**The Political Economy of Sustainable Development** Timothy Cadman, Lauren Eastwood, Federico Lopez-Casero Michaelis, Tek Narayan Maraseni, Jamie Pittock, Tapan Sarker, 2015-11-27 Since the Rio Earth Summit of 1992 sustainable development has become the major policy response to tackling global environmental degradation from climate change to loss of biodiversity and deforestation Market instruments such as emissions trading payments for ecosystem

services and timber certification have become the main mechanisms for financing the sustainable management of the earth's natural resources. Yet how effective are they and do they help the planet and developing countries or merely uphold the economic status quo? This book investigates these important questions. Providing a comprehensive analysis and the latest research on sustainable development, the authors compare the divergent approaches to emissions trading. Included is a detailed investigation into illegal logging and the effectiveness of policy responses with an evaluation of different forest certification schemes. Biodiversity offsets and environmental payments are also explored. Integral to the book are interviews and opinions of the key stakeholders in the political economy of sustainable development. This uniquely comprehensive analysis of the governance quality of different sustainable development mechanisms, unprecedented in its panorama of comparative case studies, is essential reading for all those in the policy, academic, and non-governmental communities.

**Contemporary Economic Issues in Developing Countries** John Baffoe-Bonnie, Mohammed Khayum, 2003-04-30

Important lessons for policy makers are provided here as contributors evaluate the effectiveness of domestic economic policies and the recommendations of international organizations such as the World Bank regarding the economic development of developing countries. Challenges posed by debt problems, corruption, population dynamics, poverty, and the absence of adequate human and physical capital are highlighted. Contributors cast doubts on the conclusions of the prevailing theories of economic development with patterns of economic change over the course of the 20th century. Their findings point out the issue of inadequate social capability as a critical factor in understanding the lack of economic development in many developing countries. They suggest that contemporary theorizing tends to pinpoint necessary but insufficient conditions for the successful implementation of development strategies in these countries. **Petroleum**
