Politics By Pressure:

The Politics of Ethnic Pressure Judith S. Goldstein, 2020-10-29 Originally published in 1990 The Politics of Ethnic Pressure examines and evaluates the lobbying activities of the American Jewish Committee AJC between 1906 and 1917 The AJC worked to confront two specific problems the outbreak of a series of programs against the Jews in Russia and the campaign of the restrictionists in the United States who sought to impede the entry of the new immigrants from eastern and southern Europe This book focuses on the lobbying activities of the AJC with respect to these issues and puts forward key questions as to why they cared about the Russian problem how they viewed their place within American society and how they lobbied on behalf of their Jewish interests Political Pressure, Rhetoric and Monetary Policy Philipp Maier, 2002-01-01 Philipp Maier offers an examination of the extent to which governments and various interest groups have exerted pressure on central banks The book looks in particular at the Deutsche Bundesbank which acted as the blueprint for the European Central Bank ECB and utilizes an original set of indicators to measure external pressure and support from the government and other institutions *Political Pressure and Economic Policy* Martin Holmes, 2016-06-23 Political Pressure and Economic Policy British Government 1970 1974 discusses the shift in British economic policy following the electoral victory of the Conservatives in 1970 It attempts to explain not just the immediate reasons for the policy reversals but also the political context in which they were made in terms of the difficulty of sustaining the Quiet Revolution policies when they so clearly appeared to contradict the post war Keynesian consensus to which the Conservative Party was still committed The book is organized into three parts Part I discusses the events leading up to the Quiet Revolution which involved major policy reversals that led the Conservative Party towards a path radically different from the status quo Part II examines specific policy changes such as passage of the Industrial Relations Act the U turn over industry policy the N minus 1 policy and the Health dilemma strategy Part III focuses on Mr Edward Heath s Prime Ministerial style of Government Pressure Groups and Political Culture (Routledge Revivals) Francis Castles, 2009-07-15 This volume first published in 1967 offers a new approach to the study of pressure groups whose importance in the British political system has been increasingly recognised in recent years Francis Castles seeks to throw light on this topic firstly by examining the theoretical approaches to an understanding of their role in the political process and secondly by presenting a number of specific studies For the first time in one small volume the reader can become acquainted with pressure groups in continental Europe Scandinavia the United States the totalitarian countries and the emergent nations The study is comprehensive in itself and also an invaluable guide to more detailed work in this field of political science **Comparative Politics** Mr. Rohit Manglik, 2024-02-12 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Political Pressures on**

Educational and Social Research Karen Trimmer, 2016-05-12 Political Pressures on Educational and Social Research draws upon a variety of theoretical and methodological approaches to consider the problems that can arise when research findings diverge from political directions for policy Chapters explore the impacts this can have on the researchers as well as the influence it has on the research including the methodology and the publication of results The book offers innovative ways of seeing how these connect overlap and interact revealing particular issues of concern for researchers and evaluators in the context of research internationally Key topics include the power and positioning of research evidence based policy development ethics and the importance of research that seeks to explore and discover knowledge The book is divided into two sections The first presents chapters from international academics which provide a theoretical underpinning and discussion of power policy ethics and their influence on research resourcing autonomy purpose and methodology The second section explores specific case studies and instances from the authors own experiences in the field This book offers an interesting and enlightening insight into the sometimes political nature of research and will appeal to researchers evaluators and postgraduate students in the fields of education and the social sciences It will be of particular interest to those studying research methods

The Politics of Institutional Weakness in Latin America Daniel M. Brinks, Steven Levitsky, María Victoria Murillo, 2020-06-11 Analysts and policymakers often decry the failure of institutions to accomplish their stated purpose Bringing together leading scholars of Latin American politics this volume helps us understand why The volume offers a conceptual and theoretical framework for studying weak institutions It introduces different dimensions of institutional weakness and explores the origins and consequences of that weakness Drawing on recent research on constitutional and electoral reform executive legislative relations property rights environmental and labor regulation indigenous rights squatters and street vendors and anti domestic violence laws in Latin America the volume s chapters show us that politicians often design institutions that they cannot or do not want to enforce or comply with Challenging existing theories of institutional design the volume helps us understand the logic that drives the creation of weak institutions as well as the conditions under which they may be transformed into institutions that matter

Politics, Process, and American Trade Policy Sharyn O'Halloran, 1994 Relying on the New Economics of Organizations NEO or New Institutionalism Politics Process and American Trade Policy shows why conventional models do not adequately describe the formation of American trade policy Rejecting both the pressure group model and the presidential ascendancy model this study s institution based approach emphasizes the influence Congress has in setting trade policy connecting theories of institutional design with the procedural details of regulating trade policy To reach her conclusions Sharyn O Halloran uses time series data and econometric analysis to test a set of propositions concerning trade policy She

examines detailed case studies and provides a comprehensive history of the institutions that govern trade policy making Unlike most scholars who see trade policy as disparate and ad hoc O Halloran is able to explain both early and contemporary American trade policy in a consistent and integrated fashion She argues that a single set of procedures may lead to apparently different outcomes under differing initial conditions therefore the key is to identify the common logic derived from constitutional imperatives that underlies all policy outcomes

The Politics of Representation in the Global Age Peter A. Hall, Wade Jacoby, Jonah Levy, Sophie Meunier, 2014-04-07 How has the process of political representation changed in the era of globalization The representation of interests is at the heart of democracy but how is it that some interests secure a strong voice while others do not While each person has multiple interests linked to different dimensions of his or her identity much of the existing academic literature assumes that interests are given prior to politics by a person's socioeconomic institutional or cultural situation This book mounts a radical challenge to this view arguing that interests are actively forged through processes of politics The book develops an analytic framework for understanding how representation takes place based on processes of identification mobilization and adjudication and explores how these processes have evolved over time Through a wide variety of case studies the chapters explore how actors identify their interests mobilize them into action and resolve conflicts among them
