Politics Of Conservation 18971913

Patricia Nelson Limerick

Politics Of Conservation 18971913:

EPA-600/5 ,1974-02 **Harvard Guide to American History** Frank Freidel, Frank Burt Freidel, Richard K.

Showman, 1974 Editions for 1954 and 1967 by O Handlin and others **Nature and the English Diaspora** Thomas R. Dunlap, 1999-09-28 First published in 1999 this book is a comparative history of the development of ideas about nature particularly of the importance of native nature as a part of the culture in the Anglo settler countries of the United States Canada Australia and New Zealand It examines the development of natural history in the great nineteenth century expansion of settlement It explores settlers adaptations to the end of expansion and scientists shift from natural history to ecology Finally it analyzes the diffusion of ecology through the Anglo world and to the general population as well as the rise of environmentalism Addressing not only scientific knowledge but also popular issues such as hunting common names for plants and animals landscape painting and nature stories this book explores the ways in which English speaking settlers looked at nature in their new lands and at the place they gave it in their societies **Barry Goldwater and the Remaking of the American Political Landscape** Elizabeth Tandy Shermer, 2013-02-28 Nearly four million Americans worked on Barry Goldwater's behalf in the presidential election of 1964 These citizens were as dedicated to their cause as those who fought for civil rights and against the Vietnam War Arguably the conservative agenda that began with Goldwater has had effects on American politics and society as profound and far reaching as the liberalism of the 1960s According to the essays in this volume it's high time for a reconsideration of Barry Goldwater's legacy Since Goldwater's death in 1998 politicians pundits and academics have been assessing his achievements and his shortcomings The twelve essays in this volume thoroughly examine the life times and impact of Mr Conservative Scrutinizing the transformation of a Phoenix department store owner into a politician de facto political philosopher and five time US senator contributors highlight the importance of power showcasing the relationship between the nascent conservative movement's cadre of elite businessmen newsmen and intellectuals and their followers at the grassroots or sagebrush level Goldwater who was born in the Arizona Territory in 1909 was deeply influenced by his Western upbringing With his appearance on the national stage in 1964 he not only articulated a new brand of conservatism but gave a voice to many Americans who were not enamored with the social and political changes of the era He may have lost the battle for the presidency but he energized a coalition of journalists publishers women's groups and Southerners to band together in a movement that reshaped the nation *Corporate Power and the Environment* George A. Gonzalez, 2001-05-16 Environmental policy is broadly viewed as an oasis of democracy unspoiled by crass capitalism and undominated by corporate interests This book counters that view The focus of *Corporate Power and the Environment* focuses on how U S economic elites corporate decisionmakers and other individuals of substantial wealth shape the content and implementation of U S environmental policy to their economic and political benefit The author uses the management of the national forests and national parks as well as wilderness preservation policies and

federal clean air policies as case studies to show corporate power in action in even the purest of policy arenas The Legacy of Conquest: The Unbroken Past of the American West Patricia Nelson Limerick, 2011-02-07 Limerick is one of the most engaging historians writing today Richard White The settling of the American West has been perceived throughout the world as a series of quaint violent and romantic adventures But in fact Patricia Nelson Limerick argues the West has a history grounded primarily in economic reality in hardheaded questions of profit loss competition and consolidation Here she interprets the stories and the characters in a new way the trappers traders Indians farmers oilmen cowboys and sheriffs of the Old West meant business in more ways than one and their descendents mean business today **Selling Yellowstone** Mark Daniel Barringer, 2002 For as long as they have existed the national parks have been the scene of some of the most intensive commercial activity in the American West Selling Yellowstone recounts the story of such activities in our oldest park from the 1870s through the 1960s It is the first book to examine critically the role of business in the development of America's national parks demonstrating how profit driven entrepreneurs shaped the physical landscape of what is generally perceived as unaltered wilderness Jacket **The History of Large Federal Dams** David P. Billington, Donald C. Jackson, Martin V. Melosi, 2005 Explores the story of Federal contributions to dam planning design and construction **The Routledge Handbook of Tourism and Sustainability** C. Michael Hall, Stefan Gossling, Daniel Scott, 2015-02-11 Routledge Handbook of Tourism and Sustainability from C Michael Hall Stefan Gossling Daniel Scott is one of the winners of the ITB Book Awards 2016 in the category Specialist tourism literature Sustainability remains one of the major issues in tourism today Concerns over climate and environmental change the fallout from the global economic and financial crisis and the seeming failure to meeting UN Millennium development goals have only reinforced the need for more sustainable approaches to tourism however they be defined Given the centrality of sustainability in tourism curricula policies research and practice it is therefore appropriate to prepare a state of the art handbook on the relationship between tourism and sustainability This timely Handbook of Tourism and Sustainability is developed from specifically commissioned original contributions from recognised authors in the field providing a systematic guide to the current state of knowledge on this area It is interdisciplinary in coverage and international in scope through its authorship and content The volume commences with an assessment of tourism's global environmental e.g. climate emissions energy use biodiversity water use land use and socio-economic effects e.g. economic impacts employment and livelihoods culture This then provides the context for sections outlining the main theoretical frameworks and constructs that inform tourism and sustainability management tools and approaches and the approaches used in different tourism and travel industry sectors The book concludes by examining emerging and future concerns in tourism and sustainability such as peak oil post carbon tourism green economy and transition tourism This is essential reading for students researches and academics interested in the possibilities of sustainable forms of tourism and tourism's contribution to sustainable development Its assessment of tourism's global impact

along with its overviews of sectoral and management approaches will provide a benchmark by which the sustainability of tourism will be measured for years to come

