

Introduction to comparative politics, ch 7. Politics in Britain

- the government of UK was created in 1801 by merging England, Scotland, Wales and Ireland under a Parliament at Westminster in London
- Britain became democracy by evolution rather than revolution
- Britain has had two women prime ministers, Conservatives M. Thatcher and Theresa May, before America could elect a single women president
- Influence of British system of parliamentary democracy can be found in India, Australia, Canada, U.S.

CURRENT POLICY CHALLENGES

- In 2015, the Conservative Party led by PM David Cameron won an absolute majority of seats; Liberal Democrats collapsed and the official opposition party, Labour, suffered worst setback in more than three decades
- Cameron resigned as a prime minister 13 months later after failing to produce a majority vote in favor of the UK rejoining in the European Union
- Britain joined the EU in 1973, what was then a European Common Market
- PARLIAMENT IS SOVEREIGN: as long as the government of the day has the backing of a majority of members of parliament in the House of Commons, it can pass whatever laws it wants 1
- Westminster = where MPs, the prime minister and her Cabinet meet and work
- ups and downs of the British pound: significance of interdependence → the pound is managed by the official Bank of England, but because it is an international currency, statements by the PM do not determine its international value
- after the British vote to leave the EU, its value fell by more than 10 percent
- Gordon Brown; Labour party → became prime minister, but brought Labour to a big defeat in the 2010 general election
- George Osborne; the Conservative chancellor who succeeded Brown, gave priority to cutting the government's deficit in the expectation that this would promote growth in the private sector of the economy

Where does the Britain belong?

- Traditionally, answer is that Britain is a major world power having close ties with Commonwealth countries, the United States, and Europe
- COMMONWEALTH: after WWII, the British Empire was transformed in this free association of fifty-three sovereign states spanning five continents → the Commonwealth does not have the word British prefixed to its name; member states from Zambia to Jamaica, Australia and Bangladesh differ from each other in wealth, culture, and commitment to democracy; Commonwealth has no military or economic power, and its diplomatic influence is slight
- Zimbabwe left the Commonwealth (dictator Robert Mugabe)
- every British PM claims a special relationship with the U.S., House of Commons however recommended that the idea of a special relationship should be abandoned → Britain should be more willing to say no to the U.S. on those issues where two countries' interests and values diverge
- European countries are now Britain's major trading partner
- in the 80s, Margaret Thatcher successfully promoted the adoption of a single European market for trade in goods and services, but governments never showed a truly dedication
- Britain has kept the pond and rejected passport-free travel common in most continental European
