The Global Politics of Sport Lincoln Allison, 2005 Sport presents one of the most advanced cases of globalisation arguably because there are fewer cultural and political obstacles to the development of trade and international power in sport than there are in other fields Thus there has been a change in the nature of the politics of sport since the end of the Cold War the subject must be rewritten to acknowledge a twenty first century world in which international sporting organisations and transnational corporations have become far more important than states The Global Politics of Sport presents a range of essays examining the emerging global political issues in twenty first century sport including The role and power of organisations such as FIFA and the IOC The influence of US exceptionalism The construction of global sports heroes Tensions developing within traditionally alternative sports in a global commercial culture The Global Politics of Sport presents new and fresh exploration of different conceptions of sport as a purely commercial activity and as an activity as embodying higher social and ethical values

Jonathan Grix,2017-08-24 This innovative new text examines sport's relationship with politics and argues that sport has always been political even as far back as antiquity However in the last 30 years there has been an unprecedented politicization of sport through increasing government intervention Jonathan Grix takes a comprehensive and engaging look at sport politics by examining state involvement in initiatives from sports mega events through to grass roots and community sport activities Providing an accessible introduction to this growing area of study the text examines a number of approaches to the topic including theories from Political Science Sociology and International Relations and adopts a critical framework throughout In doing so the text discusses the relationship between social capital and sport how governments use sport for non sporting objectives and the role of governance in sport policy Real world examples demonstrate just how entwined sport and politics are from ardent soccer fans effectively locked in by ever increasing ticket prices to taxpayer's money funding ever more extravagant international sports mega events to the moral and political implications of doping

Sisk, 2024-04-09 Sports have historically been part of a broader quest of regimes for prestige on the world stage but also to project hegemony and power in an anarchic international system While such historical trends of politicization of sports continue witness the nationalism on display at each Olympic Games today sports are equally seen as a strategic key for advancing human rights building peace strengthening social cohesion and fostering development International sports reside between a realist world of power and profit while simultaneously becoming an instrument of liberal internationalism that sees the advancement of individual values of rights gender equality and empowerment of often marginalized groups such as indigenous peoples traumatized war victims and those with disabilities Sports in International Politics explores the complex linkages among power politics in the international arena the profit seeking often elitist and at times corrupt world of

professional international sports and the promise for harnessing sports to promote human rights inclusive development and sustainable peace in a violent world Timothy D Sisk shows that sport's direct relationship to peace is found in sport and play related contributions to humanitarian action expanding the right to access sport and the rights of athletes of all ages and abilities and in the well designed employment of sports in youth based development and peacebuilding programs and projects Sport's contribution to peace is found from the bottom up through sport's contribution to positive youth development empathy and fairness and through engendering trust and social cohesion at community and national levels
