Politics Of Genetic Resource Control:

The Politics of Genetic Resource Control A. Stenson, T. Gray, 1999-06-23 The question of how genetic resources ought to be owned and controlled has become a controversial international political issue The authors examine this issue from a normative perspective discussing the four principles that govern the debate over genetic resource control These four principles are proprietary intellectual property rights the dominant principle reflecting Western influences communitarian intellectual property rights a principle bound up with the rights of indigenous peoples national sovereignty the principle at the heart of international law and common heritage of mankind the most recent principle reflecting Third World demands

A Normative Analysis of the Politics of Genetic Resource Control Anthony Stenson, University of Newcastle upon Tyne. Department of Politics, 1998 *Global Biopiracy* Ikechi Mgbeoji, 2011-11-01 Legal control and ownership of plants and traditional knowledge of the uses of plants TKUP is a vexing issue The phenomenon of appropriation of plants and TKUP otherwise known as biopiracy thrives in a cultural milieu where non Western forms of knowledge are systemically marginalized and devalued as folk knowledge or characterized as inferior Global Biopiracy rethinks the role of international law and legal concepts the Western based Eurocentric patent systems of the world and international agricultural research institutions as they affect legal ownership and control of plants and TKUP The analysis is cast in various contexts and examined at multiple levels The first deals with the Eurocentric character of the patent system international law and institutions The second involves the cultural and economic dichotomy between the industrialized Western world and the westernizing developing world The third level of analysis considers the phenomenal loss of human cultures and plant diversity Exhaustively researched and eloquently argued Global Biopiracy sheds new light on a contentious topic The impact of intellectual property law on indigenous peoples and informal or traditional innovations is a field of study that currently includes only a handful of scholars Biopiracy will be an invaluable resource for students teachers and legal practitioners

The Oxford Handbook of Comparative Environmental Law Emma Lees, Jorge E. Accessing and Sharing the Benefits of the Genomics Revolution Peter W.B. Phillips, Chika B.

Onwuekwe,2007-05-09 There is a veritable gold rush mentality in the life science world as scientists entrepreneurs and multinationals are staking claims to the code of life embodied in the world s current stock of plants animals microbes and human populations This edited volume explores the legal economic and political context for the debate about intellectual property rights for traditional knowledge and genetic resources and critically analyses the theory and practice of access and benefits sharing efforts around the world The book also investigates the current flashpoints the David and Goliath battle between Monsanto and Percy Schmeiser over farmers rights the dispute over coexistence of GM and organic production and the ownership and control of human genetic materials stored in human gene banks around the world **The President and**

American Capitalism since 1945 Mark H. Rose,Roger Biles,2017-11-14 The book examines the development of the U S presidency since 1945 and describes the many ways some of which are unknown or greatly underappreciated in which the president s actions affect the daily lives of the American people *Intellectual Property Rights and Food Security* Michael

Blakeney,2009-01-01 Intellectual Property Rights IPRs play an important role in the struggle for food security and encouraging agricultural research and development This book examines these roles as well as the international relationship between IPRs agricultural biotechnology access to biological resources food security and globalisation paying particular attention to proposals for the protection of Farmers Rights traditional knowledge GM crops and the impact of competition laws It proposes a number of recommendations for action in deploying IPRs in order to reach greater food security globally

Narratives of Hunger in International Law Anne Saab,2019-04-04 This book explores the role that the language of international law plays in constructing understandings or narratives of hunger in the context of climate change The story is told through a specific case study of genetically engineered seeds purportedly made to be climate ready Two narratives of hunger run through the storyline the prevailing neoliberal narrative that focuses on increasing food production and relying on technological innovations and private sector engagement and the oppositional and aspirational food sovereignty narrative that focuses on improving access to and distribution of food and rejects technological innovations and private sector engagement as the best solutions This book argues that the way in which voices in the neoliberal narrative use international law reinforces fundamental assumptions about hunger and climate change and the way in which voices in the food sovereignty narrative use international law fails to question and challenge these assumptions **Water Politics in the**

