and agricultural improvement and ideas about forestry climate the sciences of the soil and of life itself this book sets out how new knowledge and metrics led people to imagine both new horizons for progress but also the possibility of collapse In the nineteenth century anxieties about sustainability often driven by science proliferated in debates about contemporary and historical empires and the American frontier The fear of progress undoing itself confronted society with finding ways to live with and manage nature

**Literature and Political Intellection in Early Stuart England** Todd Butler, 2019-07-24 Drawing upon a myriad of literary and political texts *Literature and Political Intellection in Early Stuart England* charts how some of the Stuart period's major challenges to governance the equivocation of recusant Catholics the parsing of one's civil and religious obligations the composition and distribution of subversive texts and the increasing assertiveness of Parliament evoked much greater disputes about the mental processes by which monarchs and subjects alike imagined understood and effected political action Rather than emphasizing particular forms of political thought such as republicanism or absolutism Todd Butler here investigates the more foundational question of political intellection or the various ways that early modern individuals thought through the often uncertain political and religious environment they occupied and how attention to such thinking in oneself or others could itself constitute a political position Focusing on this continuing immanence of cognitive processes in the literature of the Stuart era Butler examines how writers such as Francis Bacon John Donne Philip Massinger John Milton and other less familiar figures of the seventeenth century evidence a shared concern with the interrelationship between mental and political behavior These analyses are combined with similarly close readings of religious and political affairs that similarly return our attention to how early Stuart writers of all sorts understood the relationship between mental states and the forms of political engagement such as speech oaths debate and letter writing that expressed them What results is a revised framework for early modern political subjectivity one in which claims to liberty and sovereignty are tied not simply to what one can do but how or even if one can freely think
