical discussion, revision and elaboration of previous semantic approaches pertaining to mood choice are presented with particular emphasis on the applicability of the various analyses to mood phenomena in Hungarian. The author proposes two novel hypotheses about mood choice in Hungarian complement clauses.

Neue Ansätze Zu Linguistischer Evidenz András Kertész, Csilla Rákosi, 2008. The evaluation of linguistic theories depends heavily on what kind of data can be regarded as evidence either for or against their hypotheses. The question of what data types linguistic theories use and which of these types are acknowledged as evidence is accordingly one of the most fundamental and most widely discussed problems of contemporary linguistics. The aim of this volume is to shed fresh light on this problem by presenting the first findings of a research project. Part I consists of state-of-the-art studies critically analysing current views on the topic. Part II includes case studies which highlight how the conclusions of the state-of-the-art studies may motivate novel and sophisticated accounts of the particular linguistic issues investigated. Die Bewertung linguistischer Theorien hängt in einem bedeutenden Maße davon ab, welche Datentypen als Evidenz für oder gegen ihre Hypothesen herangezogen werden. Die Frage, welche Datentypen linguistische Theorien verwenden und welche von diesen als Evidenz gelten, ist dementsprechend eines der schwerwiegendsten und meistdiskutierten Grundlagenprobleme der gegenwärtigen Linguistik. Dieser Band setzt sich zum Ziel, durch die Darstellung der ersten Resultate eines Forschungsprojekts neues Licht auf dieses Problem zu werfen. Teil I besteht aus Forschungsberichten, die sich mit jüngsten Ansichten kritisch auseinandersetzen. Teil II enthält Fallstudien, die illustrieren sollen, auf welche Weise die Ergebnisse der Forschungsberichte neuartige und ausgefeilte Analysen der jeweiligen linguistischen Erscheinungen motivieren.

Grammatik des Deutschen im europäischen Vergleich Lutz Gunkel, Adriano Murelli, Susan Schlotthauer, Bernd Wiese, Gisela Zifonun, 2017-03-20. Das Deutsche gehört zu den besonders gut erforschten Sprachen der Welt. Neue Erkenntnisse über seine Grammatik sind am ehesten durch eine Ausweitung der Perspektive über den traditionellen Ansatz hinaus zu erwarten. Im vorliegenden Handbuch zur Nominalgrammatik geschieht dies auf dem Weg des Sprachvergleichs mit anderen europäischen Sprachen in erster Linie den Kontrastsprachen Englisch, Französisch, Polnisch und Ungarisch. Die

Grammatik schließt an die typologische Forschung an und orientiert den Vergleich an allgemeinen semantisch pragmatischen Funktionsbereichen so genannten funktionalen Domänen wie Referenz Identifikation Modifikation Behandelt werden nominale Wortklassen wie Substantiv Adjektiv Pronomen das nominale Klassifikationssystem mit Genus Numerus und Kasus die nominale Flexionsmorphologie sowie nominale Syntagmen mit dem Schwerpunkt der NP Syntax Der Vergleich stellt die Optionen im Vergleichsspektrum heraus von denen das Deutsche Gebrauch macht zeigt aber auch welche Möglichkeiten nicht realisiert sind und lässt somit das typologische Profil dieser Sprache im Detail erkennen **Bibliographie**

linguistique de l'année 1997/Linguistic Bibliography for the Year 1997 Mark Janse, Sijmen Tol, 2001-12-31

Bibliographie linguistique Linguistic Bibliography is the annual bibliography of linguistics published by the Permanent International Committee of Linguists under the auspices of the International Council of Philosophy and Humanistic Studies of UNESCO With a tradition of more than fifty years the first two volumes covering the years 1939 1947 were published in 1949 1950 Bibliographie linguistique is by far the most comprehensive bibliography in the field It covers all branches of linguistics and related disciplines both theoretical and descriptive from all geographical areas including less known and extinct languages with particular attention to the many endangered languages of the world Up to date information is guaranteed by the collaboration of some fifty contributing specialists from all over the world With over 23 000 titles arranged according to a detailed state of the art classification Bibliographie linguistique remains the standard reference book for every student of language and linguistics *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences*, 1997 Studies in Syntax and Semantics F. Kiefer, 2012-12-06 In the last decade a profound change has occurred in linguistic science Not only have old problems been tackled from an entirely new point of view but also quite a few new fields of linguistic research have been opened The common characteristic of the majority of the theories and methods developed recently is the search for a more adequate description of language Adequacy does not mean simply that the theory must conform to the facts It must also meet the general requirements of present day theories coherence clear cut notions rigor of presentation It has also become abundantly clear that linguistic research cannot be content with the registration and classification of linguistic phenomena In one way or another linguistics must try to explain the deep seated regularities in language which in general do not appear on the surface in some straightforward way Therefore we find the attribute deep very often in contemporary linguistic literature Linguistic theories seek an explanation for the observed facts in terms of a system of hypotheses about the functioning of language As research proceeds these will undergo essential changes Some of them will be waived others complemented The papers of the present volume follow these general principles of linguistic theory though they may differ from each other in the way of presentation considerably Some of the papers make use of the framework of transformational generative grammar e.g. Kuroda Perlmutter others approach the pertinent problem from a different angle e.g. Dupraz and Rouault Apresyan Mel'cuk and Zol'kovski **Hungarian Sentence**

Prosody and Universal Grammar László Hunyadi, 2002 The book presents a generative account of the relation between the prosodic and syntactic structure in Hungarian It shows that in order to account for the various scope readings of a single syntactic structure one has to consider the respective prosodic realizations suggesting a direct relation between Phonetic Form and Logical Form Universal principles of this relation are supported by data from a number of languages Contents Preliminary Thoughts on Prosody On Stress and its Manifestations Stress and Syntactic vs Semantic Categories Metrical Phonology and the Syntax of Hungarian The Outlines of a Metrical Model of Hungarian Sentence Complex Prosodic Structures and their Logical Interpretation Operator Scope and Prosody Logical Form Prosody and Universal Implications

Complementizer Semantics in European Languages Kasper Boye, Petar Kehayov, 2016-07-11

Complementizers may be defined as conjunctions that have the function of identifying clauses as complements In recent years it has become increasingly clear that they have additional functions Some of these functions are semantic in the sense that they represent conventional contributions to the meanings of the complements The present book puts a focus to these semantic complementizer functions
