Studies in Environmental Politics and Policy Riley E. Dunlap, 1975

The Politics of the Environment Neil Carter, 2018-08-09 Revised to include new discussions on climate justice green political parties climate legislation and recent environmental struggles

From South to North Barbara W. Lex, 1975

China's Role in Reducing Carbon Emissions David Toke, 2017-04-21 This book discusses the prospects for China achieving radical reductions in carbon emissions within the context of the current economic and political landscape With a particular focus on technologies such as wind power solar power and electric vehicles Toke examines the way in which China is transitioning to a state of stable energy consumption via a service based economy and heavy investment in non fossil energy sources The book concludes that China may be set to reduce its carbon emissions by around two thirds by 2050

The Role of Non-State Actors in the Green Transition Jens Hoff, Quentin Gausset, Simon Lex, 2019-09-02 This book argues that there is no way to make progress in building a sustainable future without extensive participation of non state actors The volume explores the contribution of non state actors to a sustainable transition starting with citizens and communities of different kinds and ending with cities and city networks The

authors analyse social cultural political and economic drivers and barriers for this transition from individual behaviour to structural restraints and investigate interplay between the two Through a series of wide ranging case studies from the UK Australia Germany Italy and Denmark and a number of comparative case studies the volume provides an empirically and theoretically robust argument that highlights the need to develop widen and scale up collective action and community based engagement if the transition to sustainability is to be successful This book will be of great interest to students and scholars of climate change sustainability and environmental policy

Ecocriticism in Taiwan Chia-ju Chang, Scott Slovic, 2016-06-01

Ecocriticism is a mode of interdisciplinary critical inquiry into the relationship between cultural production society and the environment The field advocates for the more than human realm as well as for underprivileged human and non human groups and their perspectives Taiwan is one of the earliest centers for promoting ecocriticism outside the West and has continued to play a central role in shaping ecocriticism in East Asia This is the first English anthology dedicated to the vibrant development of ecocriticism in Taiwan It provides a window to Taiwan s important contributions to international ecocriticism especially an emerging vernacular trend in the field emphasizing the significance of local perspectives and styles including non western vocabularies aesthetics cosmologies and political ideologies Taiwan s unique history geographic location geology and subtropical climate generate locale specific vernacular thinking about island ecology and environmental history as well as global environmental issues such as climate change dioxin pollution species extinction energy decisions pollution and environmental injustice In hindsight Taiwan s industrial modernization no longer appears as a success narrative among Asia s Four Little Dragons but as a cautionary tale revealing the brute force entrepreneurial exploitation of the land and the people In this light this volume can be seen as a critical response to Taiwan s postcolonial capitalist industrial modernity as manifested in the scholars readings of Taiwan s mountain and river ocean animal and aboriginal non fictional narratives environmental documentaries and art installations This volume is endowed with a mixture of ecocosmopolitan and indigenous sensitivities Though dominated by the Han Chinese ethnic group and its Confucian ideology Taiwan is a place of complicated ethnic identities and affiliations The succession of changing colonial and political regimes made even more complex by the island s sixteen aboriginal groups and several diasporic subcultures South Asian immigrants Western expatriates and diverse immigrants from the Chinese mainland has led to an ongoing quest for political and cultural identity This complexity urges Taiwan based ecoscholars to pay attention to the diasporic comparative and intercultural dimensions of local specificity either based on their own diasporic experience or the cosmopolitan features of the Taiwanese texts they scrutinize This cosmopolitan vernacular dynamic is a key contribution Taiwan has to offer current ecocritical scholarship

Critical Environmental Communication Murdoch Stephens, 2018-04-25 How do contemporary critical thinkers find a way to work between the doubt that grounds their thinking and the knowing needed to ground emancipatory political struggles In this overview of four contemporary thinkers Timothy Morton Peter Sloterdijk Slavoj Žižek and Bruno Latour approaches to

critique and climate change communication scholar Murdoch Stephens discusses and analyses the fissures elisions and paradoxes that inform critical theory This book delves into how critical theory offers important insights for those interested in climate change but also how critical theory faces challenges to its constitution when faced with issues that are both urgent and yet require a scientific rigour that is not the specialty of critique Written from the perspective of the interdisciplinary field of environmental communication Critical Environmental Communication How Does Critique Respond to the Urgency of Climate Change argues for re orienting the field towards the tensions and possibilities drawn from these four authors