Middle East M. Dolatyar,T. Gray,1999-09-21 Most studies of water scarcity in the Middle East conclude that there is a significant risk of imminent conflict even warfare between states in the region This book demonstrates that the evidence does not support this doom laden prediction Indeed the authors show that although water scarcity has occasionally played a role in disputes in the Middle East it has much more often promoted co existence between adversaries The reasoning behind this hypothesis is that water is too critical to be put at risk by warfare *Assessing Biodiversity and Sharing the Benefits*

Santiago Carrizosa,2004 The book aims to address the lack of information on the experiences of others by providing a

comparative analysis of national access and benefit sharing laws and policies in the 41 Pacific Rim countries that signed the CBD It provides key insights on the main characteristics of selected access and benefit sharing ABS policies and laws their development and implementation process It contains a detailed comparative analysis of existing laws and policies It presents four case studies of countries with regulations in place and contrasts them with four case studies of countries that are struggling to develop their regulations It ends by discussing options of an international regime on ABS and a summary analysis of the main lessons and recommendations from the study

Traditional and Modern Natural Resource Management in Latin America Francisco J. Pichon, John Frechione, Jorge E. Uquillas, 1999-10-15 Traditional and Modern Natural Resource Management in Latin America identifies a major problem facing developing nations and the countries and sources that fund them the lack of attention and or effective strategies available to prevent farmers in underdeveloped and poorly endowed regions from sinking still deeper into poverty while avoiding further degradation of marginal environments The contributors propose an alliance of scientific knowledge with native skill as the best way to proceed arguing that folk systems can often provide effective management solutions that are not only locally effective but which may have the potential for spatial diffusion While this has been said before the volume makes one of the best articulated statements of how to implement such an approach In this book which stems from a workshop held in 1995 at the World Bank the editors make an eloquent case for the relevance of risk prone areas as a subject of study and the special role that indigenous knowledge plays in such poorly endowed regions The volume is balanced it does not advocate one approach over another and it is multidisciplinary including work by anthropologists sociologists geographers and natural scientists The nine chapters create a natural progression from conceptual issues to theory applications and synthesis and contain a wealth of data analyses recommendations and carefully considered opinions by experts who have been intimately involved over the long term in theoretical and practical work related to systems of natural resource management in Latin America The volume addresses the topic of sustainability in a logical manner considering practical concerns and lessons as well as theoretical perspectives A number of conceptual and case studies highlight approaches that might succeed if World Bank and other multilateral and national funding sources are forthcoming Traditional and Modern Natural Resource Management in Latin America addresses a topic that has gained worldwide interest especially in relation to indigenous knowledge systems

The Economics of Ecosystems and Biodiversity in Business and Enterprise Joshua Bishop, 2013-06-17 This book is a product of the TEEB study The Economics of Ecosystems and Biodiversity It provides important evidence of growing corporate concern about biodiversity loss and offers examples of how leading companies are taking action to conserve biodiversity and to restore ecosystems This book reviews indicators and drivers of biodiversity loss and ecosystem decline and shows how these present both risks and opportunities to all businesses It examines the changing preferences of consumers for nature friendly products and services and offers examples of how companies are responding The book also describes recent initiatives to enable

businesses to measure value and report their impacts and dependencies on biodiversity and ecosystem services The authors review a range of practical tools to manage biodiversity risks in business with examples of how companies are using these tools to reduce costs protect their brands and deliver real business value The book also explores the emergence of new business models that deliver biodiversity benefits and ecosystem services on a commercial basis the policy enabling frameworks needed to stimulate investment and entrepreneurship to realize such opportunities and the obstacles that must be overcome The book further examines how businesses can align their actions in relation to biodiversity and ecosystem services with other corporate responsibility initiatives including community engagement and poverty reduction Finally the book concludes with a summary and recommendations for action
