Situating neoliberalism, debating the badlands

Wendy Larner

It has been a long time since the geographical literature on urban neoliberalism has given us a book as rigorous and exciting as Mustafa Dikeç's *Badlands of the Republic*. All too often when a new book appears in this genre we are confronted with familiar academic lenses drawing from regulation theory and other variants of neo-Marxism, and case studies of the American, Canadian and British cities that have become 'usual suspects' for the rest of the urban studies world – notably, New York, Chicago, Los Angeles, Toronto and London. In these studies neoliberalism is understood as an umbrella term that refers to the new emphasis on international competitiveness, marketisation and relatively unfettered economic growth. The argument is that these market-oriented formulations have given rise to a new role for cities in managing the relationships between global flows and networks and local economies and societies. In turn, this has had major implications for urban governance, urban landscapes and the built environment, and urban subjectivities. Discussions about topics as various as deindustrialisation, urban entrepreneurialism, the informational city, global cities, gentrification, socio-spatial polarisation, and creative cities are all now framed by macro-accounts of urban neoliberalism.

While these studies are based on valuable research that has helped us understand more about contemporary forms of urban governance, the content and composition of neoliberalism itself is taken for granted, and there is a strong tendency to identify cognate political projects in disparate places. One consequence has been that analyses of neoliberalism – whether theorised as policy,

politics or governmentality – often present strangely familiar findings and conclusions despite disparate geographical settings and empirical foci. As such they have tended to constitute neoliberalism as a homogenising process. More generally, the difficulty with the literature on neoliberalism, as Stephen Collier (2009) has recently argued, is that too often there is a 'knee jerk' assessment that involves identifying key aspects of contemporary forms of rule – such as entrepreneurialism, marketisation, public-private partnerships, or calculative practices – and then assuming what we are seeing is necessarily 'neoliberalism'. But as Mustafa Dikeç himself asks, what is it that makes these orientations specifically 'neoliberal' (p. 26)?

What we have in Dikeç's book is a novel conceptualisation of urban neoliberalism that draws on political sociology, cultural state theory and political philosophy in addition to more familiar geographical literatures. This is combined with an in-depth empirical analysis of French urban policy that examines its implications for the problems of social housing neighbourhoods in the suburbs of major cities. The result is an engrossing account of how the banlieues of France have been produced as particular kinds of urban space and, in particular, how a succession of urban policies has resulted in the consolidation of negative images about these areas. The book explores in meticulous detail how these urban spaces have changed over time, what this has meant for those living within these spaces, and how these space making practices have been continually contested. It is a richly theorised account of urban policy that refuses to make easy generalisations about the causes and consequences of urban neoliberalism, and works hard to identify and explain the specificities of the French experience. In particular, Dikeç shows how the French emphasis on republicanism has underpinned urban governance strategies and, in turn, the way in which this has reshaped urban social movements.

Urban Politics and Urban Policy Stephen Mark David, Paul Elliott Peterson, 1976

The Ungovernable City Douglas Yates, 1978 We confront an urban wilderness more formidable and resistant and in some ways more frightening than the wilderness faced by the pilgrims or the pioneers What Robert Kennedy warned in 1966 is ten years later more starkly true than ever As controversies about American cities rage this critique takes a hard unflattering look at the urban plight Those who expect facile answers utopian visions or panaceas should however be cautioned the book offers none What it does offer is an interior view of urban policy making and an example of the most astute kind of policy study Professor Yates argues that the urban policy making system is no longer capable of producing coherent decisions developing effective policies or implementing programs lack of money is not the underlying cause The real culprit has to do with contradictions fundamental to cities as political and social entities Historically cities evolved as melting pots developing haphazardly into loose structures composed of numerous antagonistic interests and forces Urban management has largely consisted of hasty responses to crisis situations rather than long range planning City governments are at once too decentralized for overall policy making and too centralized to be truly responsive to its citizenry By the same token they are both too independent of and too dependent on higher level government state federal for assistance The basic function and distinctive feature of urban government is its service delivery But here the system breaks down for the mayor does not entirely control the administrators and administrators cannot control the street level employees policemen firemen public school teachers Fragmentation instability these are the result The remedies are not simple and obvious as Yates repeatedly makes clear But if penetrating to the core of the problem is at all beneficial The Ungovernable City is a step in the right direction

Urban Politics and Urban Policy Robert L. Lineberry, I. Munck, Jens Lachmund, 2023-03-23 This book uses politics of urban knowledge as a lens to understand how professionals administrations scholars and social movements have surveyed evaluated and theorized the city identified problems and

shaped and legitimized practical interventions in planning and administration Urbanization has been accompanied and partly shaped by the formation of the city as a distinct domain of knowledge This volume uses politics of urban knowledge as a lens to develop a new perspective on urban history and urban planning history Through case studies of mainly 19th and 20th century examples the book demonstrates that urban knowledge is not simply a neutral means to represent cities as pre existing entities but rather the outcome of historically contingent processes and practices of urban actors addressing urban issues and the power relations in which they are embedded It shows how urban knowledge making has reshaped the categories rationales and techniques through which urban spaces were produced governed and contested and how the knowledge concerned became performative of newly emerging urban orders The volume will be of interest to scholars and students in the field of urban history and urban studies as well as the history of technology science and knowledge and of science studies