Workers and Trade Unions for Climate Solidarity Paul Hampton, 2015-06-05 This book is a theoretically rich and empirically grounded account of UK trade union engagement with climate change over the last three decades It offers a rigorous critique of the mainstream neoliberal and ecological modernisation approaches extending the concepts of Marxist social and employment relations theory to the climate realm The book applies insights from employment relations to the political economy of climate change developing a model for understanding trade union behaviour over climate matters The strong interdisciplinary approach draws together lessons from both physical and social science providing an original empirical investigation into the climate politics of the UK trade union movement from high level officials down to workplace climate representatives from issues of climate jobs to workers climate action This book will be of great interest to students and researchers in environmental politics climate change and environmental sociology

Critical Environmental Politics Carl Death, 2013-12-04 The aim of this book is to review central concepts in the study of environmental politics and to open up new questions problems and research agendas in the field The volume does so by drawing on a wide range of approaches from critical theory to poststructuralism and spanning disciplines including international relations geography sociology history philosophy anthropology and political science The 28 chapters cover a range of global and local studies illustrations and cases These range from the Cochabamba conference in Bolivia to climate camps in the UK UN summits in Rio de Janeiro and Johannesburg to climate migrants from Pacific islands forests in Indonesia to Dutch energy governance reform indigenous communities in Namibia to oil extraction in the Niger Delta survivalist militias in the USA to Maasai tribesmen in Kenya Rather than following a regional or issue based e g water forests pollution etc structure the volume is organised in terms of key concepts in the field including those which have been central to the social sciences for a long time such as citizenship commodification consumption feminism justice movements science security the state summits and technology those which have been at the heart of environmental politics for many years including biodiversity climate change conservation eco centrism limits localism resources sacrifice and sustainability and many which have been introduced to these literatures and debates more recently biopolitics governance governmentality hybridity posthumanism risk and vulnerability Features and benefits of the book Explains the most important concepts and theories in environmental politics Reviews the core ideas behind crucial debates in environmental politics Highlights the key thinkers both classic and

contemporary for studying environmental politics Provides original perspectives on the critical potential of the concepts for future research agendas as well as for the practice of environmental politics Each chapter is written by leading international authors in their field This exciting new volume will be essential textbook reading for all students of environmental politics as well as provocatively presenting the field in a different light for more established researchers Global Ecologies and the Environmental Humanities Elizabeth DeLoughrey,Jill Didur,Anthony Carrigan,2015-04-10 This book examines current trends in scholarly thinking about the new field of the Environmental Humanities focusing in particular on how the history of globalization and imperialism represents a special challenge to the representation of environmental issues Essays in this path breaking collection examine the role that narrative visual and aesthetic forms can play in drawing attention to and shaping our ideas about long term and catastrophic environmental challenges such as climate change militarism deforestation the pollution and management of the global commons petrocapiatalism and the commodification of nature The volume presents a postcolonial approach to the environmental humanities especially in conjunction with current thinking in areas such as political ecology and environmental justice Spanning regions such as Africa Asia Eastern Europe Latin America and the Caribbean Australasia and the Pacific as well as North America the volume includes essays by founding figures in the field as well as new scholars providing vital new interdisciplinary perspectives on the politics of the earth disaster vulnerability and resilience political ecologies and environmental justice world ecologies and the Anthropocene In engaging critical ecologies the volume poses a postcolonial environmental humanities for the twenty first century At the heart of this is a conviction that a thoroughly global postcolonial and comparative approach is essential to defining the emergent field of the environmental humanities and that this field has much to offer in understanding critical issues surrounding the creation of alternative ecological futures **Political Ecology of Tourism** Mary Mostafanezhad,Roger Norum,Eric J. Shelton,Anna

Thompson-Carr,2016-01-08 Why has political ecology been assigned so little attention in tourism studies despite its broad and critical interrogation of environment and politics As the first full length treatment of a political ecology of tourism the collection addresses this lacuna and calls for the further establishment of this emerging interdisciplinary subfield Drawing on recent trends in geography anthropology and environmental and tourism studies Political Ecology of Tourism Communities Power and the Environment employs a political ecology approach to the analysis of tourism through three interrelated themes Communities and Power Conservation and Control and Development and Conflict While geographically broad in scope with chapters that span Central and South America to Africa and South Southeast and East Asia to Europe and Greenland the collection illustrates how tourism related environmental challenges are shared across prodigious geographical distances while also attending to the nuanced ways they materialize in local contexts and therefore demand the historically situated place based and multi scalar approach of political ecology This collection advances our understanding of the role of political economic and environmental concerns in tourism practice It offers readers a political ecology framework from which

to address tourism related issues and themes such as development identity politics environmental subjectivities environmental degradation land and resources conflict and indigenous ecologies Finally the collection is bookended by a pair of essays from two of the most distinguished scholars working in the subfield Rosaleen Duffy foreword and James Igoe afterword This collection will be valuable reading for scholars and practitioners alike who share a critical interest in the intersection of tourism politics and the environment

