## Politics Of Foreign Aid:

**The Politics of Foreign Aid** Muḥammad Rabī', 1988-12-14 United States aid to Israel averages a staggering 21 billion per year Yet as this insightful volume explains that aid has failed to serve both U S and Israeli interests The Politics of Foreign Aid discusses how the appropriation of foreign aid is often controlled by lobbyists and U S domestic concerns rather than by Israeli needs This clear and thorough examination begins with a description of the objectives major programs and historical background of U S aid to Israel military aid economic aid and private grants and subsidies The final section analyzes the effect that foreign aid has had on Israel and predicts the role that aid will play in Israel's future Finally Rabie provides suggestions about how to change the role of lobbyists in influencing foreign policy [The Politics of United States Foreign Aid](#) George M. Guess, 2010-11-29 First published in 1987 this reissue explores contemporary United States foreign aid policies and thinking in the Reagan era The author argues that aid policy is often confused as a result of bureaucratic decision making processes The book contrasts the experience of the many countries where aid giving has produced unwished for effects with the few countries where the desired results have occurred The author concludes by arguing for a new approach to aid giving by the United States *The Politics of Foreign Aid* John White, 1974

**USAID and the Politics of Foreign Aid: Who Benefits and Who Pays?** Patrick Wanjiku, 2025-02-06 Foreign aid is often seen as an act of goodwill but what if it serves a deeper political agenda USAID and the Politics of Foreign Aid uncovers the untold story behind U S development funding USAID has played a pivotal role in shaping international relations from Cold War diplomacy to modern global conflicts But is its mission truly humanitarian or is it a tool for advancing U S interests This book explores how aid is allocated who benefits most and the hidden costs borne by recipient nations Through in depth analysis case studies and geopolitical insights Patrick Wanjiku exposes the power struggles economic dependencies and strategic maneuvers that define international aid This book is a must read if you want to understand the real impact of foreign assistance Dive into this critical exploration today and rethink everything about foreign aid *The Domestic Politics of Foreign Aid* Erik Lundsgaarde, 2013 This book explains the choices that states make concerning the volume of development aid they provide and what types of priorities are supported with this assistance The core argument of the book is that aid choices are a product of domestic politics in donor countries which involve a variety of actors that differ in character across the donor community *Foreign Aid* Carol Lancaster, 2008-09-15 A twentieth century innovation foreign aid has become a familiar and even expected element in international relations But scholars and government officials continue to debate why countries provide it some claim that it is primarily a tool of diplomacy some argue that it is largely intended to support development in poor countries and still others point out its myriad newer uses Carol Lancaster effectively puts this dispute to rest here by providing the most comprehensive answer yet to the question of why governments give foreign aid She argues that because of domestic politics in aid giving countries it has always been and will continue to be used to achieve a mixture of different

goals Drawing on her expertise in both comparative politics and international relations and on her experience as a former public official Lancaster provides five in depth case studies the United States Japan France Germany and Denmark that demonstrate how domestic politics and international pressures combine to shape how and why donor governments give aid In doing so she explores the impact on foreign aid of political institutions interest groups and the ways governments organize their giving Her findings provide essential insight for scholars of international relations and comparative politics as well as anyone involved with foreign aid or foreign policy

**More Than Altruism** Brian H. Smith, 2014-07-14 As government officials and political activists are becoming increasingly aware international nonprofit agencies have an important political dimension although not self serving these private voluntary organizations PVOs and nongovernmental organizations NGOs seek social changes of which many of their financial contributors are unaware As PVOs and NGOs receive increasing subsidies from their home governments in the United States Canada and Europe they are moving away from short term relief commitments in developing countries and toward longer term goals in health education training and small scale production Showing that European and Canadian NGOs focus more on political change as part of new development efforts than do their U S counterparts Brian Smith presents the first major comparative study of the political aspect of PVOs and NGOs Smith emphasizes the paradoxes in the private aid system both in the societies that send aid and in those that receive it Pointing out that international nonprofit agencies are in some instances openly critical of nation state interests he asks how these agencies can function in a foreign aid network intended as a support for those same interests He concludes that compromises throughout the private aid network and some secrecy make it possible for institutions with different agendas to work together In the future however serious conflicts may develop with donors and nation states Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

**The Politics of Foreign Aid** John Alexander White, 1974-06 Theory and Politics of Foreign Aid in the United States Alice Greschko, 2017-08-14 Seminar paper from the year 2013 in the subject Politics Topic Peace and Conflict Security grade 1.0 University of Wroclaw language English abstract This term paper deals with the question if development assistance can be seen as an effective response to global terrorism after the September 11 attacks However the main focus will be set on the foreign aid of the USA since the direct political reactions after the terrorist attacks had a bigger impact than the ones of the European Union or other states in spite of the terrorist attacks in London and Madrid Furthermore it is important to focus on a rather narrow and clear aspect in order to achieve a deepened discourse instead of a superficial catch all debate which could not be provided properly with the formal limitations of this paper anyway In order

to answer the question in the following chapter will be briefly described how US aid was provided before 9 11 including the most important countries and methods applied to achieve the goals Afterwards the shift of perspective in foreign policy and the related aid allocation will be presented while the increased effort and the outcomes will be portrayed Finally concluding remarks will summarize the findings and arguments of this essay The Al Qaeda terrorist attacks against the United States of America on September 11th 2001 changed worldwide political dynamics and the perception of political challenges and issues in regions in which mainly Muslims live The symbolic attack of the extremists against the Western world opened the debate why such hatred developed and more important how the repetition of such events could be avoided in the future While the Bush administration quickly and publicly decided to intervene militarily in Iraq and Afghanistan in order to find the responsible ones behind the attacks it has been concluded as well to work on the security of US citizens through development assistance Reconciliation the promotion of democracy and the increase of the education level in regions in which Muslim extremist were trained and radicalized have been perceived as key aspects of the war on terror going beyond the military classic concept of war Nevertheless military forces have spent more than a decade in Afghanistan and left Iraq earlier with a poor administrative state A possible connection between violence attacks and humiliation and the present forces supposedly has been observed by the Muslim community after cases of torture by soldiers became public which appears to be a contradiction to the noble goal of the promotion of peace freedom and security

