

DEPENDENCY THEORY AND THE THIRD WORLD

**AJAYI AMOS KEHINDE,
DEPARTMENT OF POLITICAL SCIENCE,
OBAFEMI AWOLOWO UNIVERSITY, ILE-IFE.**

INTRODUCTION

The dependency school arose as a reaction to methropolitan or modernization school tendency to attribute all problems of underdevelopment to the periphery. Basically, there are two school of thought in Latin America and those here been classified structural and dependency theories. The structural focuses on the neo-classical analysis of development which do not favour them. This school was pre-dominant around the United Nation Economic Commission for Latin America (UNECLA).

However, another group came up and focus on the criticisms of the modernization school, apart of their intellectual heritage, apart of their intellectual heritage, were strands of the Marxist thought even though they were not classified as Marxist, they used his methodology and analysis.

Another factors that contributed to the Marxist school were Marxism and Russia revolutionaries, as well as continued intervention of USA into the socio-political activities of Latin America nations. The dependency school was pioneered by Raul Presbixh on agentive economist and the director of ECLA in the 1950s. The theory rejected the ideological postulations of the modernization school and argued that world economic is divided into developed, metropolitan cover and underdeveloped or Periphery.

Depravity from the conventional approach of the modernization school, early dependency theorist argued that Latin America was adversely affected by its trade relationship with the industrialized countries of the world production system made

Understanding Third World Politics, Third Edition B. C. Smith,2009-05-18 An extensively revised edition of an acclaimed textbook on developing societies Understanding Third World Politics Brian Smith,2013-01-15 *Understanding*

Third World Politics gives a comprehensive and critical introduction to the main theories that have been used to understand political change in developing countries. It examines the variety of political institutions and processes in the Third World and critically evaluates the major explanatory frameworks used by political scientists to understand them. The discussion is supported throughout by a wide range of topical case studies from around the world including features on class in Brazil and democracy in India. The book concludes by considering the political instability that so frequently plagues poor countries and by identifying the conditions required to establish democratic stability. The fourth edition has been revised and updated throughout to take account of key political developments including foreign interventions in the Middle East, state repression in North Africa and the secession of South Sudan. Engagingly written, this text offers a clear and theoretically rigorous introduction to the politics of the Third World.

The Pharmaceutical Industry and Dependency in the Third World Gary Gereffi, 2017-03-14 Gary Gereffi first explains how foreign corporations took over the flourishing Mexican steroid industry in the 1950s and 1960s and thwarted the country's later attempts to establish a more equitable distribution of industry benefits. In this valuable theoretical contribution, Professor Gereffi uses the Mexican industry's plight as a crucial case test for dependency theory. Originally published in 1983, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Public Administration in the Third World V. Subramaniam, 1990-06-26 This multi-author reference handbook gives a detailed, objective picture of the evolution, structure, and processes of public administration in representative Third World countries. Written by an international group of specialists with first-hand knowledge of the subject, it presents empirical studies of developing nations in Asia, the Middle East, North and Sub-Saharan Africa, the West Indies, and Latin America. The resulting data are shaped by the editor into a theoretical framework delineating the complex relationships of state bureaucracy and class in the Third World. Subramaniam's introduction provides a critical overview of development literature in the field. Each case study begins with an historical introduction and discusses the political, executive, and administrative structures and processes. Among the specific topics covered are public enterprises, administrative departments, personnel, financial administration, and regional and local administrative units. The majority of the systems studied are affected by the unregulated power of public enterprises, the persistence of colonial legacies, and the elitism of the bureaucracy. The concluding section relates these common elements to the sociohistorical characteristics of the middle class groups that dominate both politics and public administration. Offering new research findings and a useful theoretical synthesis, this study will promote a clearer understanding of the internal political processes of Third World nations and be of compelling interest to specialists and students concerned with Third
