

Serial Data Communications Between Microcomputer Systems in Heavy-Duty Vehicle Applications

Foreword

The SAE group responsible for the content of this recommended practice was revised to the SAE Low Speed Communications Network Subcommittee sponsored by the SAE Truck and Bus Electrical and Electronics Committee. This Document was revised to comply with the new SAE Technical Standards Board format.

Earlier versions of this document stated: This SAE/TMC Joint Recommended Practice has been developed by the Truck and Bus Electronic Interface Subcommittee of the Truck and Bus Electrical Committee and by the S.1 Study Group of the Maintenance Council. The objectives of the subcommittee are to develop information reports, recommended practices, and standards concerned with the interface requirements and connecting devices required in the transmission of electronic signals and information among truck and bus components.

Objectives: Some of the goals of the subcommittee in developing this document were to:

- Minimize hardware cost and overhead.
- Provide flexibility for expansion and technology advancements with minimum hardware and software impact on in-place assemblies.
- Use, where practical, accepted electronics industry standard hardware and protocol to give designers maximum interchangeability.
- Provide a high degree of electromagnetic compatibility.
- Provide original equipment manufacturers, suppliers, and aftermarket suppliers the flexibility to customize for product individuality and for proprietary considerations.
