Polymers in Medicine Emo Chiellini, Raphael M. Ottenbrite, 1992-06-13 The utilization of polymers in medicine has become a reality in the last decade This book is a concise presentation of the fundamentals applications and methods of optimization of polymeric drugs and polymeric drug delivery systems for medicinal purposes The basic rationale for the use of polymeric drugs and polymer delivery systems is the possibility to alter the pharmacokinetics and pharmacodynamics of therapeutic agents so as to maintain an adequate therapeutic environment at the site of disfunction for an extended period of time The primary objectives for using polymeric drugs and polymeric drug delivery systems are to introduce new and efficient methods of drug administration to improve efficacy and patient compliance to decrease toxicity and to ensure safety The following factors influence the design and performance of polymers for medicinal applications disease drug properties type of therapy acute or chronic physiology of the patient administration route and the site requiring therapy

Pharmaceutical Applications of Polymers for Drug Delivery David S. Jones, David Jones, 2004 Annotation The review focuses on the use of pharmaceutical polymer for controlled drug delivery applications Examples of pharmaceutical polymers and the principles of controlled drug delivery are outlined and applications of polymers for controlled drug delivery are described The field of controlled drug delivery is vast therefore this review aims to provide an overview of the applications of pharmaceutical polymers The review is accompanied by approximately 250 abstracts taken from papers and books in the Rapra Polymer Library database to facilitate further reading on this subject

Polymers in Medicine Emo Chiellini, Paolo Giusti, 2013-03-09 This book contains the collected papers presented at the International Symposium on Polymers in Medicine Biomedical and Pharmacological Applications which was held at Porto Cervo Italy May 24 28 1982 To the best of our knowledge this symposium was the first to be organized in Italy entirely devoted to the several aspects of the use of synthetic and semisynthetic macromolecular materials in the field of biomedical and pharmacological

applications The intention of the Organizing Committee of the symposium was the promotion of a scientific and cultural initiative to gain the attention of various experts in line research of the potential of suitably designed man made polymeric materials in biomedical applications With highly qualified and worldwide attendance the above goal was fully satisfied Indeed the opportunity of meeting together in a well conceived and discreet corner of the world scientists with different cultural backgrounds and objectives helped extend the meaning of the symposium far beyond the Italian borders and the perspectives of the National Research Council of Italy CNR the major sponsor of the meeting
