Politics Of Colonial Policy:

Politics of Colonial Policy Ian Kenneth Steele, 1968

Anthropology, Colonial Policy and the Decline of French Empire in Africa Douglas W. Leonard, 2019-12-26 Conceived as both a vehicle to national prestige and as a civilizing mission the second French colonial empire 1830 1962 challenged soldiers scholars and administrators to understand societies radically different from their own The resultant networks of anthropological inquiry however did not have this effect Rather they opened pathways to political and intellectual independence framed in the language of social science and in the process upended the colonial political system and reshaped the nature of human inquiry in France While still unequal French colonial rule in Africa revealed the durability and strength of non European modes of thought In this influential new study historian Douglas W Leonard examines the political and intellectual repercussions of French efforts to understand and to dominate colonial Africa through the use of anthropology From General Louis Faidherbe in the 1840s to politician Jacques Soustelle and sociologist Pierre Bourdieu in the 1950s these French thinkers sowed the seeds of colonial destruction

The Political Discourse of Anarchy Brian C. Schmidt, 2016-02-24 CHOICE 1998 Outstanding Academic Books This detailed disciplinary history of the field of international relations examines its early emergence in the mid

nineteenth century to the period beginning with the outbreak of World War II It demonstrates that many of the commonly held assumptions about the field s early history are incorrect such as the presumed dichotomy between idealist and realist periods By showing how the concepts of sovereignty and anarchy have served as the core constituent principles throughout the history of the discipline and how earlier discourse is relevant to the contemporary study of war and peace international security international organization international governance and international law the book contributes significantly to current debates about the identity of the international relations field and political science more generally The Industrial Revolution William J. Ashworth,2017-01-26 The British Industrial Revolution has long been seen as the spark for modern global industrialization and sustained economic growth Indeed the origins of economic history as a discipline lie in 19th century European and North American attempts to understand the foundation of this process In this book William J Ashworth questions some of the orthodoxies concerning the history of the industrial revolution and offers a deep and detailed reassessment of the subject that focuses on the State and its role in the development of key British manufactures In particular he explores the role of State regulation and protectionism in nurturing Britain s negligible early manufacturing base Taking a long view from the mid 17th century through to the 19th century the analysis weaves together a vast range of factors to provide one of the fullest analyses of the industrial revolution and one that places it firmly within a global context showing that the Industrial Revolution was merely a short moment within a much larger and longer global trajectory This book is an important intervention in the debates surrounding modern industrial history will be essential reading for anyone interested in global and comparative economic history and the history of globalization **Opinions of Lord Brougham: On Politics, Theology, Law, Science, Education, Literature, &c.** Henry Vaux,2025-07-28 Reprint of the original first published in 1841 The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage **The Roots of Political Instability in Nigeria** Dr E C Ejiogu,2013-03-28 The constant drumbeat of headlines about Darfur Zimbabwe Sudan Somalia as well as the other states in Africa that are beleaguered by political instability have made the causes of failed states and intra state political conflicts a major issue both academic and practical Using Harry Eckstein and Ted R Gurr s congruence consonance theoretical framework of regime classification E C Ejiogu examines the internal variations of society evident in the Nigerian state to explain why the country experiences political conflict and instability The first time this theoretical framework has been applied to an African country E C Ejiogu offers a balanced and interdisciplinary analysis of the evolution in the Nigerian political system and the role played by evolved social traits in society Exploring themes such as colonial rule and legacies economic development political authority and religion Ejiogu insists that it is critical to examine Africa s diverse nationalities in terms of their geography social economic and authority patterns as critical elements that are disregarded in accounts of their political development At a time when the question of

