Political Conversion Don Waisanen, 2018-04-20 Stories of religious conversion have been told for millennia Yet many prominent figures such as Ronald Reagan Hillary Clinton and Rick Perry have also used stories of their change from one political worldview to another as a communication strategy aimed at winning the hearts and minds of the public This book is about political conversion stories in public discourse in their evolution from and interactions with religion From a historical perspective it charts the development of conversion narratives from religious contexts to their contemporary applications as specifically political messages Since these narratives continue to be used in the culture wars this book examines several related autobiographies that contributed to the use of this strategy in contemporary U S politics Each case shows how shifts during the postwar period called for conversion texts under varying guises and illustrates how and why the majority of these stories have been of conversions from the ideological left to the right Examining political conversion as a form of public persuasion Political Conversion ultimately provides insight into what these types of civic religious stories mean for democratic communication and communities

Sipos, Mark Williams, 2021-06-17 This book approaches the concept of tenkō political conversion as a response to the global crisis of interwar modernity as opposed to a distinctly Japanese experience in postwar debates Tenkō connotes the expressions of ideological conversion performed by members of the Japanese Communist Party starting in 1933 whereby they renounced Marxism and expressed support for Japan's imperial expansion on the continent Although tenkō has a significant presence in Japan's postwar intellectual and literary histories this contributed volume is one of the first in English language scholarship to approach the phenomenon International perspectives from both established and early career scholars show tenkō as inseparable from the global politics of empire deeply marked by an age of mechanical reproduction mediatization and the manipulation of language Chapters draw on a wide range of interdisciplinary methodologies from political theory and intellectual history to literary studies In this way tenkō is explored through new conceptual and analytical frameworks including questions of gender and the role of affect in politics implications that render the phenomenon distinctly relevant to the contemporary moment Tenkō Cultures of Political Conversion in Transwar Japan will prove a valuable resource to students and scholars of Japanese and East Asian history literature and politics

Comparative Government and Politics Mohd Shafi Bhat, The discipline of Comparative Politics is becoming popular owing to the utilization of more and more sophisticated tools for understanding and explaining Political Reality Inter disciplinary focus on the themes of political significance has been responsible for explaining the frontiers of Political Science in the direction of an empirical study of several uncultivated regions considered as non nation areas The outcome is that traditional approaches to the study of politics resting primarily on the foundations of history ethics and law are being replaced by new approaches drawing inspiration from the varied disciplines of Social Sciences like Sociology Economics and Psychology The trend is towards taking the study of politics to the level of a scientific enquiry into the phenomenon of power In modern times the study of Modern Politics has assumed significance because of remarkable developments both at national and international levels of politics The decline of authoritarian and totalitarian regimes and the spread of democracy in and

around the world have added new dimensions to the core subject of politics. These dynamics in the politics have become the order of the day which highlights the existence and role of various political and Para political institutions in the world politics. What becomes important is that the scope of subject has expanded which has helped in investigating and analyzing the working of the states in the present age of democratization, modernization, liberalization and globalization. The changes in the domain of the subject are momentous and profound. The present volume is one such attempt to highlight and deal with the varied concerns and notions of Comparative Politics.

Creativity and Limitation in Political Communities Ignas Kalpokas, 2017-10-16

There is an inherent tension between popular and establishment powers in political communities. With anti establishment sentiment on the rise across Western democracies, exploring the underpinnings of this dualism and rethinking theories of political life within states is of paramount importance. By combining the theories of Carl Schmitt and Benedict Spinoza, this book develops a framework of continuous reproduction whereby the two powers simultaneously hold one another in tension and supersede one another. In the same vein, political communities are shown to be perpetually caught in a cycle of creativity, contestation, derived primarily from Schmitt, the tragic groundlessness of politics, and limitation, derived primarily from Spinoza, as a quasi theological belief in the status quo. Providing a novel theoretical framework explaining the workings of democratic politics, this book also offers a non traditional reading of Spinoza and Schmitt. Whereas traditionally both have been treated as almost polar opposites, here they are held in creative tension, providing equally important building blocks for the proposed theory. By furthering their analysis, the author creates a new theory of political action.
