Adhesion is a phenomenon architects and civil engineers are not very familiar with In other disciplines knowledge about  
surface properties and the background of bonding energies is also far from satisfactory nevertheless there are many  
important applications in concrete engineering where adhesion is necessary for success and durability These include coating  
and painting repair of concrete surfaces bonding of fresh to old concrete crack injection glueing of precast elements glueing  
of steel to concrete etc In 1981 RILEM established the technical committee 52 RAC Resin Adherence to Concrete The main  
aims of the committee s work were to collect research results and practical experiences to initiate and coordinate research  
programs to develop on a scientific base test methods for field and for laboratory purposes One of the results of the  
committee s work is a state of the art report which will be presented orally as a General Report at the International  
Symposium ISAP 86 and will be printed either in the RILEM journal Materials and Structures or separately Several test
