Barnes,2018-08-06 Originally published in 1986 this urban political ethnography focusses on Mushin a large suburb of metropolitan Lagos Nigeria It explores the mechanisms which bridge the various social categories to bring about political interaction The book traces the development of Mushin from a collection of rural villages to its full status as a political community It analyses structures and processes and the ways in which since the 19th century the system has responded to colonial civilian and military regimes It examines the tactics ordinary people use to meet their needs and the ways in which political aspirants manipulate the system to acquire and wield power University of Michigan Official Publication University of Michigan,1976 Each number is the catalogue of a specific school or college of the University *A Comparative Study of Representative Systems* Yezhong Zhou,2024-03-27 This book demonstrates the social and historical conditions for the existence and development of the representative system and uncovers the laws dictating its occurrence development and operation Due to the barriers of language and cultural communication the understanding of democracy differs in western and Chinese cultures which leads to many misinterpretations and even bias The book displays the merits and drawbacks of different forms of democracy on the basis of a comparative study of the different representative systems and argues that different representative systems can co exist side by side and that the selection of the appropriate form of democracy must reflect the actual conditions in a given country Therefore a blind evaluation or criticism is unreliable The book could provide good opportunities for western scholars to see how the Chinese scholars understand democracy and the representative system help the westerners to understand the forms of democracy with Chinese characteristics and rationality of the socialist people s representative system grasp the true essence of Chinese Constitution and democracy and give up their bias towards China for a better communication and mutual understanding This book constructs a theoretical framework for studying the representative system and provides a solid foundation for its further research promoting the improvement and development of constitutional jurisprudence Even today the comparative study of the basic theories system building and operation of the representative system are of great theoretical significance and practical value in the Chinese political development and reform The book is primarily intended for graduates and scholars in the areas of constitutional jurisprudence on China and abroad It is a must read for constitutional researchers and those who want to know the essential differences between Chinese and Western constitutional jurisprudence Resources in Education ,1973 **Research in Education** ,1973 Power by Design Suisheng Zhao,1995-12-01 First established as a

cabinet system in Guangzhou in 1925 the Nationalist Government of China was replaced three years later by a presidential system under a unified Nationalist government in Nanjing The cabinet government was restored in 1931 and existed until the presidential system was again installed by the 1936 constitution Why did presidential and cabinet systems exist alternately during this formative period of the Nationalist government Why was the presidential system finally adopted in 1936 Suisheng Zhao answers these and other questions fundamental to understanding authoritarian regimes in this pioneering study of the design of the Nationalist Government of China from 1925 to 1937 although scholars of comparative politics have shown great interest in the institutional choice between parliamentarianism and presidentialism in democratic countries they have paid little attention to the study of constitutional frameworks in authoritarian settings By offering a clear and original re interpretation of the history of this power struggle between Chiang Kai shek and his rivals over institutional design Zhao challenges the conventional wisdom that has underestimated the importance of formal institutions in non democratic regimes Borrowing ideas from public choice theory Zhao proposes that political actors who design governmental institutions are driven by power maximization strategies just as business firms are driven by wealth maximization strategies Constitution making reflects the underlying distribution of power among authoritarian leaders who attempt to design political institutions that will consolidate their personal power and position Thus Zhao argues if political actors possess more power resources than their rivals and anticipate themselves becoming dominant they will choose the singular leadership of the presidential system If they are in a weaker position and do not anticipate becoming dominant they will prefer the collective leadership of the cabinet form of government Notable for its persuasive integration of political science theory and the historical evidence Power by Design is an insightful re interpretation of Chinese history that will be welcomed by scholars of modern China and those interested in the consequences of the nationalist politics that continue to reverberate in contemporary China as well as by comparative political scientists studying constitution making and institutional design The Temple University Catalogue