state building in Africa is still unresolved this timely book is a major contribution to the literature on transition processes in African politics and is particularly relevant to scholars and policy makers wanting to grapple with the issues associated with Africa's political disorder and the other social problems it spawns *Funerals, Politics, and Memory in Modern France 1789-1996* Avner Ben-Amos, 2000-10-12 This is an interdisciplinary study of the state funerals that were celebrated in France between the French Revolution and the death of François Mitterrand Its aim is to explain how the funerals of such prominent figures as Voltaire Napoleon Gambetta Hugo and de Gaulle became major public events that helped to mould the national memory Combining the insights of anthropologists and sociologists with a historical analysis it argues that the dual character of the ceremony a political festival and final rite of passage turned the state funeral into a gripping event to which few French people could remain indifferent The book focuses on the republican tradition of state funerals which emerged in the French Revolution and has continued through the Fifth Republic Whether in power or in opposition the republicans used the funerals of their leaders and militants to educate the masses and mobilize public support This book the first comprehensive analysis of French state funerals is also a major contribution to the study of republican culture *The Early Parties and Politics in Britain, 1688-1832* Brian Hill, 1996-03-06 There has always been a tendency to view British politics before the 1832 reform act as though the parties in parliament were clumsy embryo versions of the later Conservatives and Liberals their every act interpreted as being either as further striving towards modernity or a relapse into more primitive patterns of behaviour This can be helpful to students in disentangling some very complex factional material but for much of the time the 19th and 20th century party labels simply do not make any sense at all in this earlier period A good clear account of what exactly was meant by party and how the different parliamentary groupings evolved from the Restoration to the aftermath of the Napoleonic Wars has long been needed and Brian Hill who has studied this issue for many years has at last provided such an account **New Caribbean Thought** Brian Meeks, Folke Lindahl, 2001 The dawn of the twenty first century is an opportune time for the people of the Caribbean to take stock of the entire experience of the past forty years since the ending of direct colonialism The authors believe it is now time to chart our future by carefully learning the lessons of the recent past This interdisciplinary collection is the first to cross traditionally restrictive disciplinary barriers to address the tough questions that face the Caribbean today What went wrong with the nationalist project What if any are the realistic options for a more prosperous Caribbean What are to be the roles of race gender and class in a more global less national world Meeks and Lindahl include thought provoking articles from twenty one respected thinkers in diverse fields of study The groundbreaking articles include critiques of existing bodies of thought reformulations of general theoretical approaches policy oriented alternatives for future development and more This book is a must for statesmen academics and students of political theory social theory Caribbean studies comparative gender studies post colonial studies Marxism and Caribbean history and anyone interested *The Problem of Freedom* Thomas C. Holt, 1992 The Jamaican slave revolt of 1831 32

precipitated the abolition of slavery throughout the British colonial empire A century later the labor rebellion of 1938 marked the beginning of that empire's end Each event embraced a particular form of emancipation at issue in the first revolt was the freedom of the individual slave at issue in the second was the freedom of the society itself The century that separated these watersheds in British colonial history was one of extraordinary transformations in British ideology in economic and social policy and in the lives of Jamaican freed people and their descendants In *The Problem of Freedom* Thomas C Holt offers an intriguing analysis of this period exploring the meaning and reality of freedom in the context of slave emancipation in Jamaica the largest West Indian colony of the nineteenth century's major world power Annual Report American Historical Association, 1892 *The Political Thought of the Irish Revolution* Richard Bourke, Niamh Gallagher, 2022-05-05 The Irish Revolution was a pivotal moment of transition for Ireland the United Kingdom and British Empire A constitutional crisis that crystallised in 1912 electrified opinion in Ireland whilst dividing politics at Westminster Instead of settling these differences the advent of the First World War led to the emergence of new antagonisms Republican insurrection was followed by a struggle for independence along with the partition of the island This volume assembles some of the key contributions to the intellectual debates that took place in the midst of these changes and displays the vital ideas developed by the men and women who made the Irish Revolution as well as those who opposed it Through these fundamental texts we see Irish experiences in comparative European and international contexts and how the revolution challenged the durability of Britain as a global power