Green Parties and Politics in the European Union Elizabeth Bomberg, 2005-08-02 Bomberg argues the greening of European politics and the advancement of European integration are inextricably linked and that the EU presents a strategic dilemma to Green parties In short how can Greens reconcile their radical alternative politics with the EU's mainstream traditional institutions and practices Bomberg's analysis is based on over 100 interviews with leading green politicians NGO members environmental and industrial lobbyists EU officials and MEPs She includes appendices showing profiles of green parties in European countries and key policy making institutions

Urban Ecologies Christopher Schliephake, 2014-12-11 The term urban ecology has become a buzzword in various disciplines including the social and natural sciences as well as urban planning and architecture The environmental humanities have been slow to adapt to current theoretical debates often excluding human built environments from their respective frameworks This book closes this gap both in theory and in practice bringing together urban ecology with ecocritical and cultural ecological approaches by conceptualizing the city as an integral part of the environment and as a space in which ecological problems manifest concretely Arguing that culture has to be seen as an active component and integral factor within urban ecologies it makes use of a metaphorical use of the term perceiving cities as spatial phenomena that do not only have manifold and complex material interrelations with their respective natural environments but that are intrinsically connected to the ideas imaginations and interpretations that make up the cultural symbolic and discursive side of our urban lives and that are stored and constantly renegotiated in their cultural and artistic representations The city is within this framework both seen as an ecosystemically organized space as well as a cultural artifact Thus the urban ecology outlined in this study takes its main impetus from an analysis of examples taken from contemporary culture that deal with urban life and the complex interrelations between urban communities and their natural and built environments

Reading about the Environment P. E. Jansma, 1993 Current environmental catastrophes and concerns have been accompanied by an explosion of information about the environment The concerned citizen whether a business professional student homemaker government employee educator or union member needs access to this information but may feel overwhelmed by the bewildering array of material available

The Community Development Reader James DeFilippis, Susan Saegert, 2013-03-05 The Community Development Reader is the first comprehensive reader in the past thirty years that brings together practice theory and critique concerning communities as sites of social change With chapters written by some of the leading scholars and practitioners in the field the book presents a diverse set of perspectives on community development These selections

inform the reader about established and emerging community development institutions and practices as well as the main debates in the field The second edition is significantly updated and expanded to include a section on globalization as well as new chapters on the foreclosure crisis and emerging forms of community Environmental Culture Val Plumwood,2005-09-15 In this much needed account of what has gone wrong in our thinking about the environment Val Plumwood digs at the roots of environmental degradation She argues that we need to see nature as an end itself rather than an instrument to get what we want Using a range of examples Plumwood presents a radically new picture of how our culture must change to accommodate nature A Companion to Environmental Geography Noel Castree,David Demeritt,Diana Liverman,Bruce Rhoads,2016-10-03 A Companion to Environmental Geography is the first book to comprehensively and systematically map the research frontier of human environment geography in an accessible and comprehensive way Cross cuts several areas of a discipline which has traditionally been seen as divided presenting work by human and physical geographers in the same volume Presents both the current state of the art research and charts future possibilities for the discipline Extends the term environmental geography beyond its traditional meanings to include new work on nature and environment by human and physical geographers not just hazards resources and conservation geographers Contains essays from an outstanding group of international contributors from among established scholars and rising stars in geography

Globalization and Environmental Challenges Hans Günter Brauch,Úrsula Oswald Spring,Czeslaw Mesjasz,John Grin,Pál Dunay,Navnita Chadha Behera,Béchir Chourou,Patricia Kameri-Mbote,P. H. Liotta,2008-01-23 Put quite simply the twin impacts of globalization and environmental degradation pose new security dangers and concerns In this new work on global security thinking 91 authors from five continents and many disciplines from science and practice assess the worldwide reassessment of the meaning of security triggered by the end of the Cold War and globalization as well as the multifarious impacts of global environmental change in the early 21st century Ecology, Politics and Violent Conflict Mohamed Suliman,1999 Violent internal conflicts in more and more countries are ruining the lives of millions of people and undermining the ability of their governments to provide security and a tolerable economic existence The contributors to this book take a new view of the reasons for this grave development in Africa the Balkans Central Asia and elsewhere They question traditional analyses of conflict which rely primarily on ethnic religious and cultural explanations since these do not take account of the increasingly obvious link between the growing scarcity of renewable resources and violent conflict in developing countries Shortages of cropland fresh water woodfuel pasture and marine resources cannot be ignored At the same time this book argues that one cannot understand domestic conflicts simply in environmental terms For environmental scarcity functions in a society within a complex matrix of historically derived economic and political situations In particular an unequal social distribution of resources exacerbates scarcity and fuels popular conflict
