Nationalising Oil and Knowledge in Iran Mattin Biglari,2025-02-28 Iran s nationalisation of oil in 1951 was a key catalyst for the rise of resource nationalism as an animating force of global decolonisation expelling the Anglo Iranian Oil Company AIOC now known as BP after nearly fifty years of domination in southwest Iran Nationalising Oil Knowledge in Iran turns attention to the origins of nationalisation in the everyday struggles between the oil company and subaltern actors in the city of Abadan then home to the world s largest oil refinery and deeply imbricated in networks of colonialism and racial capitalism Engaging with energy history postcolonial subaltern studies and science technology studies the book focuses on the politics of expertise how nationalisation reproduced the epistemic coloniality of the oil company which rested on local dispossession social engineering as well as racial and gendered segregation It argues that nationalisation diverged from subaltern contestations of oil expertise in Abadan which presented a more fundamental challenge to colonial modernity

The Political Economy of Iran Farhad Gohardani, Zahra Tizro, 2019-03-07 This study entails a theoretical reading of the Iranian modern history and follows an interdisciplinary agenda at the intersection of philosophy psychoanalysis economics and politics and intends to offer a novel framework for the analysis of socio economic development in Iran in the modern era A brief review of Iranian modern history from the Constitutional Revolution to the Oil Nationalization Movement the 1979 Islamic Revolution and the recent Reformist and Green Movements demonstrates that Iranian people travelled full circle This historical experience of socio economic development revolving around the bitter question of Why are we backward and its manifestation in perpetual socio political instability and violence is the subject matter of this study Michel Foucault's conceived relation between the production of truth and production of wealth captures the essence of hypothesis offered in this study Foucault 1980 93 94 maintains that In the last analysis we must produce truth as we must produce wealth indeed we must produce truth in order to produce wealth in the first place Based on a hybrid methodology combining hermeneutics of understanding and hermeneutics of suspicion this monograph proposes that the failure to produce wealth has had particular roots in the failure in the production of truth and trust At the heart of the proposed theoretical model is the following formula the Iranian subject's confused preference structure culminates in the formation of unstable coalitions which in turn leads to institutional failure creating a chaotic social order and a turbulent history as experienced by the Iranian nation in the modern era As such the society oscillates between the chaotic states of socio political anarchy emanating from irreconcilable differences between and within social assemblages and their affiliated hybrid forms of regimes of truth in the springs of freedom and repressive states of order in the winters of discontent Each time after the experience of chaos the order is restored based on the emergence of a final

arbiter Iranian leviathan as the evolved coping strategy for achieving conflict resolution This highly volatile truth cycle produces the experience of socio economic backwardness and violence The explanatory power of the theoretical framework offered in the study exploring the relation between the production of truth trust and wealth is demonstrated via providing historical examples from strong events of Iranian modern history The significant policy implications of the model are explored This monograph will appeal to researchers scholars graduate students policy makers and anyone interested in the Middle Eastern politics Iran development studies and political economy **The Paradox of Plenty** Terry Lynn

Visibility in Contemporary Iran Women Religion Culture and the State Esmaeil Zeiny and Seyed Javad Miri bring together a collection of essays which offer a number of new perspectives on the role and power of Iranian women in refashioning the country s politics culture and religion This collection threatens the stereotypical representations of Iranian women and illustrates how high women leapt over the hurdles obstructing their progress and how much they have achieved to renegotiate the roles demanded by Iranian society **The Iranian Green Movement of 2009** Maral Karimi,2018-08-31 In

2009 Iran witnessed the Green Movement a popular uprising that challenged the status quo of the socio political structures of the Islamic Republic This movement which pre dates the Arab Spring uprisings in the region drove large numbers of Iranian citizens to the streets reminiscent of the 1979 revolution protesting the presidential election results This book investigates the impact of the political communications of the leaders of the uprising namely Mir Hossein Mousavi Zahra Rahnavard and Hojatol Islam Mehdi Karoubi on the movement Although the Green Movement was ultimately unsuccessful it produced valuable data for studying political uprisings and the role of social media in facilitating articulations of dissent especially in the Middle East This work is particularly significant since the cycle of protests surfaced again in 2017 2018 and Iran was yet again embroiled in violent dissent This book provides a historical link between the political discourse of Ayatollah Khomeini the founder of the current regime and that of the leaders of the Green Movement Such historical approach facilitates an understanding of the impact and implication of speech on key Iranian uprisings since the revolution of 1979 In other words this book asks was the discourse of the leaders of the Green Movement oriented towards building bridges or systematically distorted communication oriented to electoral success This work successfully tests the viability of a constellation of critical and cultural theories in the Iranian context More specifically Jurgen Habermas Theory of Communicative Action his conception of the Public Sphere as well as Anthony Giddens Theory of Structuration serve as the theoretical foundations of this inquiry Furthermore this book takes the unique approach of analysing YouTube videos of the protests for the counter hegemonic role played by this social media platform as well its broadcast capabilities in authoritarian regimes where mass media are in the service of the ruling class This study takes a Critical Discourse Analysis

approach to analyse the collected data The investigation uncovers evidence of systematic communication distortion in the public discourse of both Ayatollah Khomeini and the leaders of the Green Movement and discusses the impact of said distortions on the direction and shaping of the movement This book also offers a brief analysis of the 2018 protests in comparison with Green Movement and explores ways to unify the nation and move forward Iran Mining Laws and Regulations Handbook Volume 1 Strategic Information and Basic Laws IBP, Inc.,2017-09-21 2011 Updated Reprint Updated Annually Iran Mining Laws and Regulations Handbook
