Charles Birch, John B. Cobb

Pollution The Neglected Dimensions Worldwatch Paper 27:

Eco-Socialism or Eco-Capitalism? Saral Sarkar, 1999-05-01 This major synoptic work explores some of the most important questions facing humanity in the coming generations It is remarkable for its author's holistic treatment of the environment and social justice as inescapably related questions his refusal to analyze the industrialized and developing countries as though they are so different that any understanding of the one can ignore the other and his integrity in exploring difficult and controversial questions from a stance that always addresses the evidence even if that leads to conclusions that are not currently fashionable Saral Sarkar argues that the USSR bumped up against environmentally defined and resource related limits to growth at a relatively early stage But this does not mean that a free market globalized capitalist economy will indefinitely escape a similar fate Nor will a modified eco capitalism as promoted by some sections of the Western environmental movement provide a sufficiently grounded solution to the twin problems of environmental destruction and social injustice The author looks therefore to a fundamentally different future one in which our very notion of progress is differently conceived Resources in Education, 1990

The Liberation of Life Charles Birch, John B. Cobb, 1985-01-10 This book is about the liberation of the concept of life from the bondage fashioned by the interpreters of life ever since biology began and about the liberation of the life of humans and non humans alike from the bondage of social structures and behaviour which now threatens the fullness of life's possibilities if not survival itself It falls into a tradition of writings about human problems from a perspective informed by biology It rejects the mechanistic model of life dominant in the Western world and develops an alternative ecological model which is applicable to the life of the cell and the life of the human community For the first time it brings together in one work the insights of modern biology with those of a modern holistic philosophy and a liberal theology in a way which challenges conventional approaches to science agriculture sociology politics economics development and liberation movements

An Inquiry Into the Human Prospect: Looked at Again for the 1990s Robert L. Heilbroner, 1991-08-17 Is there hope for man That terrible question was posed by Robert L Heilbroner in the original version of An Inquiry into the Human Prospect In this third edition of a book that has become a classic Professor Heilbroner leaves the question in place on the first page believing some twenty years later that that interrogative sounds the themes of the 1990s as well The main components of the global predicament he described in the first edition are still with us today runaway populations obliterative weaponry and a closing environmental vise Writing now in the aftermath of the extraordinary events that caused communism as a challenger to capitalism to vanish like a puff of smoke Professor Heilbroner traces out the difficulties that beset those attempting centrally planned economics He shows how Soviet style systems became mired in bureaucratic swamps But he warns that the triumph of profit driven market directed economies will not delay the looming encounter with the ecological barrier The absorption capacities of the environment writes Professor Heilbroner whether in terms of the greenhouse effect or the overrunning of other physico chemical capabilities of the planet