**The Politics of Foreign Aid in India** Philip John Eldridge, 1969      Transforming Foreign Aid Carol Lancaster, 2000 The phenomenon of foreign aid began at the end of World War II and has survived the Cold War How should the United States now spend its foreign aid to support its interests and values in the new century In this study Carol Lancaster takes a fresh look at all US foreign aid programs and asks whether their purposes organization and management are appropriate to US interests and values in the world of the 21st century Lancaster finds that US aid in the new century if it is to be an effective tool of US foreign policy needs to be transformed Its purposes need to be refocused and its organization and management brought into line with those purposes Those purposes include support for peace making addressing transnational issues providing for humane concerns and responding to humanitarian emergencies Traditional programs aimed at promoting development democracy and economic and political transitions in former socialist countries will not disappear but they will have less priority than in the past These new sets of purposes promoting both US interests and values abroad also offer a policy paradigm around which a new political consensus can be created that will support US aid in the 21st century Transforming Foreign Aid should be of particular interest to professors students and researchers of international affairs foreign policy political science and political economy

**The Politics of Foreign Aid in the Brazilian Northeast** Riordan Roett, 1972      The Politics of American Foreign Aid Michael Kent O'Leary,      **The Politics of Foreign Aid** John Dickey Montgomery, 1967      *Communicating National Image through Development and Diplomacy* James Pamment, Karin Gwinn Wilkins, 2018-05-07 This edited collection

draws upon interdisciplinary research to explore new dimensions in the politics of image and aid. While development communication and public diplomacy are established research fields, there is little scholarship that seeks to understand how the two areas relate to one another. However, international development doctrine in the US, UK, and elsewhere increasingly suggests that they are integrated or at the very least should be at the level of national strategy. This timely volume considers a variety of cases in diverse regions, drawing upon a combination of theoretical and conceptual lenses that combine a focus on both aid and image. The result is a text that seeks to establish a new body of knowledge on how contemporary debates into public diplomacy, soft power, and the national image are fundamentally changing, not just the communication of aid but its wider strategies, modalities, and practices.

*Foreign Aid in the Age of Populism* Viktor Jakupec, Max Kelly, 2019-02-07

Across the world, the Western-dominated international aid system is being challenged. The rise of right-wing populism, de-globalisation, the advance of illiberal democracy, and the emergence of non-Western donors onto the international stage are cutting right to the heart of the entrenched neoliberal aid paradigm. *Foreign Aid in the Age of Populism* explores the impact of these challenges on development aid, arguing that there is a need to bring politics back into development aid, not just the politics of economics but power relations internally in aid organisations, in recipient nations, and between donor and recipient. In particular, the book examines how aid agencies are using Political Economy Analysis (PEA) to inform their decision-making and to push aid projects through, whilst failing to engage meaningfully with wider politics. The book provides an in-depth critical analysis of the Washington Consensus model of political economy analysis, contrasting it with the emerging Beijing Consensus and suggesting that PEA has to be recast in order to accommodate new and emerging paradigms. A range of alternative theoretical frameworks are suggested, demonstrating how PEA could be used to provide a deeper and richer understanding of development aid interventions and their impact and effectiveness. This book is perfect for students and researchers of development, global politics, and international relations, as well as also being useful for practitioners and policy makers within government, development aid organisations, and global institutions.

**The Politics of Foreign Aid** John D. Montgomery, 1962

**The Politics of Foreign Aid** John Dickey Montgomery, 1962

*U.S. Economic Foreign Aid* David Porter, 2019-07-05

Originally published in 1990, this volume is a comprehensive study of United States foreign aid allocation from 1961 to 1983 and the significance it has for US Foreign Policy as a whole. As well as developing a theoretically consistent measure of poverty for the research, the book also examines the relationship between bilateral foreign aid and multilateral foreign aid. A number of theoretical issues in comparative politics, international relations, US domestic institutional decision-making, and the development of political and economic institutions are explored.

**Foreign Aid and Emerging Powers** Iain Watson, 2014-07-11

Current debates on emerging powers as foreign aid donors often fail to examine the myriad geopolitical, geoeconomic, and geocultural tensions that influence policies of Official Development Assistance (ODA). This book advocates a regional geopolitical approach to explaining donor-donor relationships and provides a multidisciplinary critical

assessment of the contemporary debates on emerging powers and foreign aid bringing together economic and geopolitical approaches in the light of the 2015 completion of the Millennium Development Goals MDGs Moving away from established debates assessing the advantages and disadvantages of foreign aid this book challenges the current geopolitical assumptions of the emerging powers concerning issues such as south south solidarity shared development experience and multipolarity It analyses how donor governments sell aid to recipients through enabling different cultural assumptions and soft power narratives of national identity and provides empirical evidence on agendas such as aid effectiveness aid for trade public private partnerships and green growth aid The book examines the role of and relationships between the leading traditional and emerging power Asian donors specifically and explores the different and contested perspectives and patterns of ODA policy through an alternative account of emerging power foreign aid to leading African and Asian recipients This book provides a valuable resource for postgraduate students and practitioners across disciplines such as development economics and geopolitics of development uniquely approaching the debate from the perspective of emerging powers and donors
