**The Research Relationship** G. Clare Wenger, 2022-02-23 Originally published in 1987 it seemed likely that by the end of that decade if current trends continued the majority of social researchers would be working under contract to government and other agencies which commissioned policy relevant investigations This shift towards contracted and commissioned research threw into heightened relief the importance of greater understanding of the

often problematic relationship between researchers on the one hand and funding agencies and policy making bodies on the other This book was directed at both social scientists who were or would in the future be involved in social policy research and at administrators planners and policy makers who often had responsibility for funding such research and who were also its potential users The authors provide accounts of research in a wide variety of settings conducted on behalf of a diverse range of sponsors in order to confront describe and try to understand the tensions which develop between the two sides of the policy research relationship While there is of course no suggestion here that there are tailor made solutions that can eradicate difficulties the feeling is expressed that improvements in the research relationship are possible and highly desirable The primary objective of the book was to provide an impetus for greater understanding and collaboration that could lead to such improvements

**Politics of Social Research** Ralph L. Beals, Alan Woolfolk, 2017-07-12 Politics of Social Research addresses itself to the question of the behavior appropriate for social scientists conducting research sponsored by or otherwise involving government agencies our own and those of other countries The simple patriotism that suggests that social scientists like other citizens should not hesitate to put their skills at the service of their government is questioned here and by practitioners This is partly because of outright disagreement with government policies and partly because of the threat to independence posed by massive government funding As this book plainly shows the problems are especially acute for social scientists working abroad where they are viewed as de facto representatives of American policy while at the same time they must accommodate to the policies of foreign governments

*The Southwestern Political and Social Science Quarterly*, 1928 [The Annals of the American Academy of Political and Social Science](#) American Academy of Political and Social Science, 1929

*The World Politics of Social Investment: Volume II* Julian L. Garritzmann, Silja Häusermann, Bruno Palier, 2022-05-18 Welfare states around the globe are changing challenged by the development of knowledge economies In many countries policy makers main response has been to modernize welfare states by focusing on future oriented social investment policies that focus on creating mobilizing and preserving human skills and capabilities Yet there is massive variance in the development of social investment strategies The World Politics of Social Investment Political Dynamics of Reform is the second of two volumes of the World Politics of Social Investment WOPSI project which systematically maps and explains different welfare reform strategies in democratic

countries around the world This volume traces the development of social investment reforms across the regions of Nordic Continental and Southern Europe as well as Central and Eastern Europe North and Latin America and North East Asia The chapters in this volume study the impact of different structural drivers for social investment e g demographic poverty demand for skill or lack of an available workforce the salience of social investment in the public debates and the different political coalitions that led to or prevented the adoption of social investment strategies The chapters are written by leading social policy scholars from different world regions They all apply a joint theoretical framework developed in the first of the two volumes to explain the politics of social investment in a range of contexts and policy fields Jointly with the first volume the WOPSI project offers the first worldwide analysis of social investment reforms around the globe The Politics of Social Research Professor Martyn Hammersley, 1995-03-09 Is social research political Should it be political What are the implications of the politicization of social research Recent years have seen a growing range of challenges to the idea that research should be governed by the principle of value neutrality Critical feminist antiracist and postmodernist analyses have argued that social research is intrinsically political In this stimulating and often controversial book Martyn Hammersley weighs the arguments offered in support of these positions He considers the fundamental issues that the debate raises about the nature of social research its political dimensions and its contemporary relevance At the same time he provides a robust defence of value neutrality as a constitutive principle of social research and makes a reassessment of the role of research in modern societies Praise for The Politics of Social Research For anyone interested in the nature of social research who has enough grasp of the issues to access the text this book is a must British Journal of Educational Psychology All in all Hammersley has produced a text which provides us with much to think about As I have said certain chapters will no doubt attract considerable debate Almost all of the chapters could stand alone but the broad political theme used to bring chapters and topics together works well almost always Local Government Studies Not only is Hammersley a leading exponent of sociological research he is also a key writer and thinker on the problems of undertaking research This collection some of which has been published elsewhere and some not therefore is a welcome addition to the literature on social research interesting and well argued Disability and Society Social Science in Government Richard P. Political Science in Europe Thibaud Boncourt, Isabelle Engeli, Diego Garzia, 2020-05-28 The last half century has been a defining period for the development of political science in Europe disciplinary norms have become institutionalized in professional organizations training units and research centres the scholarly community has dramatically grown in size across the continent the analytical and methodological tools of the discipline are increasingly sophisticated and the knowledge disseminated under the label political science is bigger than it has ever been Political Science in Europe takes stock of these developments and reflects on the achievements of the discipline and the challenges it faces Is there a distinctive European blend of political science Is the European political science community cohesive and inclusive How does the discipline cope with the neoliberalisation of academia and the diffusion of illiberal politics Leading and up and coming political scientists answer these questions by discussing the discipline's key concepts and intellectual trends its professional structures and its relationship with its social economic and political environment