Collecting Nature Andrew G. Kirk, 2001 Finds in the history of Denver's Conservation Library a microcosm of the growth of the environmental movement as a whole [Public Lands Bibliography](#) United States. Bureau of Land Management, 1962

Land Ownership Patterns and Their Impacts on Appalachian Communities, 1981

When Money Grew on Trees Greg Gordon, 2014-04-02 Born in the timber colony of New Brunswick Maine in 1848 Andrew Benoni Hammond got off to an inauspicious start as a teenage lumberjack By his death in 1934 Hammond had built an empire of wood that stretched from Puget Sound to Arizona and in the process had reshaped the American West and the nation's way of doing business When Money Grew on Trees follows Hammond from the rough and tumble world of mid nineteenth century New Brunswick to frontier Montana and the forests of Northern California from lowly lumberjack to unrivaled timber baron Although he began his career as a pioneer entrepreneur Hammond unlike many of his associates successfully negotiated the transition to corporate businessman Against the backdrop of western expansion and nation building his life dramatically demonstrates how individuals more than the impersonal forces of political economy shaped capitalism in this country and in doing so transformed the forests of the West from functioning natural ecosystems into industrial landscapes In revealing Hammond's instrumental role in converting the nation's public domain into private wealth historian Greg Gordon also shows how the struggle over natural resources gave rise to the two most pervasive forces in modern American life the federal government and the modern corporation Combining environmental labor and business history with biography When Money Grew on Trees challenges the conventional view that the development and exploitation of the western United States was dictated from the East Coast The West Gordon suggests was perfectly capable of exploiting itself and in his book we see how Hammond and other regional entrepreneurs dammed rivers logged forests and leveled mountains in just a few decades Hammond and his like also built cities towns and a vast transportation network of steamships and railroads to export natural resources and import manufactured goods In short they established much of the modern American state and economy

The Ends of the Earth Donald Worster, 1988 A unifying discussion of our increasingly integrated global economy higher population levels and greater resource demands *Farming across Borders* Timothy P. Bowman, Kristin Hoganson, Laura Hooton, Josh MacFadyen, Todd Meyers, Peter S Morris, Andrew Dunlop, Alicia Marion Dewey, John Weber, Sonia Hernández, Rosa E Cobos, Matt Caire-Pérez, Paige Raibmon, Jason McCollom, Thomas D Isern, Suzanne Kelley, Anthony Carlson, Stephen Mumme, Tisa Anders, 2017-12-01 Farming across Borders uses agricultural history to connect the regional experiences of the American West northern Mexico western Canada and the North American side of the Pacific Rim now writ large into a broad history of the North American West Case studies of commodity production and distribution trans border agricultural labor and environmental change unite to reveal new perspectives on a historiography traditionally limited to a regional approach Sterling Evans has curated nineteen essays to explore the

contours of big agricultural history Crops and commodities discussed include wheat cattle citrus pecans chiles tomatoes sugar beets hops henequen and more Toiling over such crops of course were the people of the North American West and as such the contributing authors investigate the role of agricultural labor from braceros and Hutterites to women working in the sorghum fields and countless other groups in between As Evans concludes society as a whole no matter in what country often ignores the role of agriculture in the past and the present Farming across Borders takes an important step toward cultivating awareness and understanding of the agricultural economic and environmental connections that loom over the North American West regardless of lines on a map In the words of one essay we are tied together in a hundred different ways

California's Prodigal Sons Spencer C. Olin, 2022-08-19 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1968 *Castle on the Rock, 1881-1985* Mary Yeater Rathbun, 1990 *National Parks* Alfred Runte, 1997-01-01 This third edition includes a new essay on recent environmental issues and concerns especially as they center on Yellowstone National Park **Engaging the Everyday** John M. Meyer, 2015-03-20 An argument that environmental challenges will only resonate with citizens of affluent postindustrial countries if sustainability concerns emerge from everyday practices Far reaching efforts to address environmental issues rarely seem to resonate with citizens of the United States or other wealthy postindustrial societies In *Engaging the Everyday* John Meyer considers this impediment to action on environmental problems which he terms the resonance dilemma and argues that an environmental agenda that emerges from everyday concerns would resonate more deeply with ordinary citizens Meyer explores the contours of this alternative theorizing both obstacles and opportunities and then considering it in terms of three everyday areas of material practice land use transportation by automobile and home dwelling Adopting the stance of an inside critic neither detached theorist nor narrow policy advocate and taking an approach that he calls contested materiality Meyer draws on a variety of theoretical perspectives to construct a framework for understanding material practices He reimagines each of the three material practices in terms of a political idea for land property for automobiles freedom and for homes citizenship His innovative analysis offers a grounded basis for reshaping our talk about political concepts and values **The United States Forest Service**, 1973

Thank you for downloading **Politics Of Conservation 18971913**.
