Politics of Peace and UN General Assembly Prem Mohan Sharma,1978 [The New Politics of Financing the UN](#) Anthony McDermott,2016-07-27 The UN has suffered from its earliest days as a result of persistent financial problems which left it on the edge of apparent bankruptcy This book looks at the history of the regular and peace keeping budgets It focuses on the role of the US simultaneously the UN s biggest contributor of funds and its largest debtor It examines possible solutions against the background today of the UN attempting to reform itself to meet the challenges posed by globalization and an increasing number of civil wars

Maintaining Order, Making Peace O. Richmond,2001-12-17 This study explores three generations of approaches to ending conflict and examines how in the context of the failings of the Westphalian international system their peacekeeping mediation and negotiation conflict resolution and peacebuilding approaches as well as UN peace operations and asks via an empirical and theoretical analysis what role such approaches have played and are playing in replicating an international system prone to intractable forms of conflict

Privatizing the Democratic Peace H. [Peace Operations Between War and Peace](#) Erwin A. Schmidl,2013-11-05 Peace operations entail a special form of co operation between nation states and

international organization but tend to be most difficult for the soldiers police and civilian officials on the ground This volume highlights the latter role with case studies of Srebrenica and Somalia

Twenty-first-century Peace Operations William J. Durch, 2006 This superbly edited volume addresses the question of what has been accomplished and what lessons have been learned from ten years of peace operations in post conflict societies

Conflict Resolution in the Twenty-first Century Jacob Bercovitch, Richard Dean Wells Jackson, 2009-08-04 In the past arbitration direct bargaining the use of intermediaries and deference to international institutions were relatively successful tools for managing interstate conflict In the face of terrorism intrastate wars and the multitude of other threats in the post Cold War era however the conflict resolution tool kit must include preventive diplomacy humanitarian intervention regional task sharing and truth commissions Here Jacob Bercovitch and Richard Jackson two internationally recognized experts systematically examine each one of these conflict resolution tools and describe how it works and in what conflict situations it is most likely to be effective Conflict Resolution in the Twenty first Century is not only an essential introduction for students and scholars it is a must have guide for the men and women entrusted with creating stability and security in our changing world Cover illustration iStockphoto com

Enforcing the Peace Kimberly Zisk Marten, 2004-09-29 Anarchy makes it easy for terrorists to set up shop Yet the international community has been reluctant to commit the necessary resources to peacekeeping with devastating results locally and around the globe This daring new work argues that modern peacekeeping operations and military occupations bear a surprising resemblance to the imperialism practiced by liberal states a century ago Motivated by a similar combination of self interested and humanitarian goals liberal democracies in both eras have wanted to maintain a presence on foreign territory in order to make themselves more secure while sharing the benefits of their own cultures and societies Yet both forms of intervention have inevitably been undercut by weak political will inconsistent policy choices and their status as a low priority on the agenda of military organizations In more recent times these problems are compounded by the need for multilateral cooperation something even NATO finds difficult to achieve but is now necessary for legitimacy Drawing lessons from this provocative comparison Kimberly Zisk Marten argues that the West s attempts to remake foreign societies in their own image even with the best of intentions invariably fail Focusing on operations in Haiti Bosnia Kosovo and East Timor in the mid to late 1990s while touching on both post war Afghanistan and the occupation of Iraq Enforcing the Peace compares these cases to the colonial activities of Great Britain France and the United States at the turn of the twentieth century The book weaves together examples from these cases using interviews Marten conducted with military officers and other peacekeeping officials at the UN NATO and elsewhere Rather than trying to control political developments abroad Marten proposes a more sensible goal of foreign intervention is to restore basic security to unstable regions threatened by anarchy The colonial experience shows that military organizations police effectively if political leaders prioritize the task and the time has come to raise the importance of peacekeeping on the international agenda

War Peace and Hegemony in A

Globalized World Chandra Chari,2010 This book focuses on how the US could adapt its foreign policy initiatives to fit in with the growing aspirations of a multipolar world for a more balanced international order Written by leading scholars such as Joseph Nye Eric Hobsbawm and Akira Iriye the volume examines if the absence of a superpower status would lead to anarchy or if an alternative is possible In view of the globalization process and the changing perceptions of US hegemony in the various regions of the world it addresses the possibility of re examining and redefining the nineteenth century classical balance of power Divided into two sections it analyzes global perspectives on war peace and hegemony and the role of the United States each region of the world in the context of the unfolding processes of globalization the various ways in which economic and socio political organizations are impacting inter and intra regionally and the role of the United States vis vis the individual countries and regions

