Polymeric Delivery Systems Vol 5 Midland Macromolecular Monographs:

Drug Delivery Systems, Third Edition Vasant V. Ranade, John B. Cannon, 2011-04-25 Drug delivery technologies represent a vast vital area of research and development in pharmaceuticals. The demand for innovative drug delivery systems continues to grow driving a variety of new developments. *Drug Delivery Systems Third Edition* provides a comprehensive review of the latest research and development on drug delivery systems. Coverage includes liposomal, transmucosal, transdermal, oral, polymeric and monoclonal antibody directed delivery. Each chapter provides a table of marketed and investigational products with numerous practical examples. The book also provides readers with a multitude of possible drug delivery systems that can be used to improve therapeutics along with global and regulatory perspectives. This third edition contains a chapter on nanoscience and technology for drug delivery along with cutting edge business intelligence and strategies. Written in a straightforward manner, the authors provide a global perspective on current and future advances and market opportunities. Supplying a cogent overview of the field and extensive guidance on where to get more information, it is an essential resource for anyone venturing into this area of drug development. *Polymeric Separation Media* A.

Cooper, 2012-12-06 This volume is a collection of manuscripts based on presentations at a symposium *Polymeric Separation Media* organized for the Second Chemical Congress of the North American Continent held in Las Vegas August 24-29 1980. The symposium was organized to bring together researchers in the expanding field of separations based on polymeric media. A diverse cross section of research areas were presented which were linked by the active separation agent being a polymeric material. I would like to thank the authors for their endeavours and the audience for their participation especially in light of the late change of venue for this meeting. Finally I am indebted to the Division of Polymer Chemistry of the American Chemical Society for their sponsorship.
