**Pollution-pricing** James F. Hudson, Elizabeth E. Lake, Donald S. Grossman, 1981 Comprehensive Water Resources Management Peter Rogers, 1992 Cost Analysis of Water Pollution Control Dennis P. Tihansky, 1973 Ecological Policy and Politics in Developing Countries Uday Desai, 1998-04-16 The interconnectedness of the global environment and finiteness of the earth's natural resources require an increased understanding of environmental and natural resource policy and politics in countries around the world This is especially true of industrializing countries where widespread ecological disturbances and rapid exploitation of natural resources are taking place Ecological Policy and Politics in Developing Countries provides an in depth study of ecological problems policies and politics in ten major industrializing countries Each chapter discusses the increasingly international context of domestic environmental policies and explores some of the powerful interests and institutional forces that contribute to ecological problems and shape the policies to deal with them in each country The authors identify some of the major impediments to both well designed environmental policies and their effective implementation The ten countries included here the Czech Republic China India Indonesia Mexico Nigeria Taiwan Thailand Slovakia and Venezuela cover five continents over half of the world's population and most of the major industrializing countries Contributors include Lester Ross Robert Cribb Jonathan Rigg and Philip Stott Juju Chin Shou Wang R K Sapru Stephen P Mumme Pablo Gutman Olusegun Areola and Catherine Albrecht *America's Water* Peter Rogers, 1996 Were water considered an industry it would be one of the largest in the United States surely the most capital intensive and the most closely regulated by Congress Yet as Peter Rogers argues in this readable pragmatic and scientifically grounded assessment of national water issues it would also be one of the most fragmented and least coherent areas of public policy Rogers brings together all aspects of water and water use to look at policy formation from technical economic and political points of view He shows why these separate perspectives must be considered simultaneously if intelligent policies are to be developed to protect this indispensable resource for present and future generations Although water use has declined since 1980 the U S still consumes more than twice as much water per capita as any other country in the world Weighing current resources against future demand Rogers covers a host of complex water issues facing a thirsty affluent nation He explains why the federal role needs to be developed and clarified in a number of areas from changing the unrealistic expectations of the American public for clean water at any cost to financing the rebuilding of infrastructure that is nearly a century old from reforming intergovernmental relations and the committee structure in Congress to preserving and restoring wetlands and developing a national drought management policy Of the two basic approaches to policy formation spelling out desirable norms and attempting to achieve them or building pragmatically on what has been feasible in the past Rogers advocates the feasibility approach The challenge he asserts is to develop a federal policy that will reform the historical patchwork of state state and state federal agreements and allow them to work together without abrupt dislocations Peter Rogers is Gordon

O Adeoti,2024-11-01 This title was first published in 2002 Why do firms adopt pollution control technologies How can environmental policy be strengthened How can technology and industrial policies achieve green innovation This volume critically examines whether the stimulus response notion of environmental policy functions as the primary motivation for the adoption of pollution control technologies It also questions whether technology and industrial policies can help to achieve the objective of green innovation Interesting and well researched empirical case studies offer important insights into the observed trends in the quantitative analysis Focusing in particular on Nigerian industry John Adeoti exposes the gains from and constraints upon firms technology investment in pollution control      The Price of Water Stephen Merrett,2007-08-31 The Second Edition of the Price of Water expands on the coverage of the first edition and ambitiously develops the theme of the proper management of river basins both with respect to the control of rivers water quality and the defence of their quantitative flows from source to sea Using the hydrosocial balance concept of the first edition and the grand theory of catchment water deficits a remarkable breakthrough is made in understanding how river flows are destroyed by human society Drawing on extensive empirical

research into the Kafue River Basin and the Thames River Basin it is shown that the exhaustion of river flows that we see on a world wide scale can be explained by just five measurable drivers to basin surplus and basin deficit Moreover by specifying the key drivers and measuring their value the basis is provided for economic engineering and land management strategies that will reverse river basin destruction Bringing together 20 papers previously published in refereed journals *The Price of Water* provides information that many readers would not otherwise have been able to access to through their professional and academic libraries The scope of the book is broad dealing with a diverse range of subjects such as regional and catchment planning and integrated water resources management Topics considered include both water quantities and qualities drought management the virtual water controversy farmers water rights the economic demand for water the design of abstraction charges the cost and use of irrigation water the design of effluent charges the willingness to pay methodology catchment water deficits water resource impacts of new property construction water leakage impact on river basins managing water quality within EC directives *EPA-R5* ,1973 **Socioeconomic Environmental Studies Series** ,1973 *Toward a Philosophy of Planning* Raymond Harrison Wilson,1973 **Acid Rain and the Environment** Basil Alec Alexander,1985 Problems of Government , *Managing Water Quality* Allen V. Kneese,Blair T.