The Territorial Dimension Of Politics Ivo D. Duchacek,Helena Duchacek,2019-07-09 This comparative study examines the dialectical tensions between global and regional interdependence and the fragmentation of humankind into territorial entities Political authority may remain territory bound but borders increasingly are penetrated by pollutants individuals noncentral governments in search of foreign trade and investment and transnational corporations as well as the traditional exchanges of trade media and culture The result of these transborder flows accelerated by new technologies is a new variety of international relations among perforated sovereignties Dr Duchacek analyzes the territorial organization of political authority in both democratic and authoritarian frameworks as well as in unitary and federal systems Case studies focus on new forms of transborder interactions between neighboring countries especially in North America and in Western Europe The book is of major interest to scholars in the fields of political science and political economy Quotations from a variety of political theorists and practitioners illustrative diagrams and maps make the book suitable for students of comparative politics international relations comparative federalism and public policy

The Politics of Peace Charles Emanuel Martin,1929 **Rethinking the Liberal Peace** Shahrbanou

Tadjbakhsh,2011-03-08 This book presents a critical analysis of the liberal peace project and offers possible alternatives and models In the past decade the model used for reconstructing societies after conflicts has been based on liberal assumptions about the pacifying effects of open markets and open societies Yet despite the vast resources invested in helping establish the precepts of this liberal peace outcomes have left much to be desired The book argues that failures in the liberal peace project are not only due to efficiency problems related to its adaptation in adverse local environments but mostly due to problems of legitimacy of turning an ideal into a doctrine for action The aim of the book is to scrutinize assumptions about the value of democratization and marketization and realities on the ground by combining theoretical discussions with empirical evidence from key post conflict settings such as Iraq and Afghanistan These show the disparities that exist between the ideals and the reality of the liberal peace project as seen by external peacebuilders and domestic actors The book then proposes various alternatives and modifications to better accommodate local perspectives values and agency in attempts to

forge a new consensus This book will be of great interest to students of peacebuilding peacekeeping statebuilding war and conflict studies international security and IR **The Political Economy of Defence** Ron Matthews,2019-05-09 A contemporary and comprehensive analysis of national and supranational defence governance in an uncertain and increasingly dangerous world This book will appeal to policymakers analysts graduate students and academics interested in defence economics political economy public economics and public policy **Bulletin of the Atomic Scientists** ,1995-03 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Humanitarian Action and Peace Keeping Operations* Institute of Policy Studies (Singapore),1997-12-22 This is the third work in the series of conferences held in Singapore on various aspects of United Nations Peacekeeping operations under the auspices of the United Nations Institute for Training and Research UNITAR the Institute of Political Studies IPS of Singapore and the National Institute for Research Advancement NIRA of Japan The 1997 Conference focused on humanitarian action and peacekeeping operations and brought together key practitioners and scholars from the Security Council those interested in government the International Committee of the Red Cross ICRC other humanitarian NGOs academics and military personnel Since the end of the Cold War the number and complexity of UN peacekeeping operations have increased dramatically due to profound changes in many areas of the world The recent trend has seen a shift from inter state to intra state conflicts bringing in its wake a myriad of operational legal and political questions such as the very relevance and applicability of the principle of non interference in the internal affairs of the state Parties to recent conflicts have no central authority and little or no regard for international humanitarian law Interested and involved parties on the peacekeeping and humanitarian scene have also changed and multiplied All these factors render humanitarian action more complex dangerous and difficult for all parties involved The book reviews four United Nations peacekeeping operations that have undergone immense difficulties viz in Somalia the former Yugoslavia Rwanda and Liberia It debates the pertinent political framework for humanitarian action in each case It explores the relationship between humanitarian and military action of coordination with regional organizations and multinational force as well as fundamental questions regarding the role and responsibility of the member states of the Security Council Its findings can provide policy makers researchers and analysts of international affairs with a sober and thorough assessment of past experience and lessons for the future

Collective Conflict Management and Changing World Politics Joseph Lepgold,Thomas George Weiss,1998-05-28 For several decades the debate over collective security the idea that alliances are problematic and that all nations should pledge to come to the aid of any nation that is a victim of aggression has been polarized *Collective Conflict Management and Changing World Politics* probes the international and domestic conditions under which collective security tends to work or not and questions if the end of the Cold War makes success more or less likely than before The contributors conclude that

collective conflict management is possible under specific situations as they enumerate various domestic and international requisites that circumscribe such possibilities
